

Norwegian Air Shuttle ASA

(a public limited liability company incorporated under the laws of Norway)

For the definitions of capitalised terms used throughout this Registration Document, see Section 13 “Definitions and Glossary”. *Investing in the Shares involves risks; see Section 1 “Risk Factors” beginning on page 5.*

Investing in the Shares, including the Offer Shares, and other securities issued by the Issuer involves a particularly high degree of risk. Prospective investors should read the entire Prospectus, comprising of this Registration Document, the Securities Note dated 6 May 2021 and the Summary dated 6 May 2021, and, in particular, consider the risk factors set out in this Registration Document and the Securities Note when considering an investment in the Company. The Company has been severely impacted by the current outbreak of COVID-19. In a very short time period, the Company has lost most of its revenues and is in adverse financial distress. This has adversely and materially affected the Group’s contracts, rights and obligations, including financing arrangements, and the Group is not capable of complying with its ongoing obligations and is currently subject to event of default. On 18 November 2020, the Company and certain of its subsidiaries applied for Examinership in Ireland (and were accepted into Examinership on 7 December 2020), and on 8 December 2020 the Company applied for and was accepted into Reconstruction in Norway. These processes were sanctioned by the Irish and Norwegian courts on 26 March 2021 and 12 April 2021 respectively, however remain subject to potential appeals in Norway (until 12 May 2021) and certain other conditions precedent, including but not limited to the successful completion of a capital raise in the amount of at least NOK 4,500 million (including the Rights Issue, the Private Placement and issuance of certain convertible hybrid instruments as described further herein). The aim is to substantially reduce the debt level, reduce the size of operations and re-capitalize the Group with debt and equity. If the Company does not exit the examinership and the reconstruction processes in a successful way, it is highly likely that the Company will enter into liquidation and/or bankruptcy proceedings during the second or third quarter of 2021.

6 May 2021

IMPORTANT INFORMATION

This Registration Document has been prepared in connection with (i) the Offering and (ii) the listing of the Offer Shares on the Oslo Stock Exchange (the "Listing"), and is based on the simplified disclosure regime for secondary issuances, cf. Article 14 of Regulation (EU) 2017/1129 of the European Parliament and of the Council of 14 June 2017 on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Directive 2003/71/EC¹, as amended, and as implemented in Norway in accordance with Section 7-1 of the Norwegian Securities Trading Act (the "EU Prospectus Regulation"). This Registration Document should be read together with the Securities Note dated 6 May 2021 and the Summary dated 6 May 2021, both prepared and issued by the Company, which together with this Registration Document constitute a prospectus (the "Prospectus").

The Prospectus has been prepared to comply with the Norwegian Securities Trading Act of 29 June 2007 no. 75 (as amended from time to time, the "Norwegian Securities Trading Act") and related secondary legislation, including the EU Prospectus Regulation. This Registration Document has been prepared solely in the English language. This Registration Document has been approved by the Financial Supervisory Authority of Norway (Nw.: *Finanstilsynet*) (the "Norwegian FSA"), as the competent authority under the EU Prospectus Regulation. The Norwegian FSA only approves this Registration Document as meeting the standards of completeness, comprehensibility and consistency imposed by the EU Prospectus Regulation, and such approval should not be considered as an endorsement of the issuer or the quality of the securities that are the subject of this Registration Document. Investors should make their own assessment as to the suitability of investing in the securities. For the definitions of terms used throughout this Registration Document, see Section 13 "Definitions and glossary".

The information contained herein is current as at the date hereof and subject to change, completion and amendment without notice. In accordance with Article 23 of the EU Prospectus Regulation, significant new factors, material mistakes or material inaccuracies relating to the information included in the Prospectus, which may affect the assessment by investors in the Offer Shares which arises or is noted in the time between the time of approval of the Prospectus by the Norwegian FSA and the listing of the Offer Shares on the Oslo Stock Exchange, will be included in a supplement to the Prospectus without undue delay. Neither the publication nor distribution of the Prospectus, nor the granting of any Subscription Rights nor the sale of any Offer Share, shall under any circumstances imply that there has been no change in the Group's affairs or that the information herein is correct as at any date subsequent to the date of the Prospectus.

No representation or warranty, express or implied is made by the Managers as to the accuracy, completeness or verification of the information set forth herein, and nothing contained in this Registration Document is, or shall be relied upon as, a promise or representation in this respect, whether as to the past or the future. The Managers assume no responsibility for the accuracy or completeness or the verification of this Registration Document and accordingly disclaim, to the fullest extent permitted by applicable law, any and all liability whether arising in tort, contract or otherwise which it might otherwise be found to have in respect of this Registration Document or any such statement.

On no account must the publication or the disclosure of the Registration Document give the impression that the information herein is complete or correct on a given date after the date on the Registration Document, or that the business activities of the Company or its subsidiaries may not have been changed.

Only the Company is entitled to procure information about conditions described in this Registration Document. Information procured by any other person is of no relevance in relation to this Registration Document and cannot be relied on.

Unless otherwise stated, this Registration Document is subject to Norwegian law. In the event of any dispute regarding this Registration Document, Norwegian law will apply.

¹ Means Directive 2003/71/EC of the European Parliament and of the Council of 4 November 2003 on the prospectus to be published when securities are offered to the public or admitted to trading and amending Directive 2001/34/EC.

Other than in compliance with applicable United States securities laws, no offers or sales of securities are being made or will be made, directly or indirectly, in the United States. The Shares will not be registered under the United States Securities Act of 1933, as amended, and may not be offered or sold in the United States absent registration or an applicable exemption from registration requirements.

In certain other jurisdictions, the sale and purchase of securities issued by the Group and the distribution of this Registration Document may be limited by law, for example in Canada, Japan and in the United Kingdom. Verification and approval of this Registration Document by the Norwegian FSA does not imply that this Registration Document may be used in jurisdiction other than Norway. No other measures have been taken to obtain authorisation to distribute this Registration Document in any jurisdiction where such action is required. Persons that receive this Registration Document are ordered by Norwegian to obtain information on and comply with such restrictions.

The content of this Registration Document does not constitute legal, financial or tax advice and Bondholders should seek legal, financial and/or tax advice.

Copies of this Registration Document can be obtained by contacting the Company.

1. RISK FACTORS

GENERAL

Investing in Shares and other securities issued by the Company involves a particularly high degree of risk. Prospective investors should read the entire Prospectus and, in particular, consider "Risk factors" when considering an investment in the Company. Please refer to the Securities Note dated 6 May 2021 for a listing of Share specific risk factors.

The risk factors included in this section are presented in a limited number of categories, where each risk factor is sought placed in the most appropriate category based on the nature of the risk it represents. Within each category the risk factors deemed most material for the Group, taking into account their potential negative effect for the Company and its subsidiaries and the probability of their occurrence, are set out first. This does not mean that the remaining risk factors are ranked in order of their materiality or comprehensibility, nor based on a probability of their occurrence. The absence of negative past experience associated with a given risk factor does not mean that the risks and uncertainties in that risk factor are not genuine and potential threats, and they should therefore be considered prior to making an investment decision. If any of the following risks were to materialize, either individually, cumulatively or together with other circumstances, they could have a material and adverse effect on the Group's business, financial condition, results of operations, cash flows and/or future prospects, and the Shares.

1.1 Risks relating to the Group's business and financial situation

1.1.1 Risks relating to COVID-19, Examinership / Reconstruction processes and debt levels

COVID-19 Outbreak and risk related to return to normalized operations

The outbreak of the COVID-19, which was recognized as a pandemic by the World Health Organization in March 2020, has severely impacted companies and markets globally. The Company has in particular been severely impacted by the current outbreak of COVID-19 and in a very short time period, the Company has lost most of its revenues. This has adversely and materially affected the Group's contracts, rights and obligations, including financing arrangements, and the Group is not capable of complying with its ongoing obligations and is currently subject to event of default. The Group is currently in breach of its commitments and agreements, has triggered events of default and is in adverse financial distress.

Furthermore, following a limited improvement in conditions in April and May 2020, global coronavirus cases and deaths have been climbing since early June 2020, resulting in re-imposition of measures aimed at curtailing the spread of the disease, including travel and other restrictions that have proven particularly challenging for the Group and the airline industry at large. The Company has been strongly affected by the pandemic and has reported a net loss of NOK 23 billion for 2020. In addition, the Company has experienced 81 percent passenger decline compared to last year.

The Group's business, operations and financial performance are expected to continue to be materially adversely impacted by the outbreak of COVID-19, including the extraordinary health measures and restrictions on a local and global basis imposed, and are expected to continue to be imposed, by authorities across the world as a result thereof. No assurance can be given regarding if, when and to what extent the travel restrictions will be lifted and demand for air travel will increase, or if, when and to what extent the Group may return to normalized operations.

It is currently not possible to predict all the consequences of the COVID-19 pandemic for the Group, its business partners, Norway and the other countries in which the Group operates, the aviation industry or global business and markets - other than the expectations of material adverse negative effects that may be long-term. Potential investors should note that the COVID-19 situation is continuously changing and that new laws and regulations that affect the Group's operations may enter into force.

The Restructuring Proposal and Bankruptcy risk

On 17 November 2020, the board of directors of the Company (the “**Board of Directors**” or “**Board**”) resolved to restructure its business (including its fleet composition) and address its contractual obligations and debts towards its creditors under a court-supervised process in Ireland termed “**examinership**” (the “**Examinership**”). Furthermore, on 8 December 2020, following formal acceptance of the Company and certain of its Irish subsidiaries into the Examinership on 7 December 2020, the Company filed for and was accepted into a supplementary Norwegian court-supervised reconstruction process (the “**Reconstruction**”). These Examinership and Reconstruction processes (as further described in section 4.7 - subsection “Restructuring Proposal”) were sanctioned by the Irish and Norwegian courts on 26 March 2021 and 12 April 2021 respectively, however remain subject to potential appeals in Norway (until 12 May 2021) and certain other conditions precedent, including but not limited to the successful completion of a capital raise in the amount of at least NOK 4,500,000,000 (by way of the Rights Issue, the Private Placement and issuance of certain convertible hybrid instruments as described further herein). If the conditions precedent are for any reason not met as expected, including by way of any appeals being submitted under the Reconstruction in Norway, the effectiveness of the Reconstruction Proposal may be delayed or not completed at all. The Restructuring Proposal is also subject to a long stop date of 30 June 2021, and there is consequently a risk that the Reconstruction Proposal is not completed as contemplated or at all, following which is highly likely that the Company will enter into liquidation and/or bankruptcy proceedings during the second or third quarter of 2021.

In parallel with the Examinership and the Reconstruction, an emergency extraordinary general meeting of the Company held on 17 December 2020 (the “**EGM**”) granted wide authorization to the board of directors to issue Shares (increasing share capital by up to NOK 198,666,435) and financial instruments convertible into Shares (increasing share capital by up to NOK 198,666,435). Furthermore, the shareholders of the Company have at the EGM approved a rights issue of up to 800 million Shares to be implemented at the discretion of the board of directors, resulting in a share capital increase of up to NOK 8 million.

The Restructuring Proposal will, if implemented, materially dilute existing shareholders in the Company and significantly reduce the Group’s debt level to NOK 16 billion to 18 billion (including by converting part of such debt to equity-like instruments, being the Dividend Claims), with NOK 10 billion to 12 billion constituting interest bearing debt. If the Company does not exit the Examinership and Reconstruction processes in a successful way, it is highly likely that the Company will enter into liquidation and/or bankruptcy proceedings during the second or third quarter of 2021. Even if the Company should be able to implement the Restructuring Proposal, there is a significant risk that the Company becomes insolvent and enters into bankruptcy if, inter alia, the Company is not able to regain normalized operations. For further information on risks relating to the COVID-19 outbreak and related adverse market conditions, see sections “COVID-19 Outbreak and risk related to return to normalized operations” above and “Risk related to future operations” below).

Furthermore, it cannot be ruled out that some creditors will assert that neither the Examinership nor the Reconstruction is recognised in the jurisdiction governing their claim. As recognition of foreign insolvency processes is uncertain and unclear in some jurisdictions, it is thus a certain risk that some creditors may choose to not respect the Examinership and Reconstruction. The Group’s operations could be adversely affected if creditors the Group is dependent on to operate, does not recognise the Examinership or the Reconstruction and require that the Group settles its debt prior to 18 November 2020. This could trigger the Company to find alternative suppliers and for a shorter or longer period impact the operation. This could inter alia disturb the Company’s operations (if enforcement measures are introduced) and entail an increase in the Company’s debt if a court rules that the cram-down implemented in the Examinership and Reconstruction does not apply to the relevant creditor’s claim. The Company however believes that the recognition processes available in other jurisdictions are sufficiently strong.

Neither the Examinership nor the Reconstruction introduces cram-down of claims that are based on events finding place after 18 November 2020. Recently, some governmental authorities have indicated that the Company could be fined due to events taking place before 18 November 2020. It is uncertain whether fines imposed after 18 November 2020, despite being based on events finding place before 18 November 2020, are

bound by the cram-down introduced in the Examinership and Reconstruction. If not bound by the cram-down, such fines could disturb the Company's operations (if enforcement measures are introduced) and entail a significant increase in the Company's debt as the cram-down implemented in the Examinership and Reconstruction would not apply to the relevant fines.

Risk related to Boeing litigation

In June 2020, the Company issued a termination notice to the Boeing Company of its purchase agreements for the remaining 5 Boeing 787 aircraft, 92 Boeing 737 Max aircraft and the GoldCare service agreements. In addition, the Company filed a legal claim for compensation related to the grounding of the Boeing 737 Max aircraft and engine issues on the Boeing 787 aircraft. Boeing has contested the Company's position and asserted claims against the Group. The outcome is uncertain and may materially affect the Company's business and financial position.

Risk related to future operations

One of the Company's objectives in implementing the Restructuring Proposal is to reduce its fleet of aircraft and right-size its balance sheet and operations. Therefore, the Group's scope and nature of operations are expected to materially change following the Restructuring Proposal. Past performance may therefore have limited significance with respect to evaluating future business. See section 4.7 for further information relating to the Restructuring Proposal and possible consequences thereof.

Successful implementation of the Restructuring Proposal may not be sufficient to bring the Group into a positive cash generating business. The Group's ability to return to normal operations is dependent upon, amongst other factors, the lifting of travel restrictions (implemented in response to COVID-19), passenger demand for air travel and the return of aircraft to service following the Group's extended 'hibernation' phase. The Group has sought to partially mitigate this risk by reaching agreement with its aircraft creditors such that, until April 2022, the majority portion of its debt/rent payments will be subject to the operation of the relevant aircraft.

If the Group's business does not return to normalized levels then the Group may also in the future risk further insolvency proceedings and bankruptcy if, *inter alia*, the Group is unable to reach agreements with its creditors, the Company is not able to raise additional capital/finance working capital and/or the Group is not able to reduce, restructure or refinance a substantial portion of its existing debt.

Consequently, it is a material risk that the Group's business and operations - both with respect to size and nature - will be adversely changed even if the Group is able to conclude the ongoing insolvency proceedings and restructuring process. Finally, if the Group is unable to conclude on the current restructuring, it is a material risk that the Group may enter into bankruptcy. Such bankruptcy risk also applies even if the Group should be able to conclude the current restructuring.

Risks related to substantial debt level, the feasibility of the Restructuring Proposal and ability to satisfy payment obligations going forward

The Group has a substantial debt level, including substantial fixed obligations under aircraft leases and financings. In order to be able to service its debt obligations, the Group needs to reduce, reschedule and/or otherwise restructure a material part of its debt. The Restructuring Proposal seeks to address these issues, however the Examinership and Reconstruction remain subject to potential appeals in Norway and certain other conditions precedent, and to some extent their implementation is beyond the control of the Company. There is a risk that the Restructuring Proposal will not be completed as contemplated, or at all. The failure of the Group to implement the Restructuring Proposal could have a material adverse impact on the Company's ability to satisfy its payment obligations and with a major risk of a potential bankruptcy (full liquidation) as the ultimate consequence thereof.

Even if the Group is able to restructure its current debt in whole or in part, the Group's ability to service its debt and other commitments (including ensure compliance with financial covenants in its financing agreements)

going forward is subject to a number of risk factors, including but not limited to the future effects of the COVID-19 outbreak, the Group's ability to generate sufficient cash flow and operate in the ordinary course of business with positive cash flow and the need for future capital injections and refinancing - and therefore remains highly uncertain. Each of these factors is, to a large extent, subject to completing the ongoing restructuring, the COVID 19-pandemic, economic, financial, competitive, regulatory, operational and other factors, many of which are beyond the Group's control. There can be no assurance that the Group will be able to generate sufficient cash from its operations and/or obtain new capital to pay its debts or other payment obligations in the future or to refinance its indebtedness in order to be able to service its debt in its ordinary course of business. In such circumstances there would therefore be a risk that the Group will breach its debt and other obligations, and that creditors as a result will be entitled to accelerate their claims against the Group. Should such events arise the Group would seek to negotiate waivers of covenant breaches and other events of default with its creditors however there is a risk that the Group will fail to successfully do so.

1.1.2 Risks relating to the Group's operations

Operational difficulties may have a negative effect on the Group's operations

The Group's flights may be negatively affected by a number of factors, many of which are outside the Group's control, such as technical problems, problems with information technology systems, third-party service providers failing to deliver services in a satisfactory manner etc.

As a historical example the Group had experienced several technical issues with its engines on the Boeing 787 aircraft. In addition, the Group's Boeing 737 MAX aircraft were grounded in March 2019 (along with the worldwide fleet). Each event caused the Company's operational and financial performance to be significantly negatively affected. The negative effect on operating profit was caused by loss of revenue, increased fuel burn, crew inefficiencies and increased care and compensation expenses, material disruption to operations and other additional costs.

As part of the Restructuring Proposal the Group is returning all of its Boeing 787 and Boeing 737 MAX aircraft to their relevant lessors/financiers. However, there can be no assurance that technical problems will not arise similar to the Boeing 787 engines or the Boeing 737 MAX aircraft grounding on the 737NG aircraft remaining within the Group fleet. Likewise, the Group cannot control the impact of other externalities - for example a volcanic eruption similar to Eyjafjallajökull in 2010 - on its ability to conduct normalised operations.

Operational disruption causes various negative effects, such as loss of income, incurrence of additional costs, reputational damage and liability to pay compensation to customers. Materialization of any of the above risks may have a material adverse effect on the Group's business, financial condition, results of operations, cash flows and/or future prospects.

Scaling up of the Group fleet going forward

The Group has successfully retained 51 of its pre-COVID-19 fleet of 140 aircraft as part of the Restructuring Proposal. The Group has determined that this is the number of aircraft required to deliver its planned operations in 2021. In order to deliver its planned operations in 2022 the Group will require a further 19 aircraft. There is a risk that - as a result of increased capacity demand by airlines worldwide as the COVID-19 outbreak eases and passenger demand returns - that the Group may not be able to source further aircraft on the same or similar, attractive terms as those retained in 2020 resulting in a higher cost base.

Furthermore, as a result of the Group returning the majority of its owned aircraft under the Restructuring Proposal, there is a risk that the Group will not be able to access attractive financing from the debt markets, capital markets, equity markets or export credit agencies for the near future.

The operations and development of the Group is dependent on traffic rights

Under the laws and regulations which govern the aviation business, the Group is required to have traffic rights to operate its flights. Today there is a single aviation market within the EU, meaning that any carrier from a

member state (incl. the EEC) can depart and arrive anywhere within the region. However, the right to fly from a member state to a non-member state is regulated by bilateral agreements that typically restrict access to carriers and aircraft based on the agreement parties' nationality. The EU has on behalf of its member states negotiated certain air services agreements with third countries, e.g. US, Canada and Brazil. As Norway is not an EU member state, Norway is not a party to such agreements. Norway may seek separately to negotiate accession to the EU agreements provided this is accepted by the EU member states and the relevant third country, and in 2011 Norway negotiated an accession to the EU - US "Open Skies" agreement. Even flying above foreign territory can be restricted, such as over Russia. The same bilateral system applies anywhere else in the world. To secure the required traffic rights, the Group has established a multiple airline model within the same Group, where each airline holds a national 'Air Operating Certificate' ("AOC"). This allows for optimization of the location of each AOC to get access to needed traffic and overflying rights. However, to the extent the Group should wish to expand its operations outside the scope of its existing AOCs or if any of the existing AOCs should for any reason be revoked or fall away (including as a result of the Restructuring Proposal), this may limit the Group's ability to operate certain flights. This could have a material adverse effect on the Group's business, results of operations, financial condition, cash flows and/or prospects.

Capacity constraints at airports or an inability to acquire and maintain airport slots or overflight rights may have a material adverse effect on the Group's business, financial condition or results of operations

Air traffic is limited by the infrastructure of airports and the number of slots available for aircraft arrivals and departures. The Group is dependent on access to the right airports in the geographical markets the Group has chosen to operate within and with a level of costs in accordance with the Group's low-cost strategy. Changes in the terms and conditions for the Group's access to such facilities or an increase in the costs involved as a result of expiry or termination of its contracts may have a material adverse effect on the Group's earnings. Airports might also introduce limitations on *inter alia* operational hours, noise levels, use of runway or total numbers of daily departures. These types of restrictions might affect the Group's ability to offer services or improve its range of services at such airports.

As part of the Group's decision to reduce the size of its fleet (including all of its long-haul aircraft) the Group will necessarily withdraw from certain markets and airports for the near-term. The Group's ability to resume services to those airports in the future will be uncertain since, by not operating to those destinations, the Group will lose the slots it benefitted from in the past.

The price and availability of over-flight rights, which allow airlines to fly over individual countries or territories, as well as the cost of traffic charges, such as arrival, departure and navigation charges, affects the Group's business operations to a material extent. Increases in the prices of such charges could affect ticket prices and subsequently the demand, should the Group pass some of this cost onto its customers. Decisions on slots, over-flight rights and/or absence of such rights may affect the Group's ability to offer attractive and low-cost routes to its customers and therefore impact demand.

The Group may not achieve its goals in future negotiations regarding the terms of collective labor agreements of its unionized work groups or may face other claims from employees, exposing it to the risk of strikes and other work-related disruptions

It cannot be ruled out that the Group may be subject to legal claims from current or former employees, arising generally or as a result of the current situation of the Group.

Most of the Group's employees are unionized. While the Group was able to negotiate a new collective labor agreement with the Norwegian Pilot Union in November 2017 and has collective labor agreements in place with all employee groups, there can be no assurance that the Group's future agreements with labor unions can be negotiated to the long-term benefit of the Group or that the outcome of new negotiations, mediations or arbitrations will be on terms consistent with the Group's expectations or comparable to agreements entered into by other airlines. If the Company or the Group are unable to reach an agreement with any of their unionized work groups in future negotiations regarding the terms of their collective labor agreements or if additional segments of the Group's workforce become unionized, they may be subject to work interruptions, stoppages or

other employee actions. Unions representing employees of subsidiaries of the Company have occasionally alleged that the employees are rendering services for the Company directly and that the workers in reality are employed by the Company. The Group has consistently rejected these allegations. In the event the matter is brought to court and the court makes a ruling to the disfavour of the Company, the Company risks assuming the employment liabilities of the relevant subsidiary. This may have a material adverse effect on the Group's business and financial condition.

Any such disputes or actions described above can have a number of negative consequences, such as cancellation of flights, loss of income, reputational damage, reduced ability to recruit or retain skilled employees and increased employee-related costs, which can negatively impact the Group's results of operations and financial condition.

For example, in February and March 2015, the Group experienced a strike in connection with negotiations with its unions. The strike lasted eleven days from 28 February. The strike resulted in a decrease in passenger numbers of 4 percent compared with the same period the preceding year, impacting 2,000 flights and 200,000 passengers. According to the Company's calculations, the strike incurred losses and extra costs to the Group of approximately NOK 350 million, whereof NOK 120 million was related to lost revenue and NOK 110 million was related to extra costs to cater for passengers impacted by the strike.

Materialization of any of the above risks may have a material adverse effect on the Group's business, financial condition, results of operations and future prospects.

Further increase in hold-back from credit card acquirers could have an adverse effect on the Group's liquidity

A significant part of the Group's customers pay with credit cards. A portion of the payment is received from the credit card acquirers upon booking and the remainder upon travel. Credit card acquirers have over the past quarters increased the hold-back of payments to the Group due to the Group's financial situation, resulting in a negative impact on the Group's cash flow. Although the Group currently has a low credit exposure towards the credit card acquirers, there is still a downward risk that the credit card acquirers may increase their hold-back further which could have an adverse effect on the Group's liquidity.

1.1.3 Risks relating to tax and financial conditions

The Group is exposed to tax related risks

In March 2017 and June 2018, the Norwegian Tax Authorities made a reassessment pertaining to an EEC cross-border restructuring within the Group that took place in 2013 and 2014. The restructuring was carried out under the rules of contingent tax-free group reorganizations. The assessment was appealed, and in January 2020 the Tax Appeals Board ruled in line with the tax authorities' assessment. The disputed question is whether the rules on contingent tax-free group reorganization, as they applied in 2013 and 2014, are contrary to EU law. The Group and its tax advisor are of the opinion that the ruling is without merit and that it is probable that the ruling will be reversed in court. The case was tried in Oslo municipality court in April 2021. The ruling is expected around 20 May 2021. The Group has not made any provision for any potential tax claim in the Annual Financial Statements. For further information, refer to Section 11.1.3 "Reassessment from the Norwegian Tax Authorities". There is no assurance that the court case will be won, and there is a risk that the Group will have to comply with the reassessments and incur significant costs related to the court case. This may impact the Group's financial condition.

Furthermore, the Norwegian Tax Authorities have given notice to the Company that it may be subject to an additional tax claim for reporting too low income on the tax return for 2014-2018. The claim is based on the view that parts of the intangible return allocated to Norwegian Brand Ltd. should have been allocated to the company. The Company, supported by its legal advisors, are of the view that the claim is unfounded, and have disputed the grounds of the claim and its size. Further, in the event the claim exists, the Company is of the view that the claim will be subject to cram-down in the same way as other unsecured debt incurring prior to

18 November 2020 under the Restructuring Proposals. Still, the matter entails a certain risk of the Company's debt being increased.

The Group is subject to risks relating to its substantial deferred tax assets

Intangible assets amounted to NOK 2,167 million at the end of December 2020, compared to NOK 2,871 million at the end of 2019, including deferred tax assets of NOK 1,966 million compared to NOK 2,672 million at the end of 2019. The Group had NOK 4,593 million in unrecognized deferred tax assets at the end of 2020, compared to NOK 545 million at the end of 2019 related to carry-forward tax losses. Following the COVID-19 outbreak and uncertainties regarding the speed of the market recovery and the Company's return to normal operations, the Company has not recognized any deferred tax assets related to the 2020 losses. In addition, an impairment of deferred tax assets related to carry-forward tax losses of NOK 649 million has been recognized during 2020 due to uncertainties regarding the timing and extent of utilization of deferred tax assets following the COVID-19 outbreak.

The deferred tax assets are mainly explained by the historical tax losses of the Group. Unused tax losses are recognized to the extent that taxable profits are probable. Significant management judgment is required to determine the amounts of deferred tax assets that can be recognized, based on the anticipated timing and level of future taxable profits together with future tax planning strategies. In situations where companies in the Group have experienced recent losses, the Group will evaluate whether there is other convincing evidence supporting taxable profits and the future utilization of its carry forward losses. Remaining significant carry forward losses is held by the Company as the parent entity in the Group. Convincing other evidence is considered for recognition of the deferred tax assets. Remaining recognized tax assets are supported by expected debt forgiveness through the ongoing restructuring process. The future operations with focus on markets that has been profitable in the past, also supports that there are reasonable expectations that the Group will generate taxable profits in the upcoming periods.

If the Group is unable to utilize its deferred tax assets, this will lead to reversal of deferred tax assets which may have significant adverse effect on the Group's financial position.

Exchange rate fluctuations may affect the Group's financial condition or results of operations

Fluctuations in exchange rates, particularly between NOK and the US dollar ("USD") and between NOK and the Euro ("EUR"), may have a material adverse effect on the Group. The Group's foreign exchange risk mainly arises from fuel and aircraft purchases, aircraft maintenance, aircraft leasing/debt payments and sales revenue denominated in foreign currencies. The largest investments, including the acquisition of aircraft and their spare parts, are also mainly made in USD and EUR. Fuel costs and aircraft leasing costs are also USD-denominated. There can be no assurance that the Group will have adequate protection against foreign exchange losses. Substantial foreign exchange losses may have a material adverse effect on the Group's financial condition.

The market price of derivatives may involve risks

The Group is subject to risks relating to fuel costs, interest rates and currency. Hence, the Group is actively using derivative instruments to hedge fuel costs, interest rates and currency, with the aim of mitigating the volatility of the Group's financial results caused by market price fluctuations. The size of the hedges will vary depending on different factors. Despite such hedging, there can be no assurance, at any given time, that the Group will have sufficient derivatives in place to provide adequate protection against higher market prices. In addition, the market price of the derivatives may decrease substantially, resulting in substantial hedging losses for the Group, as well as leaving the Group unable to participate fully in the economic benefits of the price decrease, which again could impact the Group's short-term cost effectiveness.

1.2 Risks relating to the Group's industry

The Group is exposed to volatile aviation fuel prices

The Group's financial results are affected by the evolution of the market price of jet fuel, as fuel costs are the single largest cost item for the Group. The operating results of the Group can be materially affected by changes in the price and availability of jet fuel.

Demand for airline travel and the Group's business is subject to strong seasonal variations

Beyond the current severe impact by COVID-19, the airline industry tends to be seasonal in nature and the Group, like other airlines, has historically experienced substantial seasonal fluctuations. Generally, the demand peaks in the period from May to October and is relatively lower in the period from November to April. Furthermore, public holidays, which alter the general seasonal changes in demand, are usually addressed by adapting the schedule and network to the expected traffic flows around such holiday periods as well as offering seasonal routes. Should fluctuations be greater than expected or should the Group not adapt its network in accordance with the changed demand around holidays, this could lead to over- or under- capacity, and have a material adverse effect on the Group's business, financial condition, cash flow and/or results of operations.

Reference is also made to description of effects of the COVID-19 outbreak in the section "COVID-19 Outbreak and risk related to return to normalized operations" above.

Vulnerability to small changes due to high fixed costs

Although the split between variable and fixed costs has changed over time, the nature of the airline business is such that a substantial percentage of the Group's operating expenses are fixed costs that do not vary proportionally based on its load factors, the number of passengers or the amount of cargo carried, the number of flights flown or aircraft utilization rates. These costs include the costs of the aircraft (albeit that for the period ending 01 April 2022 the Group has agreed with its creditors that the majority of its aircraft costs shall be variable, i.e. dependent on aircraft operation), employee costs (including, the costs of specialist workers such as pilots), air traffic charges, taxes, landing rights and other aviation fees. Thus, the Group's profit (or loss) is highly sensitive to small changes in sales volumes and the Group's ability to swiftly adjust its costs according to the decrease in demand is limited. The lack of ability to significantly reduce the Company's fixed costs may also negatively affect the Group's liquidity in times when revenue is particularly low over a longer period of time, such as in the current environment with the COVID-19 outbreak and the related government-imposed travel restrictions.

The airline industry is exposed to extensive taxes and fees that can affect the demand

Airport, transit and landing fees, as well as charges and initiatives represent a significant operating cost to the Group and have an impact on its operations. Whilst certain airport and security charges are passed onto passengers by way of surcharges, others are not. In the past, security measures have resulted in fee hikes.

Restrictive security policies could be implemented and additional airport fees may be levelled or existing fees increased in the market that the Group operates in.

The airline industry is also subject to extensive fees and costs such as taxes (including ticket tax, passenger tax and value added taxes), aviation and license fees, charges and surcharges such as take-off charges, emission charges, noise charges, terminal navigation charges and security charges, which are typically levied on the basis of national legislation and thus vary among countries and represent a significant part of the Group's costs.

The Group may pass onto customers some of the costs resulting from such taxes and fees, but such increase in ticket prices may significantly impact demand, so that the Group may have to bear all or parts of the cost resulting from any increase in taxes and fees. Increase of such taxes and fees that the Group is not able to recover by increasing ticket prices may materially impact the Group's results of operations. Due to the

Company's current financial situation as further described in this Registration Document, this risk is prominent to the Company in the current circumstances and may adversely affect the Company's financial position.

The industry in which the Company operates is highly competitive and new airlines have entered the market

The Company operates within a highly competitive industry. Airlines compete principally in terms of ticket price, service, frequency, punctuality, safety, brand recognition, passenger loyalty and other service-related issues. The Company competes with a number of other airlines, principally SAS on domestic routes in Norway and Sweden, and other operators including but not limited to KLM, British Airways, and Ryanair on international routes from Norway and Sweden. Many of these competitors are larger companies and have both greater resources and enjoy stronger brand recognition internationally.

In addition, new airlines have emerged during the COVID-19 pandemic. In November 2020, Wizz Air launched domestic flights in Norway with a limited number of scheduled flights but have expressed ambitions to increase the production in 2021. Flynor, a new Norwegian based low-cost carrier with a primary focus on the Norwegian domestic market, have announced that its first flight will be 30 June 2021 and expect to open ticket sales in May. There has also been a second new Norwegian airline company that has emerged, Norse Atlantic Airways. Norse Atlantic Airways plans to operate in the low-cost long-haul market, but no guarantee can be given that it will not expand in the short-haul market as well. The competitive environment of the Company has consequently changed compared to pre-COVID-19, and it is difficult to foresee how this new competition and potential competition will affect the Company's prospects. The Company has a strong market position, being one of the largest low-cost carriers in the world with significantly lower costs than many competitors. However, Competitors may, depending on the development of related costs going forward, such as lease terms, be able to have an even lower cost base than the Company and accordingly be able to operate at commercially more attractive terms than the Company, which may have a material adverse effect on the Company's business, financial condition, operating result and future prospects.

3. GENERAL INFORMATION

3.1 The approval of this Registration Document by the Norwegian FSA

The Norwegian FSA has reviewed and approved this Registration Document, as competent authority under the EU Prospectus Regulation. The Norwegian FSA only approves this Registration Document as meeting the standards of completeness, comprehensibility and consistency imposed by the EU Prospectus Regulation, and such approval should not be considered as an endorsement of the issuer or the quality of the securities that are the subject of this Registration Document. This Registration Document was approved by the Norwegian FSA on 6 May 2021. This Registration Document has been published in an English version only and is valid for twelve (12) months from the date of approval.

The Registration Document has been drawn up as part of a simplified prospectus in accordance with Article 14 of the EU Prospectus Regulation.

Investors should make their own assessment as to the suitability of investing in the securities.

3.2 The Restructuring

In the face of the significant challenges presented by the ongoing COVID-19 pandemic, the Company has undergone significant restructuring in 2020, and has as of the date of this Registration Document converted a total of approximately NOK 15.31 billion of debt obligations into equity, in addition to securing NOK 3 billion of state aid and attracting a private placement in the amount of NOK 400 million. For more information on this “Phase 1” restructuring, see the heading “*The Phase 1 Restructuring*” in Section 4.7 below.

Furthermore, following the increase in global coronavirus cases and deaths since early June 2020 and the resulting re-imposition of measures aimed at curtailing the spread of the disease, together with the Norwegian government’s announcement on 9 November 2020 that it would not for the time being offer further state aid to the Group, the Company and certain of its Irish subsidiaries have entered into a court-supervised reconstruction process in Ireland (being the Examinership) and the Company has entered into a supplementary court-supervised process in Norway (being the Reconstruction), with the aim of reducing the Group’s fleet of aircraft and right-sizing its balance sheet and operations. In parallel with the Examinership and Reconstruction processes, the shareholders at the EGM held on 17 December 2020 approved significant capital increase authorisations in connection with possible conversions of debt to equity and a possible public offering, and in addition granted the Board wide general authorisations to issue shares and convertible instruments.

Based on certain initial proposals formulated by the Company, and following the Irish High Court’s decision on Friday 5 March 2021 in respect of the repudiation of certain contracts, Mr Kieran Wallace of KPMG Ireland as examiner of the Company and a number of its Irish subsidiaries proposed schemes of arrangement for the financial restructuring the Company and such Irish subsidiaries, which in the case of the Company is to be implemented through both the Examinership and Reconstruction (being the Restructuring Proposal). The Restructuring Proposal provides, among other matters, that the Company shall raise at least NOK 4.5 billion in new capital (by way of issuance of shares and certain convertible hybrid instruments), and further provides for unsecured creditors to receive a dividend equal to 5.0% of such creditor’s unsecured claim comprising a cash element and a convertible debt claim in full and final satisfaction of such unsecured creditors’ claims. The Restructuring Proposal has been approved by a requisite proportion of the Company’s creditors in both the Examinership and Reconstruction, and was sanctioned by the High Court of Ireland on 26 March 2021 (appeal period ended 26 April 2021) and Oslo City Court on 12 April 2021 (appeal period will end 12 May 2021). The Restructuring Proposal will take full effect when certain conditions precedent in the Examinership and Reconstruction have been satisfied, including that the Capital Raise is closed. For more information on the Restructuring Proposal, see the heading “*The Restructuring Proposal*” in section 4.7 below.

Following the refinancing and restructurings already carried out in 2020, and the ongoing restructuring process, past performance of the Group may have limited guidance and significance with respect to its future operations, performance and financial position.

Once travel restrictions lift, Norwegian plans to ramp-up operations to a peak of around 50 short-haul aircraft in 2021 and around 70 short-haul aircraft in 2022. Norwegian's long-haul operations will not resume. It is not expected that demand for short-haul travel in Europe will return to 2019 levels before 2023 or 2024 and so Norwegian will deploy capacity back into the market at a pace that matches this. When conditions normalise, Norwegian will serve its four core source markets of Norway, Denmark, Sweden and Finland with a balance of intra-Nordic and domestic routes and routes to key cities and popular leisure destinations across Europe.

3.3 Industry and market data

This Registration Document contains statistics, data, statements and other information relating to markets, market sizes, market shares, market positions and other industry data pertaining to the Group's business and the industries and markets in which it operates. Unless otherwise indicated, such information reflects the Group's estimates based on analysis of multiple sources, including data compiled by professional organizations, consultants and analysts and information otherwise obtained from other third-party sources, such as annual and interim financial statements and other presentations published by listed companies operating within the same industry as the Group, as well as the Group's internal data and its own experience, or a combination of the foregoing. Unless otherwise indicated in this Registration Document, the basis for any statements regarding the Group's competitive position is based on the Company's own assessment and knowledge of the market in which it operates.

The Company confirms that where information has been sourced from a third-party, such information has been accurately reproduced and that as far as the Company is aware and is able to ascertain from information published by that third-party, no facts have been omitted that would render the reproduced information inaccurate or misleading. Where information sourced from third parties has been presented, the source of such information has been identified. The Company does not intend, and does not assume any obligations to, update industry or market data set forth in this Registration Document.

Industry publications or reports generally state that the information they contain has been obtained from sources believed to be reliable, but the accuracy and completeness of such information is not guaranteed. The Company has not independently verified and cannot give any assurances as to the accuracy of market data contained in this Registration Document that was extracted from these industry publications or reports and reproduced herein. Market data and statistics are inherently predictive and subject to uncertainty and not necessarily reflective of actual market conditions. Such statistics are based on market research, which itself is based on sampling and subjective judgments by both the researchers and the respondents, including judgments about what types of products and transactions should be included in the relevant market.

As a result, prospective investors should be aware that statistics, data, statements and other information relating to markets, market sizes, market shares, market positions and other industry data in this Registration Document, and projections, assumptions and estimates based on such information may not be reliable indicators of the Group's future performance and the future performance of the industry in which it operates. Such indicators are necessarily subject to a high degree of uncertainty and risk due to the limitations described above and to a variety of other factors, including those described in Section 1 "Risk factors" and elsewhere in this Registration Document.

4. PRESENTATION OF THE GROUP

Information in this Section 4 generally gives a description of the Group prior to the outbreak of COVID-19. Since then, the Company and its operations have severely been impacted by COVID-19 and consequences thereof. The Group has inter alia cancelled most of its flights and grounded most of its aircraft, lost most of its revenues, temporarily laid-off most of its employees, terminated its agreements with Boeing, several subsidiaries have initiated insolvency proceedings and the Company is currently subject to Examinership in Ireland and Reconstruction process in Norway - as further described in this Registration Document and in the Securities Note dated 6 May 2021 and the Summary dated 6 May 2021. Consequently, the Group's business as described herein may be adversely affected by the current restructuring process, and the future business and operations of the Group - both in nature and size - may be adversely changed from what is described in this Section 4. The future of the Group, its business, operations and performance are therefore highly uncertain. This Section 4 must therefore be read with the aforementioned background, and also in conjunction with other information in the Registration Document and said Securities Note, in particular the sections "Risk Factors".

4.1 Introduction

The Company is the ultimate parent company of the Group, and the business of the Group is carried out in the Company and the Company's subsidiaries, as further detailed in this Section 4 "Presentation of the Group". The Group includes 66 fully or partially owned subsidiaries.

4.2 Corporate information about the Company

The Company's legal and commercial name is Norwegian Air Shuttle ASA. The Company was incorporated on 22 January 1993. The Company is registered in the Company Register under business register no. 965 920 358 and its LEI is 549300IEUH2FEM2Y6B51. The Company is regulated by the Norwegian Public Limited Liability Companies Act (in Nw.: "allmennaksjeloven") (the "Public Limited Liability Companies Act") and supplementing Norwegian laws and regulations.

As at the date of this Registration Document, the Company has a fully paid share capital of NOK 4,205,247.20 divided into 42,052,472 Shares, each with a par value of NOK 0.10.

The Company has one class of Shares in issue, and all Shares have equal rights, meaning that all the Shares rank in parity with one another and carry one vote per share.

The Company's registered office address is at:

Oksenøyveien 3
1366 Lysaker
Norway

The Company's place of business is at:

Oksenøyveien 3
1336 Lysaker
Norway

The Company's postal address is:

P.O. Box 115
1330 Fornebu
Norway

The Company may be reached via tel. +47 67 59 30 00, and its website is www.norwegian.com. The information at www.norwegian.com does not form part of the Prospectus unless that information is incorporated by reference into the Prospectus.

4.3 Overview of the Group and the business areas

Introduction

The Company's business is defined in paragraph 3 of its Articles of Association, which states that:

"The Company's objective is to be engaged in aviation, other transport and travel related business activities as well as activities connected therewith. The Company may also directly or indirectly be engaged in other forms of internet-based provision of goods and services, including car-rental, hotel booking, payment services, financial services and services related to credit cards. Participation in such activities as mentioned may take place through co-operation agreements, ownership interests or by any other means."

The Group consists of the parent company, NAS, and its directly or indirectly owned subsidiaries in Norway, Sweden, Ireland, Spain, Latvia, United States and United Kingdom. At the end of 2020, the Company and its subsidiaries employed 6,365 staff at 26 operational bases in 11 countries across four continents. During 2020 the staff was reduced to 6365 employees from 9,388 a year ago through layoffs and base closures. See section 4.7, subsection "the Restructuring Proposal" for further information about further anticipated downsizing of the Group's business, operations and workforce, as well as other effects of the ongoing Examinership and Restructuring process. This reorganising will also include alignment of the legal structure to the Group's business operations, hereunder the number of AOCs'. The legal and operational structure as presented herein is accurate as of the date of this prospectus, but changes to the legal structure during 2021 should be expected. The Group does not report profit per entity, as the Executive Management considers the business as one operating segment, which is low-cost air passenger travel. The Group's operating profit comes from airline-related activities and the aircraft fleet is the Group's main revenue generating asset, which is utilized across the Group's geographical segment.

The Group has organized its operations and different functions into several entities to ensure international growth and necessary traffic rights in line with the strategy. The goal is to build an organizational structure that maintains the Group's flexibility and adaptability when growing and entering into new markets. As of the date of the Prospectus the Group is divided into the following business areas:

- Network, Pricing & Optimisation
- Operations
- Marketing, Sales and Customer Care
- Products & Digital Development
- Support functions

¹: The recruitment of Adrian Dunne is announced, but Mr. Dunne will formally begin in Norwegian at a later unconfirmed date. Johan Gauer mann continues to serve as interim in this role.

Network, Pricing and Optimisation

The objective for the business area is to optimize the P&L for the airline through network, pricing and operations planning. This is achieved through the development of the network strategy and allocation of aircraft not just for the commercial production, but also cargo and charter, through ongoing route management.

Great focus given to airline planning, which is broken down into fleet, and operations planning, schedule development, slot strategy and crew resourcing optimization.

Product and Digital Development

The business area primary objective is to deliver great user experiences across digital and physical touchpoints, and to maximize value from ancillary products, inflight sales, partnerships and loyalty program. Products & Digital development was introduced to increase focus on revenue development of ancillary services as important contributor to the business plan, to consolidate management and development of all products in one unit, and to ensure that Norwegian is delivering a friction-free and personalized user experience across the travel journey. By combining products with digital development, we aim to increase focus on the digital customer experience and to position Norwegian as a digital leader in the travel industry.

The business area consists of the following areas:

- Product Management; Secure great product experiences for travel ancillaries, drive revenue growth, and introduce new products and concepts in the marketplace
- Loyalty & Memberships: Secure a profitable and industry-leading Reward program with almost 10 million members and maximize revenues from partnerships.
- In flight Retail: Deliver an attractive product offering and inflight experience and build a profitable retail operation in the air.
- Digital channel development: Develop conversion-oriented, friction free and best in class user experiences.

Marketing, Sales and Customer Care

The business area seeks to optimize sales distribution and marketing in all channels, drive the e-commerce operation and take care of our customers with timely and high-quality information in order to attract, engage and support customers throughout the entire customer journey.

An important aspect is managing and developing the brand with a focus on aligning brand efforts across the business to maximize investment and marketing impact while reducing costs. Developing a strong and consistent brand across the business supports Norwegian's aim to deliver positive customer experiences worldwide.

Operations

At year-end 2020, Norwegian had five airline operators in four different countries, each holding a unique national air operator's certificate (AOC). Each AOC is under the supervision of the civil aviation authorities in their respective country. The AOCs exist to give the Norwegian Group broad market access, however the Company is in the process of evaluating and implementing a new AOC structure based on the new business plan.

Norwegian's commercial airline activities have been operated through local bases in the following countries: Norway, Sweden, Denmark, Finland, United Kingdom, USA, Italy, Spain and France. The base structure will also be consolidated as a result of the new business plan.

Red Handling carries out ground handling services and is established in the UK and Spain. Red Handling UK Ltd. provides ground handling services at London Gatwick Airport (LGW) and Red Handling Spain S.L provides ground

handling services at Barcelona Airport (BCN), Alicante Airport (ALC), Palma de Mallorca Airport (PMI), Málaga Airport (AGP) and Las Palmas Airport (LPA).

The Group's commercial airline activities are organized in the following entities:

- Norwegian Air Shuttle ASA ("NAS"), based at Fornebu, Norway;
- Norwegian Air International Limited ("NAI") based in Dublin, Ireland, wholly owned by NAS;
- Norwegian UK Limited ("NUK") based in London, United Kingdom, wholly owned by NAS;
- Norwegian Air Norway AS ("NAN") based at Fornebu, Norway, wholly owned by NAS; and
- Norwegian Air Sweden AB ("NSE") based at Arlanda, Sweden, wholly owned by NAS.
- Norwegian Air Shuttle AOC AS ("NAS2") based at Fornebu, Norway, wholly owned by Norwegian Air AS
- Norwegian Air Sweden AOC AB ("NSE2") based at Arlanda, Sweden, wholly owned by Norwegian Air AS²

Each of the abovementioned Group Companies holds an AOC in their respective locations.

For information regarding the Group's restructuring during 2020, please refer to Sections 3.2 and 4.7.

The Company made several changes to its route portfolio as well as adjusted its capacity, as previously communicated. As a result, several routes and bases in Europe and the United States have been discontinued. The Company has closed down its bases in Edinburgh (EDI) in Scotland; Dublin (DUB) in Ireland; Palma de Mallorca (PMI) and Madrid (MAD) in Spain; Amsterdam (AMS) in the Netherlands; in Rome Fiumicino (FCO) in Italy; the long-haul base in Copenhagen (CPH) in Denmark; Bangkok (BKK) in Thailand; and Stewart (SWF) and Providence (PVD) in the United States. In addition, the Company no longer bases long-haul pilots in the United States.

On 2 September 2019, the Company summoned bondholders to amend certain terms and conditions of the outstanding bonds NAS07 and NAS08. In exchange for an extension of approximately two years, unsecured bondholders were offered, inter alia, a pledge over all shares in NAN. As a part of the offering, all the Group's take-off and landing slots at London Gatwick Airport were placed under NAN's ownership through its wholly owned subsidiary NAS Eire Invest AS, providing asset backing for bondholders. All but one of the Group's aircraft leased by NAN were transferred to other subsidiaries of the Company, as these aircraft were not a part of the offered security package. One aircraft remains under NAN's leasehold to uphold AOC requirements.

Support Functions

The Group has four important support functions: Finance & Control, People, IT & Business Services and Communications & Public Affairs.

The Finance & Control business area oversees the Group's asset companies, which are organized in a set of subsidiaries based in Dublin, Ireland. Arctic Aviation Asset DAC is the parent company. The business area handles aircraft financing, leasing, and ownership. Arctic leases aircraft to both Norwegian's own operations and external airlines.

Assets and Financing

Aircraft Assets and Financing

The Group's Aircraft Assets activities are organized in a group of subsidiaries based in Dublin, Ireland. Arctic Aviation Assets DAC ("AAA"), which is based in Dublin, Ireland and wholly owned by NAS, is the parent company. Wholly owned subsidiary entities of AAA are (all of which are based in Ireland):

² Dormant company, pending approval of AOC by Swedish CAA

- Oslofjorden Limited;
- Drammensfjorden Leasing Limited;
- Geirangerfjorden Limited;
- Boknafjorden Limited*;

- Trollfjorden Limited;
- Tufjorden Limited; and
- Ilfjorden Limited**

**no longer owns or leases aircraft*

***has not conducted any activities*

****placed under liquidation*

On 24 October 2019, the Company announced the formation of a joint venture with CCB Leasing (International) Corporation DAC (“CCBLI”). CCBLI is a wholly owned subsidiary of China Construction Bank Corporation (CCB), an industry leader in banking, financial services and leasing, and the world’s second largest bank by asset value. CCBLI is the majority owner of the joint venture with a 70 percent share, while the Company, through its wholly owned subsidiary AAA, holds the remaining 30 percent. The purpose of the joint venture is to finance, own and lease aircraft. Three aircraft are currently delivered and on lease with a third-party operator.

People & Services

The Group's crew, airline and crew support and administrative functions are mainly organized within or through companies in the business area "People & Services" and provide services across the Group's business areas.

Fully owned country specific resource "People and Services" companies have been established, with the intention of offering permanent local employment to hired pilots, etc.

The resource ("People & Services") companies include:

- Norwegian Air Resources Limited (Fornebu, Norway) (100%)*;
- Norwegian Air Resources Shared Service Center AS (Fornebu, Norway) (100%);
- Norwegian Air Resources Shared Service Center US (Maryland, USA) (100%)³;
- Norwegian Pilot Services Norway AS (Fornebu, Norway) (100%);
- Norwegian Cabin Services Norway AS (Fornebu, Norway) (100%);
- Norwegian Air Resources Sweden AB (Stockholm, Sweden) (100%);
- Norwegian Air Resources Ireland Ltd (Dublin, Ireland) (100%)*;
- Norwegian Training Academy AS (Fornebu, Norway) (100%);
- Norwegian Air Resources 1 AS (Fornebu, Norway) (100%);
- Norwegian Air Resources Spain S.L. (Madrid, Spain) (100%);

**placed under liquidation during spring 2021*

During April 2020, the boards of the following companies filed for bankruptcy:

- Norwegian Pilot Services Sweden AB
- Norwegian Pilot Services Denmark Aps
- Norwegian Cabin Services DK Aps
- Norwegian Air Resources DK LH ApS

The process of the subsidiaries filing for bankruptcy is now being managed by bankruptcy courts and bankruptcy trustees in the respective countries. See section 11.1.1 “Examinership and Reconstruction” and section 4.7 and subsection “the Restructuring Proposal” for further information relating to the ongoing Examinership and Reconstruction process.

The following three subsidiaries has entered into separate reconstruction processes in Norway, trying to restructure its debt in order to be able to continue to operate:

- Norwegian Air Resources Shared Service Center AS (Fornebu, Norway) (100%)

³ Dormant

- Norwegian Pilot Services Norway AS (Fornebu, Norway) (100%);
- Norwegian Cabin Services Norway AS (Fornebu, Norway) (100%);

4.4 Legal structure

The following legal structure aligns with the Group's model as of 6 May 2021:

4.5 Brief history and development

| Date | Historic events and development |
|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 22 January 1993 | <ul style="list-style-type: none"> The Company was incorporated. |
| 1993-2002 | <ul style="list-style-type: none"> The Company operated as a subcontractor to the regional activities of Braathens S.A.F.E. on the west coast of Norway with a fleet of Fokker F-50 aircraft. |
| September 2002 | <ul style="list-style-type: none"> Following SAS' acquisition of Braathens S.A.F.E, and the termination of the Company's west coast operation, the Company started its low-cost operations through the launch of domestic routes in Norway with a fleet of six Boeing 737-300 aircraft. |
| 18 December 2003 | <ul style="list-style-type: none"> The Company listed the shares on Oslo Børs and raised NOK 250 million through the issuance of 7,812,500 new shares. The offering was oversubscribed. |
| 2004 | <ul style="list-style-type: none"> The Company initiated codeshare agreements with each of FlyNordic and Sterling. The codeshare agreement with FlyNordic involved the Stockholm - Oslo route, whereas the agreement with Sterling involved codeshare agreements on thirteen of the Company's European routes from Norway. |
| 2004-2006 | <ul style="list-style-type: none"> The codeshare agreement with FlyNordic involved the Stockholm - Oslo route, whereas the agreement with Sterling involved codeshare agreements on thirteen of the Company's European routes from Norway. |
| 2005 | <ul style="list-style-type: none"> The Company reached a milestone with the first year in profit. The Company showed a revenue growth of 63 percent, growing its annual revenue to NOK 1,972 million from NOK 1,210 million in 2004. |
| 2006 | <ul style="list-style-type: none"> The Company continued its focus on expanding its business activities further, among others with the establishment of a Polish subsidiary and base in Warsaw, and with the commencement of flights from Warsaw to five European cities in 2006. |
| 2007 | <ul style="list-style-type: none"> The Company acquired FlyNordic from Finnair in order to strengthen its position in the Nordic and European markets. The Company decided to locate its Swedish base in Stockholm. In order to obtain emission reductions and significant bottom line savings, the Company placed an order with Boeing in the third quarter of 2007 to buy 42 737-800 aircraft. The aircraft was considerably more environmentally friendly than the existing fleet of the Group at that time. |
| October 2007 | <ul style="list-style-type: none"> The online bank, Bank Norwegian AS ("Bank Norwegian"), was established, and the frequent flyer program Norwegian Reward was launched. Norwegian Reward enabled the customers to earn so called cash points on Bank Norwegian credit card transactions, which could be used to purchase plane tickets. |
| 2008 | <ul style="list-style-type: none"> The Company increased its footprint as an environmentally conscious airline through delivery of its first Boeing "Next Generation" (NG) 737-800 aircraft. The new aircraft reduced Fuel Consumption and emissions by more than 20 percent, while passenger capacity increased from 148 to 186/189. The Company's operation was further expanded through the launch of a new base at Rygge, outside Oslo, with 14 routes in service. Following the bankruptcy of Sterling, the Company entered the Danish market through the opening of its Copenhagen base. |
| 2009 | <ul style="list-style-type: none"> The Company took delivery of the first Company-owned Boeing 737-800, and the aircraft commenced commercial operation in September 2009. The Group also expanded extensively in Denmark by launching 39 new routes, while the number of Copenhagen-based planes increased from seven to nine. |

| Date | Historic events and development |
|------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2009 | <ul style="list-style-type: none"> • 2009 also marked the best year since the Company was established, and the Company presented an annual profit after tax exceeding NOK 446 million, while passenger figures showed a considerable growth; approximately 10.8 million passengers flew with the airline in 2009, up 18 percent compared to 2008. |
| 2010 | <ul style="list-style-type: none"> • The Group further continued its fleet growth and confirmed an order of an additional 15 737-800s from Boeing for delivery between 2014 and 2016. The order was added to the Group's existing order of 48 737-800s from Boeing that was delivered up until 2014. • The Company was voted the second-best airline in Northern Europe and the third best low-cost airline in Europe, according to a SkyTrax survey. More than 18 million travelers from 100 different countries participated in the survey in the period July 2009 - April 2010. |
| 2011 | <ul style="list-style-type: none"> • The Company began to offer in-flight WiFi on European routes, being the first airline to offer such service. The free-of-charge offer was well received by the passengers, and by the end of 2012, the entire fleet of 737-800s had WiFi. • The Company continued its expansion plans further by the opening of a new base at the Helsinki Airport, and a launch of domestic routes and eleven international routes in Finland. Approximately one million Finnish passengers travelled with the Group in 2011. • The Group's fleet renewal program continued in 2011, with the agreement to purchase three Boeing 787-8 Dreamliners, the lease of one additional Dreamliner and the purchase of 15 737-800s from Boeing, in addition to the existing order of 63 737-800s. |
| 2012 | <ul style="list-style-type: none"> • The Group signed one of the largest ever agreements in European aviation history, through an order of 222 aircraft from Boeing and Airbus. The order comprised 22 Boeing 737-800, 100 Boeing 737 MAX 8 and 100 Airbus A320neo. The Group further secured an additional two Boeing 787-8 Dreamliners for its long-haul operations, which secured a delivery of a total of eight 787-8 Dreamliners. |
| 2013 | <ul style="list-style-type: none"> • The Group officially launched its long-haul offering in 2013, through the launch of routes between Oslo - New York and Oslo - Bangkok, in addition to Fort-Lauderdale - Copenhagen, Oslo and Stockholm and Bergen - New York. All routes are operated with the Dreamliner. • To add on its long-haul strategy, the Group signed a contract to lease two new 787-9 Dreamliner for delivery in the first quarter of 2016. • NAS was further awarded "Best European Low-Cost Carrier" by Skytrax⁴, and "Best Inflight Connectivity and Communications" by APEX (Airline Passenger Experience Association)⁵ for its free WiFi on board. |
| 2014 | <ul style="list-style-type: none"> • The Group was granted an Irish AOC for its subsidiary NAI, which is based in Dublin. • The Group further continued its expansion through the establishment of four new bases, Barcelona and Madrid in Spain and Fort Lauderdale and New York in North America. • The Company took delivery of 18 new aircraft during the year, including 14 new 737-800s and four 787-8 Dreamliners. • For the second year in a row, the Company was awarded "Best Low-Cost airline in Europe" by Skytrax⁶. |
| 2015 | <ul style="list-style-type: none"> • The Group further took delivery of ten new aircraft and signed a letter of intent to lease out twelve of its new Airbus A320neos for twelve years, which were delivered from 2016 and will continue to be delivered in the coming |

|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2016 | <p>years. In September 2015, the Group added 19 new 787-9 Dreamliners to its order book, increasing the number of Dreamliners ordered in 2015 to 21 and the total fleet of Dreamliners to 38 when all are delivered.</p> <ul style="list-style-type: none"> • The Group launched several new routes, including domestic routes in Spain, winter routes in the Caribbean as well as direct flights from London to Boston. • In addition, the Company received two international awards, including "Best Low-Cost airline in Europe" (three years in a row) and "World's best Long-Haul Low-Cost airline", both from SkyTrax⁷. <ul style="list-style-type: none"> • The Group added 17 new 737-800 aircraft and four 787-9 Dreamliners to operations. Further, the Group took delivery of the first two Airbus A320neos which were to be leased out. In terms of aircraft orders, the Company converted orders of 30 A320neo into A321LR (long range) aircraft. • The long-haul expansion continued, with start-up of routes between the US and Paris and several other routes. • Norwegian Air Resources AS entered into a joint venture with OSM Aviation to form a leading, full-service crew management company. • Again, the Group was approved by its customers by being awarded the "World's Best Long-Haul Low-Cost Airline" from Skytrax⁸. |
| 2017 | <ul style="list-style-type: none"> • 17 new Boeing 737-800, six 737 MAXs and nine 787-9 Dreamliners were delivered in 2017. Additionally, three new Airbus A320neos were delivered for leasing to HK Express. The Group divested eleven Boeing 737-800s on sale leaseback, took delivery of six Boeing 737 MAX 8s, four Boeing 787-9 aircraft and two Airbus A320neos. • Recognized as the prestigious "Best Low-Cost Long-Haul Airline" for the third time and the "Best Low-Cost Airline in Europe" for the fifth consecutive year, both by Skytrax⁹. • The US Department of Transportation approved NUK's application for a foreign carrier permit. • Entered into a total return swap agreement for a portion of its share in Norwegian Finans Holding ASA (the parent company of Bank Norwegian) as part of its strategy to eventually reduce its exposure toward the bank. • Some services were affected in summer 2017 as long-term planning and crewing issues created challenges, but these were thoroughly addressed to ensure the Group was in a stronger position for the summer of 2018. • Norwegian Pilot Services and the Norwegian Pilot Union agreed locally on the framework for a new three-year collective labor agreement. The agreement will provide the Group with predictability and stability during the period. |
| Q1 2018 | <ul style="list-style-type: none"> • The Company successfully completed a tap issue of EUR 65 million in the outstanding EUR 185 million senior unsecured bond issue "NAS07". The Company also completed a private placement of new shares raising NOK 1.3 billion and a subsequent offering of NOK 200 million. • The Company and Widerøe signed an interline agreement, including all Widerøe's Public Service Obligation routes in Norway and the Company's domestic routes in Norway. The flights are available for purchase through Widerøe's channels. • NAA received the AOC from the National Government of Argentina. The Argentine Government granted NAA concessions to operate more than 150 domestic and international routes, opening the door to considerable future growth in South America. • The Company took delivery of its last Boeing 737-800 and six 787-900s. • The Company was made aware that the European aviation group International Airlines Group had acquired 4.61 percent of the Shares in NAS, |

| 21 January 2021 | <ul style="list-style-type: none"> The government of Norway announced that it has decided to support and contribute to the airline's funding of new capital, pending certain conditions. |
| 11 March 2021 | <ul style="list-style-type: none"> Following the Irish High Court's decision on Friday 5 March in respect of the repudiation of certain contracts, Mr Kieran Wallace of KPMG Ireland as Examiner of the Company and a number of Irish subsidiaries of the Group has proposed schemes of arrangement for the financial restructuring of the Examinership Companies, which in the case of the Company will be implemented through the Norwegian reconstruction processes. |
| 12 April 2021 | <ul style="list-style-type: none"> The Norwegian Reconstructor, Håvard Wiker at Ro Sommernes advokatfirma DA, reported that the Reconstruction proposals were approved by a majority of the creditors of the Company. The judge of the Oslo Byfogdembete has approved the scheme for an exit of the Reconstruction of the Company. |
| 14 April 2021 | <ul style="list-style-type: none"> The Board of Directors of Norwegian announced that the Capital Raise will be increased to a minimum NOK 4.5 billion up to NOK 6.0 billion, including a New Capital Perpetual Bonds with gross proceeds of up to NOK 1,875 million and a Rights Offering directed to the shareholders as of the record date with gross proceeds of up to NOK 400 million. The blended issue price in the Capital Raise will be set to maximum NOK 6.99 per share. |
| 26 April 2021 | <ul style="list-style-type: none"> The judge of the Irish High Court formally approved the scheme of arrangements following the expiration of the appeal period. |
| 28 April 2021 | <ul style="list-style-type: none"> The United States Bankruptcy Court of the Southern District of New York granted the recognition motion of Norwegian Air Shuttle ASA and Arctic Aviation Assets DAC pursuant to chapter 15 of the US Bankruptcy Code. Both companies are hereby entitled to protection afforded under the Bankruptcy code and the order recognizes the Examinership Proceedings and Reconstruction Proceedings in Ireland and Norway. |
| 3 May 2021 | <ul style="list-style-type: none"> The Company announced terms of the contemplated Capital Raise of up to NOK 6,000 million. |

4.6 Business overview

4.6.1 Introduction

The Company was founded in 1993 but began operating as a low-cost carrier with Boeing 737 aircraft in 2002. Historically the Group has constantly introduced brand new aircraft to its fleet, launched new routes and established new bases in Europe, Asia and the US.

The Group has been one of the largest low-cost carriers in the world¹⁰ with a vast domestic route network in Norway, Sweden, Denmark and Finland, as well as a wide range of routes between Scandinavia and the European continent, Thailand, the Middle East and the US In 2019.

The Group's fleet of 131 aircraft as of 31 December 2020 is very modern and environmentally friendly. As per the date of this Registration Document, the Group has none aircraft on firm order.

¹⁰ Source: CAPA - Centre for Aviation, airline company traffic reports (<https://centreforaviation.com/analysis/reports/europe-airline-groups-2018-ranking-lufthansa-group-still-at-the-top-456098>)

The Group has implemented a customer loyalty program (Norwegian Reward) in cooperation with the online bank, Bank Norwegian AS. Customers earn "CashPoints" for purchasing airline tickets with the Group or for staying at a hotel or shopping at one of the partners of the program. Norwegian Reward surpassed ten million members in September 2019.

See section 4.7 for further information relating to effects for the Group's business, operations and workforce resulting from the ongoing Examinership and Reconstruction process.

4.6.2 Fleet

At the end of 2020, the Group's fleet comprised of 131 aircraft of which 55 are owned and 76 are leased. The Group has none aircraft on order as per the date of this Registration Document. In connection with the Restructuring, the long-haul operations are abandoned and the fleet is reduced to 51 aircraft of which 4 are owned and 47 are leased. As of date of the prospectus the Company has negotiated and signed agreements for 4 owned and 44 leased aircraft. An additional 3 aircraft are under documentation to be retained and leased. See also section 4.7.

The aircraft fleet is pledged as security for the Company's secured debt.

Boeing 737-800

The Boeing 737-800 serves the routes in the Company's short-haul network. The fleet of Boeing 737-800 aircraft offers good legroom for the passengers, while most of the aircraft feature the sleek Boeing Sky Interior, free in-flight WiFi and live TV.

Facts about the Group's Boeing 737-800:

- 186 / 189 seats
- Two pilots and four cabin crew members
- Two CFM 56-7B26 engines
- Max start weight: 78,999kg
- Length: 39.5m
- Height: 12.5m
- Wingspan: 35.8m
- Thrust: 26,400lbs per engine
- Cruise speed: 858kph
- Winglets

4.6.3 Flight operations

The Group's organizational model is continuously being developed to support the delivery of the long-term strategy.

Allocating aircraft on a commercially attractive route network relies heavily on traffic rights. To be competitive in the dynamic nature of the industry, the Group must have broad market access and flexibility to reallocate. However, a vast number of bilateral and multilateral transportation agreements regulate commercial airlines' right to fly between different countries.

The solution to this obstacle is a multiple airline model within the same Group, where each airline holds a national AOC. An AOC is an operational and technical approval issued by a country's Civil Aviation Authority; the approval grants the holder the right to conduct commercial flights.

The decision to establish several airlines within the Group was made in 2013. Currently, the Group consists of six different airlines each holding a national AOC that form an internal alliance and together ensures a much

broader market access than with only a single AOC. The number of AOC will be aligned with the groups business plan.

The Group has been granted three AOCs by the Civil Aviation Authority in Norway, NAN, NAS2 and the Company.

The Group has also been granted an Irish AOC for its subsidiary NAI, which is based in Dublin. The Group's UK subsidiary based in London, NUK, holds a UK AOC. Finally, the Swedish subsidiary, NSE, was granted a Swedish AOC in November 2018¹¹.

The abovementioned AOCs are valid for as long as the company holding the AOC complies with the conditions for holding the AOC. The holder of the AOC is subject to regular review and inspection from the national civil aviation authority. The costs to obtain and maintain an AOC are substantial, but the Group is organized and equipped to ensure compliance with the conditions for its AOCs.

In addition, the Group has agreements with all relevant airports for the operation of its routes.

As of the date of the Prospectus, the existing AOCs are sufficient to cover the Company's existing business plan. A continuous assessment of the AOCs structure is conducted as part of the management of the Company.

4.6.4 Aircraft maintenance

The Boeing 737 fleet is operated by the Company (NAS) and its wholly owned subsidiaries NAN, NAI, and NSE.

Each individual operator has its own AOC with its respective civil aviation authority oversight and approval. Each AOC must have a civil aviation authority approved maintenance organization (CAMO) and maintenance program (AMP).

Major airframe as well as workshop maintenance is performed by external sources subject to approval by the European Aviation Safety Agency ("EASA") and by the national aviation authorities.

Airframe (base) maintenance for the 737 fleet is currently carried out by Lufthansa Technik in Budapest, Hungary. Lufthansa Technik is undertaking engine and component workshop maintenance.

All maintenance, planning and follow-up activities, both internally and externally, shall be performed according to both the manufacturers' requirements and additional internal requirements, and in compliance with international authority regulations. The Group carries out initial quality approval, as well as continuously monitoring all maintenance suppliers.

All supplier contracts are subject to approval and monitoring by the national aviation authorities.

4.6.5 Traffic development

Due to the travel restrictions and drop in demand following the COVID-19 outbreak in Europe, the Company has since March 2020 reported traffic figures based on flow passengers. In 2020, 6.9 million passengers travelled with the Group, compared to 36.2 million in 2019. The 29.3 million decrease in passengers represent a relative

| December | Dec-20 | Dec-19 | Change |
|--------------------------|-----------|------------|------------|
| ASK (million) | 153 | 6,310 | -98 % |
| RPK (million) | 80 | 5,279 | -98 % |
| Load factor | 52.3 % | 83.7 % | -31 p.p. |
| Passengers | 129,664 | 2,170,667 | -94 % |
| Traffic 12-month rolling | Dec-20 | Dec-19 | Change |
| ASK (million) | 18,168 | 100,031 | -82 % |
| RPK (million) | 13,680 | 86,616 | -84 % |
| Load factor | 75.3 % | 86.6 % | -11.3 p.p. |
| Passengers | 6,873,591 | 36,195,470 | -81 % |

¹¹ In addition, the group have applied Swedish CAA for an AOC on NSE2.

decrease of 81 percent. Production (ASK) fell by 82 percent and passenger traffic (RPK) decreased by 84 percent. The Load Factor in 2020 was 75.2 percent, an 11.4 percentage points decrease compared to 2019. The Group utilized every operational aircraft on average 9.8 Block Hours per day, compared to 12.4 during 2019.

4.6.6 Ground handling

Ground handling is the servicing of an aircraft and its passengers while the aircraft is on the ground and parked at terminal gate of an airport. This includes, e.g., ramp services, passenger services, catering, cleaning, screening and safety costs, etc.

Ground handling services at certain airports are handled by the Group, whereas other purchased by the Group from third-party providers. The Group's handling charges have risen during the past years, largely as a result of the Group's growth, but have remained stable in terms of unit cost.

The Group uses Menzies Aviation for the provision of a large part of its ground handling services at a number of the airports from which the Group operates. The Group is not however dependent on any single ground handling service provider (including Menzies Aviation), and the Group purchases handling services from a number of different providers at each airport from which it operates.

4.7 Certain significant factors affecting the business performance

Introduction

Through considerable growth and investments, Norwegian has strived to build a foundation for a sustainable business. Following the strategic change from growth to profitability, the Group's financial performance improved and the Company was well underway to deliver on a positive net profit for 2020 prior to the outbreak of COVID-19. Please see separate sections 5.8 "COVID-19 Impact", section 4.7 "Certain significant recent factors affecting the business performance" and elsewhere in the Prospectus for the impact of the COVID-19 outbreak.

Beyond the COVID-19 outbreak and the ongoing restructuring process, the Group's business and financial performance as well as results of operations have been and will continue to be affected by various factors and trends that affect airlines and their markets generally and also the specific markets and customer bases that the Company targets more specifically.

Generally, the Group's results of operations have been and will continue to be affected by general global economic conditions, and any adverse developments in global economic markets could cause its revenues to decline.

The below significant factors have, as examples, during the periods under review affected the Group's business and financial performance and the Company expects that they will continue to do so. The list is not exhaustive and similar and other factors which may affect the Group's business are described in Section 1 "Risk factors" of this Registration Document.

The Phase 1 Restructuring

On 21 March 2020, in response to the COVID-19 outbreak and its negative economic effects on businesses, the Norwegian government approved certain measures and state aid including, inter alia, a state guarantee scheme pursuant to which the government would guarantee 90% of loans granted to the Company by banks and other financial institutions, amounting to NOK 3 billion of state aid. On 20 May 2020, the Company announced that following its conversion of approximately NOK 12.7 billion of debt to equity, it had satisfied the conditions precedent for obtaining the full amount of support available pursuant to the said state guarantee scheme, and had in addition completed a private placement in the amount of NOK 400 million (for more information, see the Company's prospectus dated 5 May 2020, and the Company's stock exchange notice dated 20 May 2020).

Negotiations with creditors continued throughout Q3 2020, during which time the Company converted a total of approximately NOK 15.31 billion of debt obligations into equity, in addition to the abovementioned NOK 3 billion of state aid and completing a private placement in the amount of NOK 400 million (the “**Phase 1 Restructuring**”).

Lease obligations in a total amount of approximately NOK 9.7 billion (including interest) were converted into approximately 17.9 million conversion Shares at a conversion price of NOK 424.919 per share (the “**Conversion Price**”) and Perpetual Bonds, convertible into approximately 4.9 million new shares at the Conversion Price. Following the Phase 1 Restructuring, the corresponding lease payments were reduced by approximately USD 12 million per month.

Furthermore, a total of NOK 3,581,522,206 (excluding NOK 59,346,376 representing bonds held by the Company) of the Company’s existing bond debt (being NAS07, NAS08 and the Company’s convertible bond issued in November 2019 (“**November 19 Bonds**”) was in May 2020 converted into approximately 8.15 million conversion Shares at the Conversion Price and Perpetual Bonds, convertible into approximately 280,000 new Shares at the Conversion Price (subject to certain Euro-market standard anti-dilution provisions). The conversion amount was based on a net present value calculation of reduced cash flows for the individual bonds following the recapitalization. The principal amount in NAS07, NAS08 and the November 19 Bonds was reduced by NOK 3,142 million on an aggregate basis. In the period from May 2020 to January 2021, approximately NOK 298 million of the Company’s November 19 Bonds were voluntarily converted into approximately 700,000 conversion Shares at the Conversion Price by the holders thereof.

Of the Perpetual Bonds issued to aircraft lessors and existing bondholders as described above, approximately 61% were voluntarily converted into approximately 3.3 million conversion Shares at the Conversion Price by the holders thereof. The remaining Perpetual Bonds outstanding may be converted into approximately 2.1 million Shares (subject to Euro-market standard anti-dilution provisions), however any Perpetual Bonds that are not converted into Shares prior to the effectiveness of the schemes under the Examinership and Reconstruction will be extinguished, with the holders thereof receiving a corresponding creditor dividend, as described further below.

In addition, the Company since May 2020 has entered into agreements with certain of its vendors to convert approximately NOK 1.99 billion in outstanding payables to 468,975,766 conversion Shares at the Conversion Price.

The Restructuring Proposal

Following a limited improvement in conditions in April and May 2020, global coronavirus cases and deaths continued to climb from early June 2020, resulting in re-imposition of measures aimed at curtailing the spread of the disease, including travel and other restrictions that have proven particularly challenging for the Company and the airline industry at large. The Company has been severely and adversely affected by the pandemic, has reported a net loss of NOK 23,040 million for 2020 and is currently in adverse financial distress and subject to the Examinership and Reconstruction processes. In addition, the Company has experienced an 81 percent passenger decline compared to last year and has furloughed additional employees and reduced capacity considerably, leaving only eight to ten aircraft in operation during the winter season.

On 17 November 2020 the Board resolved to seek to downsize its aircraft platform by way of the Examinership. Ireland was chosen as a jurisdiction due to the fact the aircraft assets of the Company are located there. An interim examiner was appointed on 18 November 2020, and on 7 December 2020, the Irish High Court formally accepted the entry of the Company and certain of its Irish subsidiaries into the Examinership.

On 8 December 2020, following formal acceptance of the Company and certain of its Irish subsidiaries into the Examinership, the Company filed for and was accepted into the supplementary Reconstruction.

The Examinership and the Reconstruction are ongoing and impose a global “automatic stay” on creditors. This means that, for the duration of the processes, creditors of the companies subject to the Examinership and

Reconstruction (including the Company) are generally unable to take action to secure payment, and the relevant companies cannot pay or otherwise discharge liabilities (both known and unknown) that are based on events that occurred prior to the commencement of the processes. During the Examinership and the Reconstruction, the Company is able to (and continues to) operate its route network (currently limited due to the COVID-19 situation), and its subsidiary Norwegian Reward AS has temporarily paused earning and use of “Cash-Points” for its members. The Shares and bonds of the Company (including the Perpetual Bonds) continue to trade as normal on the Oslo Stock Exchange (Oslo Børs). The Examinership and Reconstruction processes are as of the date of this Registration Document expected to be completed during Q2 2021 subject to completion of the Capital Raise (as defined below) and certain other conditions, though may be extended.

In parallel with and in support of the ongoing Examinership and Reconstruction, on 17 December 2020, the Company’s shareholders resolved at the EGM to, *inter alia*, (i) implement a reverse split of the Shares in the ratio 100:1, (ii) reduce to nominal value of each Share from NOK 10 to NOK 0.01 to permit the board to issue Shares at a price less than NOK 10, (iii) make a rights issue for issuing up to 800 million new Shares, subject to the discretion of the Board of Directors to amend (within the authorisation provided by the EGM) and/or cancel any such rights issue prior to implementation, (iv) increase the share capital of the Company by minimum NOK 0.01 and maximum NOK 198.67 million by conversion of all of parts of the Group’s senior loans, lease debt, aircraft financing liabilities, Dividend Claims and certain other current and non-current liabilities of the Group into Shares, (v) issue convertible perpetual bonds to converting creditors who cannot hold Shares, and (vi) grant the Board of Directors wide authorizations to issue Shares, convertible loans and loans with interest dependent on the dividends or profits of the Company.

Subsequently, the Board of Directors approved a business plan and proposed term sheet as a potential basis for the restructuring of the Company and relevant Irish subsidiaries through the Examinership and Reconstruction, as announced by stock exchange announcement on 14 January 2021 (the “**Company’s Proposal**”). In the Company’s Proposal, the Company stated that it intended to: (i) focus on its core Nordics business, operating a European short-haul network with narrow body aircraft, (ii) cease operating the Group’s long-haul network, and (iii) through the Examinership and Reconstruction, reduce total debt to below NOK 20,000 million and emerge with a free cash position of approximately NOK 4 - 5 billion. The Company’s Proposal also contained details of a proposed Rights Issue, Private Placement and hybrid bond issuance raising gross proceeds of approximately NOK 4.5 to 5.0 billion.

Based on the Company’s Proposal, and following the Irish High Court’s decision on Friday 5 March 2021 in respect of the repudiation of certain contracts, Mr Kieran Wallace of KPMG Ireland as examiner of the Company and a number of its Irish subsidiaries proposed schemes of arrangement for the financial restructuring the Company and such Irish subsidiaries, which in the case of the Company is to be implemented through the Reconstruction (together the “**Restructuring Proposal**”).

The Restructuring Proposal provides, among other matters, that the Company shall raise at least NOK 4.5 billion by way of (i) a Rights Issue in an amount of up to NOK 400 million, (ii) a Private Placement, and (iii) issuance of a convertible perpetual bond in an amount up to NOK 1.875 billion (the “**New Capital Perpetual Bonds**”, and together with the Rights Issue and the Private Placement, the “**Capital Raise**”).

On 14 April 2021 the Company issued a stock exchange announcement of its intention to increase the Capital Raise to a minimum of NOK 4.5 billion and up to NOK 6.0 billion (from NOK 5.0 billion).

The Restructuring Proposal also provides for each creditor with an unsecured claim to receive a dividend equal to 5.0% of such creditor’s unsecured claim comprising (i) a *pro rata* cash payment from a NOK 500 million “pool” to be distributed among unsecured creditors and customer creditors; and (ii) a convertible debt claim with 7 year maturity and NIBOR +1% interest (“**Dividend Claims**”). The Dividend Claims will, unless creditors thereof elect to opt-out in accordance with the relevant terms and conditions, be converted into Shares which in aggregate will be representing up to 20.6% of the Company’s share capital following the restructuring and the Capital Raise and on a fully diluted basis. Such conversion shares will be sold by the Managers on behalf of the creditors and the proceeds thereof distributed to the relevant creditors at the lapse of such sales process as further set out in the relevant documentation.

New investors in the Capital Raise, by investing in the Rights Issue, Private Placement and/or the New Capital Perpetual Bonds, will, based on a Capital Raise in the amount of NOK 6 billion, receive approximately 75.7% of the post-restructuring share capital with the Shares held by existing shareholders diluted to approximately 3.7%. This equity allocation (including the allocation of the shares on the conversion of the Dividend Claims) assumes, for illustrative purposes, an overall Capital Raise of NOK 6.0 billion, comprised of NOK 4.125 billion in shares (including a Rights Issue of up to NOK 395 million) and NOK 1,875 billion in New Capital Perpetual Bonds.

Certain unsecured creditors are permitted to subscribe in the Private Placement (where they hold, together with their affiliates and related parties, less than NOK 2.5 million of unsecured debt, or its equivalent in other currencies) or the New Capital Perpetual Bonds (if greater), in an amount up to 50% of their unsecured debt. If they do so, a portion of their existing debt will be converted into unsecured bonds of the Company (“**Retained Claims Bonds**”) in an amount equal to 200% of the total amount paid by such unsecured creditor in respect of its subscription for shares under the Private Placement, or 200 % of the aggregate nominal value of New Capital Perpetual Bonds issued to such unsecured creditor, and such portion will not be subject to the unsecured debt reduction provided for in the Restructuring Proposal.

Pursuant to the Restructuring Proposal, the Company informed its lessors and financiers of wide-body aircraft (37 Boeing 787 aircraft) that it is discontinuing long-haul operations and they would have to take over control of the aircraft. The repudiation of these 37 aircraft resulted in the removal of NOK 26.5 billion balance sheet liabilities (figure as of Q3 2020). All 18 Boeing 737 MAX aircraft were also returned to lessors and financiers as a strategic decision was made to focus on the established Boeing 737-800 aircraft. Simultaneously, the Company began interacting and negotiating with the lessors and financiers of the existing 85 737-800 aircraft in the fleet, in order to retain 51 of them. Due to these actions, the lease and financing liabilities for narrow-body aircraft on the balance sheet are expected to be reduced from approximately NOK 15.6 billion in Q4 2020 to approximately NOK 5.8 billion to 6.3 billion conditional on a successful outcome of the restructuring process. Lease and financing liabilities related to wide-body aircraft of approximately NOK 22.4 billion in Q4 2020 will be removed from the balance sheet if the restructuring process is successful.

4 737-800 aircraft will be under financing agreements and owned by the Group and the other 47 aircraft will be long-term operational lease agreements.

All signed agreements with lessors and financiers are highly beneficial for NAS:

- Lease rates have decreased significantly to reflect the new post-COVID leasing market
- The Company was able to secure shorter term agreements on average than it had before
- Nearly all maintenance accruals were written-off from the balance sheet and lessors agreed to partially contribute to future maintenance events
- All lease agreements (leases and financings) benefit from PBH (“power by the hour”) for a substantial time period where there are no fixed monthly payments; payments are made at a per hour rate dependent on the usage of the aircraft

Furthermore, the Company cancelled two aircraft orders (for 185 units in total) with Boeing and Airbus, equivalent to future debt of NOK 85 billion. Please note the litigation with the Boeing company is on-going and has not been concluded yet. For more information on the Dividend Claims, New Capital Perpetual Bonds and Retained Claims Bonds, please see section 4.15 “Key financing agreements” below. Please refer to section 7 of the Securities Note for a description of the effects of the Restructuring Proposal on the Company’s capitalisation and indebtedness.

In the Examinership, the Restructuring Proposal has been approved by the requisite classes of creditors of the Company and the relevant Irish subsidiaries, and was confirmed by the Irish High Court on 26 March 2021. In the Reconstruction, the Restructuring Proposal has been approved by the Oslo City Court on 12 April 2021. Also, in order for the Restructuring Proposal to take full effect, the Examinership and Reconstruction must be completed and the Capital Raise must be closed.

Aviation fuel prices

Aviation fuel is a significant variable cost which has had a material impact on the Group's results during the period under review and will continue to do so in the future. Fuel costs were the Group's largest single operating expense in each of 2015, 2016, 2017 and 2018, accounting for 30 percent of the Group's operating costs (before depreciation) in 2018. In 2018, the Group used more than 1,956,000 metric tons of aviation fuel. Efficiency gains from adding new fuel-efficient aircraft to the fleet and several initiatives to reduce Fuel Consumption have had positive impact on Fuel Consumption.

A variety of external factors, such as the global economic and political environment, changes in supply and demand for oil and oil-related products, war, hostilities or civil unrest in oil-producing nations and the increasing role of speculators and funds in the futures markets have been instrumental in making fuel prices highly volatile and this directly impacts the Company's financial performance.

Competition and competitive position

The airline industry is highly competitive. Airlines compete principally in terms of ticket price, service, frequency, punctuality, safety, brand recognition, passenger loyalty and other service-related issues. Norwegian competes with a number of other airlines, principally SAS on domestic routes in Norway and Sweden, and other operators including but not limited to KLM, British Airways, and Ryanair on international routes from Norway and Sweden. Many of these competitors are larger companies and have both greater resources and enjoy stronger brand recognition internationally. In November 2020, Wizz Air launched domestic flights in Norway with a limited number of scheduled flights but have expressed ambitions to increase the production in 2021.

The Company has a strong market position, being one of the largest low-cost carriers in the world with significantly lower costs than many competitors. For more information about Norwegian's competitive position, please refer to Section 5.1 "The airline market", Section 5.6 "Market Segmentation" and Section 4.12 "Strategy and Return to Service".

Seasonal fluctuations

Beyond COVID-19, the Group's results of operations, like those of most other airlines, vary significantly from quarter to quarter within the financial year and are expected to continue to do so. Historically, the Group has had higher passenger revenue during the summer season in comparison to the winter season (except for the period around Christmas, the New Year and Easter) as this is the period during which many Europeans tend to take their annual holiday.

Ancillary revenue

The Company's strategy is to unbundle traditional flight services into separate services in order to offer customers very low ticket prices and a variety of add-on services for additional fees. Strong ancillary revenue generation is important to the Group as this revenue is typically associated with low marginal costs, resulting in higher profit margins. In addition, average ancillary revenue per passenger also tends to be less exposed to seasonal fluctuations and, therefore, more stable than ticket prices which vary significantly throughout the year.

The Company plans to continue developing its ancillary products and expanding its service offering to meet the needs of the Group's customer base.

Fixed operating cost base

Although the Group employs a low-cost business model, the airline industry is generally characterized by high fixed operating costs and low profit margins. Fixed operating costs relate predominantly to aircraft financing, head office expenses, part of crew salaries, depreciation and amortization, insurance and maintenance. Fixed

costs will generally develop in line with the growth or decline of the Group's operations and capacity. As a result, changes in the Group's operating expenses may not correspond to changes in its revenue.

Foreign currency exposure and exchange rate effects

The Company reports its financial results in NOK. However, it transacts and holds assets and liabilities in currencies other than NOK. A significant proportion of the Company's costs are incurred in euros and US dollars, including aviation fuel, aircraft leases, a significant part of technical maintenance expenses and insurance.

Extraneous events

Both the historical and future results of the Group's operational and financial performance are influenced by the effects of extraneous events over which the Company has no control. Terrorist incidents or other major incidents involving aircraft may affect customers' willingness to fly. Epidemics, adverse weather conditions and other natural events can adversely affect the Group's operations and financial performance.

General macroeconomic conditions and drivers of air travel

The Company develops its route network for each particular country in response to general macroeconomic conditions and other drivers of air travel, which can change over time. Each of the markets in which the Group operates will be subject to different drivers of air travel and, as travel reasons develop, the Group utilizes its flexible structure to evolve its network to meet the needs of that particular market.

4.8 Marketing, Sales & distribution

Marketing

In the Nordics, the Norwegian brand enjoys high awareness and preference. Over time, the company has built a special connection with its Nordic customers, who have learned to know and love the brand. Norwegian is known for "affordable fares for all" and for using a tone of voice in external communication referred to as "Smiling smartness"; Norwegian is the smart choice and the People's choice.

Norwegian's brand tracker shows high scores on the main criteria consumers use to choose an airline: Destination, price and a hassle free journey. Norwegian scores particularly high on statements relating to destinations (direct flights, interesting destinations, departure times), low-price / value for money and on-board experiences. Post-COVID, Norwegian can expect to score high also on familiarity, a selection driver that will rank higher vs earlier giving an opportunity to capitalize on. The marketing department continuously works on further developing the brand based on key consumer insights and by following brand-trackers.

Norwegian owns and controls one of Northern Europe's most unique and valuable customer databases with historic records of travel history, segments, booking preferences and commercial data. This customer database offers cost-effective marketing through own communication and activation channels.

Norwegian has always been at the forefront of marketing and customer activation. One famous example is the invention of the "Low price calendar". Currently, a Marketing Technology roadmap that will enable personalized and automated marketing, is in process for implementation, and is expected to improve efficiency, increase return of marketing investments, and improve customer lifetime values.

All marketing, sales and distribution are performed in compliance with the licensed rights from Norwegian Brand Limited ("NAB").

The marketing team works closely with the Sales & Distribution team to ensure the right balance between longer term brand investments and shorter-term sales campaign investments.

Sales & Distribution

Norwegian has one of the most cost-effective sales and distribution system in the airline industry, with more than 70 percent of the Group's tickets sold through own channels, resulting in low costs per ticket sold.

The sales in own channels are generated from precise tactical, personalized campaigns alongside email marketing on the Nordic largest airline member database.

Remaining tickets are sold through other channels, such as travel agencies / Online travel agencies, groups, allotments, and charter travel and via corporate agreements with large businesses and several Global Distribution Systems ("GDS"). The GDS's maximizes global reach along with unmatched search, pricing, booking, ticketing, capabilities, giving Norwegian a clear advantage versus its LCC peers like Wizz and newcomer Flyr.

Norwegian is continuously monitoring marketing & sales effectiveness (CPA, ROMI, etc.) across all its channels.

4.9 Dependency on licenses and permits, etc.

AOCs

The Group currently holds six AOCs with one AOC application pending approval. An AOC is an operational and technical approval issued by a country's Civil Aviation Authority; the approval grants the holder the right to conduct commercial flights and is valid as long as the holder complies with the terms of the AOC.

Norwegian Air Shuttle ASA AOC NO.AOC.028 granted by the Civil Aviation Authority of Norway ("NCAA") and the operating license by the NCAA necessary to be able to operate its aircraft and carry passengers, goods and/or mail.

Norwegian Air Norway AS AOC NO.AOC.085 granted by the NCAA and the operating license by the NCAA necessary to be able to operate its aircraft and carry passengers, goods and/or mail.

Norwegian Air International Limited AOC IE 63/14 granted by the Aviation Authority of Ireland ("IAA") and the operating license by the Irish Commission for Aviation Regulation necessary to be able to operate its aircraft and carry passengers, goods and/or mail.

Norwegian Air UK Limited AOC GB 2434 granted by the Civil Aviation Authority of the United Kingdom ("UK CAA") and an Operating and Scheduled Route License granted by the UK CAA necessary to be able to operate its aircraft and carry passengers, goods and/or mail.

Norwegian Air Sweden AB AOC 0085 granted by the Swedish Transport Agency ("STA") necessary to be able to operate its aircraft and carry passengers, goods and/or mail.

NORWEGIAN AIR SHUTTLE AOC AS AOC NO.AOC.090 granted by the Civil Aviation Authority of Norway ("NCAA") and the operating license by the NCAA necessary to be able to operate its aircraft and carry passengers, goods and/or mail.

Norwegian Air Sweden AOC AB (org. no. 559290-7298) AOC SE.AOC.0089. Application was approved by the Swedish Transport Agency ("STA") on 5 May 2021.

Agreements with airports and landing permissions

In addition, the Group has agreements with all relevant airports for the operation of flights that are material to the Group's business and profitability.

As of the date of the Prospectus, the existing AOCs are sufficient to cover the Company's existing business. A continuous assessment of the AOC structure is conducted as part of the management of the Company.

Foreign Air Carrier permits (US)

In order to operate aircraft and carry passengers, goods and/or mail between points in EU/Norway and points in the United States under the US-EU, Norway and Iceland Air Transport Agreement, an authorization in form

of a Foreign Air Carrier Permit from the US Department of Transport is required. Five of the Group's carriers holds a Foreign Air Carrier Permit from US Department of Transport, these are:

- Norwegian Air Shuttle ASA
- Norwegian Air International Limited
- Norwegian Air UK Limited
- Norwegian Air Norway AS
- Norwegian Air Sweden AB

UK-US routes previously fell within the scope of the EU-US Open Skies Agreement, which allows airlines of the EU to be majority-owned and controlled by EU-EEA states. The EU US Open Skies Agreement no longer applies for the UK, however, UK-US routes now fall under the successor UK US Air Transport Agreement, which entered into force from 1 January 2021. The UK US Air Transport Agreement establishes majority ownership and effective control are vested in the UK or UK nationals only.

As per Annex 1 of the agreement, those UK airlines, not majority UK-owned and controlled, but which were in possession of a US foreign air carrier permit at the time of signature of the new agreement (in November 28, 2018), will be allowed to continue to operate under the new Air Transport Agreement, on a reviewable, non-transferable “grandfathered” basis. This is subject to the compliance with the conditions provided in Annex 1.

Foreign Air Carrier permits (Other countries)

Similar authorizations may be required in order to start operations to other countries under existing bilateral treaties. The Company holds the requisite authorizations from foreign governments to operate to all its current destinations.

4.10 Environmental matters and regulations

Flying brings people together and is of great value to society. But flying also comes at an environmental cost that must be reduced. The environmental impact of the Group's operations may, *inter alia*, include air and noise pollution as well as consumption of fuel, glycol for aircraft de-icing and runway de-icing and single-use plastics onboard.

The Group is committed to operate its business in an environmentally responsible manner. To achieve this, the Group will integrate environmental and climate-related risks and opportunities into business plans, corporate governance and management, culture, and leadership functions.

Climate-related risks

Climate-related risks include transition risks and physical risks. Transition risks refer to the transition into a lower-carbon economy while physical risks refer to the impacts of climate change.

A transition to a lower-carbon economy may involve changes in government policies, technological development, and customer demands. The speed and focus of these changes may create financial and reputational risks. Environmental regulations such as emission quotas, passenger taxes and blending mandates could affect cost of operations or demand for air travels, which could in turn lead to reduced utilization of aircraft.

On 1 January 2020 the Norwegian government imposed a blending mandate of 0.5 percent advanced biojetfuel on all domestic fuel consumption. Apart from this there have not been any material changes to the Group's environmental regulatory framework since 31 December 2019. Please see Section 9 “Regulatory overview” for a summary of certain significant regulatory matters affecting the Group's activities.

A changing climate may cause increased severity of extreme weather events. Cyclones, hurricanes and floods are acute, event-driven physical risks. Higher temperatures, sea level rise and heat waves are chronic physical

risks stemming from longer-term shifts in climate patterns. Physical risks may impact financial performance directly or indirectly through supply chain disruptions. Climate-related risks are managed on a Group level.

Environmental sustainability strategy

The overall goal of the Group's environmental sustainability strategy is to use less natural resources and make more money.¹² The goal rests on the principle that environmental actions must deliver a profit to be economically sustainable and operationally scalable.

The success of the Group strategy will be measured by three KPI targets:

1. To limit global warming to 1.5°C, carbon emissions must be reduced 45 percent by 2030 compared to 2010 levels, according to the International Panel on Climate Change¹³. The Group will improve the operational carbon efficiency by 45 percent per revenue passenger kilometer (RPK) by 2030 compared to 2010 levels.
2. Unnecessary waste will be designed out from our product offer. The Group will stop all consumption of non-recyclable plastics by 2023. In the same period, consumption of single-use plastics will be reduced by 30 percent and all single-use plastics in Scandinavia will be recycled.
3. The Group will be open and share progress actively. Climate-related risks and targets will be integrated into corporate governance, risk management and annual reporting.

The Group's fleet has improved carbon efficiency by 28 percent between 2010 and 2019, to 70 grams CO₂ per RPK. Moreover, the fleet generates up to 60 percent less noise footprint than comparable older aircraft types.

The improvement in carbon efficiency necessary to reach the 45 percent target by 2030 will be reached through a mix of fleet renewal, operational efficiency, data driven fuel saving and sustainable aviation fuels. The Group's aircraft can fly on up to 50 percent certified sustainable aviation fuel today. The Group will actively engage with producers of sustainable aviation fuels and use the Group's purchasing power to ramp up production of affordable fuels with high sustainability performance.

Future projections and profitability assessments remain uncertain under current market conditions and regulatory framework. Greater visibility and reduced uncertainty of key variables are necessary before deciding upon the most cost-efficient way to achieve the carbon efficiency target.

Recent initiatives

The Company has partnered with AVTECH Sweden AB, allowing pilots to receive high quality weather data (including wind and temperature) which reduces fuel burn and enable fuel-efficient descents with less speed deviations (i.e. noise reduction). Norwegian has saved as much as 22 kilos of fuel on each flight by using weather data, adding up to 5,000 metric tons fuel per year or 16,000 metric tons in reduced CO₂ emissions.

In 2019, the Company rolled out SkyBreathe, a fuel saving tool for pilots. SkyBreathe analyzes the entire flight operation, making it possible to optimize each flight, reducing fuel consumption and hence lower emissions. The mobile phone application uses big data algorithms to automatically process information from aircraft sensors and has been developed in cooperation with the EU-funded Clean Sky project. Initial testing has shown that SkyBreathe has potential to reduce entire fleet fuel consumption by approximately 2 percent.

The Company is focused on reducing the amount of waste generated from operations and to improve the recycling processes. The Company are also looking at changing several products on board (i.e. bowls, meal boxes, coffee mugs and cutlery packs) to more environmentally friendly materials. The pre-ordering of food,

which is available on longer flights, contributes to less food waste. IT equipment is retrieved by the organization Fare, which deletes and formats old computers for reuse.

4.11 Developments Following The COVID-19 Outbreak In 2020

The Company reported on 13 February 2020 that it was targeting a positive net profit for 2020 after taking significant actions in 2019 to optimize the route network, cut costs and create financial headroom. The guidance was withdrawn in a stock market notice on 6 March 2020 due to the drop in demand and government-imposed travel restrictions following the COVID-19 outbreak.

During the first week of March, the Company started experiencing reduced demand on future bookings as a result of the COVID-19 outbreak. As a consequence, the Company announced 3,000 cancellations and temporary layoffs of employees on 10 March 2020, for travel from mid-March to mid-June. The number of cancellations was gradually ramped up as demand stagnated and travel restrictions were enforced by governments across the world. On 16 March 2020, the Company cancelled 85 percent of planned flights and announced temporary layoffs of approximately 7,300 employees. In the first weeks thereafter, Norwegian maintained as many scheduled flights as possible to help customers return to their home destinations. The Company also worked closely with the authorities to arrange rescue flights.

On 19 March 2020, the Norwegian government proposed a guarantee scheme for the aviation industry, of which NOK 3 billion would be available to the Company upon the fulfilment of certain conditions set out by the government. Under the scheme, the government would guarantee 90 percent of the loans granted to Norwegian and the private sector would be required to support the remaining 10 percent.

On 20 April 2020, Norwegian's pilot and cabin crew companies in Sweden and Denmark filed for bankruptcy due to the drop in demand following the COVID-19 outbreak. While almost all of the Company's flight operations have been cancelled, costs for air crew remained due to the inefficient furlough opportunities in Sweden and Denmark, coupled with the lack of significant financial support from the same governments. The boards of the four companies were therefore left with no choice but to apply for bankruptcy in order to reduce costs during the unprecedented crisis.

Due to the extraordinary situation (force majeure), the Company also notified OSM Aviation that it cancelled the crew provision agreements with several of its jointly owned OSM Aviation subsidiaries with crew based in Spain, U.K, Finland, Sweden and the US. The process of the subsidiaries filing for bankruptcy is now being managed by bankruptcy courts and bankruptcy trustees in the respective countries.

On 20 May 2020, the Company announced that following its conversion of approximately NOK 12.7 billion of debt to equity, it had satisfied the conditions precedent for obtaining the full amount of support available pursuant to the said state guarantee scheme, and had in addition completed a private placement in the amount of NOK 400 million.

The Company's successful restructuring during 2020 (the Phase 1 Restructuring as described in section 4.7) improved equity by NOK 18.2 billion, achieved by converting bond debt, lease liabilities and accounts payable to equity, as well as a public offering. However, despite this strong support from stakeholders and unprecedented voluntary strengthening of the balance sheet, it became evident that the Company needed further support from the government due to the continued impact of the pandemic. Although the Company presented a plan for its successful emergence from the pandemic, the Norwegian Government announced on 9 November 2020 that it would not provide additional financial support for the time being.

As a consequence, the Board of Directors resolved on 17 November 2020 to enter into the Examinership, and subsequently on Tuesday 8 December 2020 to enter into the Reconstruction, supported by a series of resolutions passed by the EGM - for further information, see section 4.7 and under the heading "The Restructuring Proposal and Bankruptcy risk" in section 1.1 "Risks relating to the Group's business and financial situation" above.

Given the uncertainty and ongoing impact on overall demand for air travel, Norwegian does not provide guidance for 2021. Once travel restrictions lift, Norwegian plans to ramp-up operations to a peak of around 50

short-haul aircraft in 2021 and around 70 short-haul aircraft in 2022. Norwegian's long-haul operations will not resume. It is not expected that demand for short-haul travel in Europe will return to 2019 levels before 2023 or 2024 and so Norwegian will deploy capacity back into the market at a pace that matches this. When conditions normalise, Norwegian will serve its four core source markets of Norway, Denmark, Sweden and Finland with a balance of intra-Nordic and domestic routes and routes to key cities and popular leisure destinations across Europe.

4.12 Strategy and return to Service

Norwegian has long been recognized as an industry leader in low-cost travel, winning numerous awards during its close to 20 years in operation. The company will build on this foundation when refocusing its strategy. The Company's renewed strategy builds on its core Nordic business and operating a European short haul network with narrow body aircraft. The airline will continue to meet its customers' needs by offering affordable fares for all across a broad range of attractively scheduled domestic routes in Norway, across the Nordics and to key European destinations.

Since 2018, Norwegian has been progressing well on the shift in strategic focus from growth to profitability and has taken major operational and financial measures that allowed the Company to guide on a positive net profit in 2020. As society overall, and in particular the aviation industry, suffered from the consequences of the COVID-19 pandemic, Norwegian was forced to ground a significant part of its fleet due to government-imposed travel restrictions and lack of demand, and took drastic measures immediately to preserve liquidity and navigate through the crisis. During this hibernation period, the Company has seized the opportunity to completely restructure and re-create a strong, investable airline with a new strategy and business plan.

The new airline is built on the pillar of delivering attractive returns to investors supported by the new business plan labelled "New Norwegian" with the following core elements:

- A complete **financial restructuring** to ensure a robust capital structure for the long-term. The Phase 1 Restructuring was successfully completed in 2020 and on 17 December 2020 the EGM approved the resolutions necessary to implement the proposed Phase 2 Restructuring. The restructuring allows the Company to rightsize the network and fleet around the profitable core Nordic business and give financial headroom to manoeuvre through the pandemic until demand recovers. Both phases of the restructuring additionally seek to lower financial and ownership costs and thereby creating an economically sustainable platform for the Company for the benefit of all stakeholders.
- The **new short-haul network** is an optimized, consolidated version of the network Norwegian has developed and refined since the beginning in 2002 with a core Nordic footprint. Over the past two years, the Company has rationalized the route portfolio and the new network of 300+ routes retain the historically strongest-performing routes while maintaining the presence and connectivity that our customers highly value. Pre-COVID-19, Norwegian was the leading carrier for leisure-oriented traffic in the Nordics and the second largest on domestic & intra-Nordic flights, and the new network is designed to defend and strengthen this position. Furthermore, changes are made to deliver a more efficient operation focusing on the most popular destinations and the largest traffic flows. Importantly, sufficient scale allows the airline to maintain a clear cost advantage versus its closest peers and potential new entrants.

The long-haul network was in January 2021 decided to be terminated following the economic rightsizing of the fleet.

- A **low-cost operating model** with less complexity, higher reliability and, most importantly, a rightsized and competitive cost base, is the Company's fundament to continue to provide affordable fares to all. The airline will leverage and strengthen its cost advantage going forward, boosted by the effects obtained in the restructuring and with a clear strategic priority in further improving cost-efficiency and reinforcing cost control. Through the hibernation period, the airline has reviewed its entire operational setup, processes and sourcing practices and will emerge as a streamlined company devoted to its core business. Clear efficiency-gains are expected from improved asset and resource utilization, concentrated network, and lighter overhead. This model allows Norwegian to compete effectively on price versus legacy carriers,

on scale versus new entrants and with a superior quality offering than what the ULCCs offer. Maintaining and improving on this competitiveness, by striving every day for increased cost-efficiency in combination with a quality customer offering, is part of the Company's DNA.

- A **new customer platform** to provide a hassle-free, sales oriented, sustainable & personalized customer journey based on the already award-winning experience the airline is known for. A clear priority is strengthening ancillary sales by offering relevant and attractive products at the right time, increasing conversion through a personalized, data-driven e-commerce engine. Norwegian will leverage its brand strength and customer satisfaction to continue to be the preferred option for those who seek an affordable alternative without compromising on quality. A revised and focused brand platform will ensure that brand strength translates into customer satisfaction and attractive customer acquisition costs / high marketing ROI.
- Leverage the **unique and award-winning Reward program**, with over 4 million members in the Nordics, to develop a broader ecosystem in connection to the airline to create new, steady revenue streams and strengthen loyalty and customer lifetime value (CLV) through more frequent and engaging interactions outside the traditional airline journey. This will be enabled through new and existing partnerships, our strong membership base and innovative service- and product offerings.
- Increased **labor efficiency** following a re-designed, more crew-friendly network allowing for a right-sized base structure that will increase utilization and reduce operational costs. The Company will be better positioned to manage seasonality through a leaner organization and more flexible arrangements.

Importantly, Norwegian has a very **dedicated, experienced workforce** with a strong fighting spirit. "Red Nose Warriors" has grown into a strong employer brand that will be a competitive force to attract and retain top talent and competence vital to succeed in a post-COVID-19 environment.

- Strong **organization and governance structure** with an experienced, dedicated executive team and redesigned management levels building on key performers and new talent. To support the new organization, a modernized and flexible backbone will boost productivity through select IT investments, development of new business centers and rigorous supply chain management.

Return to service

Norwegian aims to emerge from the crisis as a profitable and sustainable airline. However, normalization of operations will take time as demand recovery remains uncertain. COVID-19 travel restrictions could potentially continue into the summer, thus removing the normal peak season in terms of cash generation for airlines. However, the Company has taken a number of cost measures to preserve liquidity in the hibernation phase and are aiming to secure significant flexibility through the restructuring process, in particular power-by-the-hour arrangements on the aircraft side, which will give the airline a clear competitive advantage in the ramp-up phase.

Currently, the majority of the fleet is grounded to keep cash burn at a minimum level. Current cash burn relates to minimum operations, critical IT infrastructure and critical operational payments, while other payments are halted, including (but not limited to) payments to original equipment manufacturer ("OEM"). No interest, leasing or debt service payments are being made during the current Examinership and Reconstruction processes.

Due to the high uncertainty, the Company has developed scenarios for recovery. The base case is built on a relatively slow recovery scenario where operations are kept at a minimum level until demand is picking up, with recovery during the high season in 2021 and operations expected to gradually return back to normal during 2022. The Company is also preparing for slower recovery as a contingency.

The plan allows flexibility to ramp-up the most profitable routes stepwise and restore operations earlier than in the base case upon sufficient demand from customers. Such ramp-up will be executed under strict cost-control and be purely demand-driven.

4.13 Trend information and significant changes to the Company's financial performance since 31 December 2020

The COVID-19 outbreak followed by government-imposed travel restrictions and drop in demand has led to the grounding of most of the Company's fleet and temporary lay-offs of a significant share of the Company's workforces as the Company has entered hibernation mode, adverse financial distress and the Examinership and Reconstruction processes. The consequences for the Company and the airline industry are severe, and dependent on when travel restrictions are lifted and demand starts to pick up, certain significant accounting estimates could be affected. If the situation persists, beyond the uncertainty of the outcome and consequences of the Examinership and Reconstruction processes, it could furthermore impact the Company's impairment evaluations, the ability and timing of utilization of carry forward tax losses and the ability to extinguish liabilities in the normal course of business at the amounts stated in the consolidated financial statements. At the current date there is too much uncertainty to estimate the final effects of the COVID-19 pandemic outbreak.

Update on guiding

The Board of Directors has presented an indicative plan and set of actions that creates a framework that will potentially enable the Company to exit its Irish Examinership and Norwegian Reconstruction processes during the second quarter of 2021. Should the indicative plan be successful, Norwegian is expected to initially hold up to 51 Boeing 737 aircraft (owned and leased) primarily operating in Norway and the Nordics or from Norway/Nordics to Continental Europe. Long haul operations will not continue. It is estimated the Company will have a total debt of around NOK 16-18 billion, of which NOK 5.8 - 6.3 billion is aircraft related debt. The Company's cash balance (including restricted cash) upon completion of the Restructuring Proposal is estimated to be approximately NOK 7 billion. These estimates are based on the assumption that NOK 6,000 million are raised in the Capital Raise. Based on conservative assumptions both in relations to the length of the COVID-19 pandemic and on revenues, costs and load factors, the Company expects a slight positive EBITDA post the reconstruction in 2021. Under the current circumstances, the outcome and consequences of the Examinership and Reconstruction processes remains highly uncertain.

Financial restructuring

Norwegian is dependent on additional working capital in order to continue operating through the second quarter of 2021 and beyond. Norwegian intends to raise NOK 4.5 - 6 billion in new capital through a combination of a Rights Issue to current shareholders, a Private Placement and issuance of the New Capital Perpetual Bonds as further described in the Securities Note. See section 4.7 about the Restructuring Proposal and the Risk Factors section for further information.

Effects of COVID-19

The initial impact of the COVID-19 outbreak could be seen in the Company's traffic figures for March 2020 which were heavily influenced by the government-imposed travel restrictions and drop in demand

Since April 2020, the Company has operated a limited network mainly in domestic Norway with a fleet of up to 25 aircraft. Following the announcement on 9 November 2020 by the government in Norway to decline further financial support while simultaneously imposing travel restrictions, the Company decided to furlough additional employees and reduce capacity considerably to only between seven and nine aircraft in operation, as well as effects of the Company's Proposal as further described in section 4.7. Norwegian will consider further changes to production during the summer season and beyond based on travel advice and restrictions from governments in the company's markets and on customer demand. The Company aims to gradually ramp up production through 2021, with a steady further recovery to normalized levels in the summer season of 2022. Any developments in the future spread of the virus, including additional or prolonged travel restrictions and other changes affecting the speed of recovery to normal services will impact the company's business plans. Such assumptions are highly uncertain and subject to change as the virus situation is continuously developing worldwide.

Increased competition

Wizz Air launched operations in the Norwegian domestic market in October 2020 with first flights commencing from November the same year. Two aircraft are based at Oslo Gardermoen (OSL) and two aircraft are based at Trondheim (TRD). Wizz Air has since launch made significant changes to the flying program and currently operates 15 routes at relatively low frequency. Wizz Air's entry into the domestic market has had an initial negative impact on the pricing levels in the market.

Wizz Air's stated planned summer 2021 production amounts to around a 13% capacity share on overlapping routes with Norwegian, and a 9% capacity share on the total Norwegian domestic market. This compares to 40% and 27% respectively for Norwegian.

A new start up, Flyr, raised NOK 600 million in equity in February 2021. Flyr is a Norwegian based low-cost carrier with a primary focus on the Norwegian domestic market. The company has initially signed LOI's for two 737-800 aircraft of which the first is expected to be delivered in May 2021. According to the company it expects to receive its operating license (AOC) from the Civil Aviation Authority shortly after the delivery of its first aircraft. According to the investor presentation as of 1 March 2021 Flyr target a fleet of eight aircraft in year one and intend to expand to 28 aircraft within five years. The company have announced that its first flight will be 30 June 2021 and expect to open ticket sales in May.

4.14 Investments

4.14.1 Introduction

The figure below shows the number of aircraft operated by the Group from 2012 to 2020. There have been no material investments, and Norwegian has not taken delivery of any aircraft, in 2020. Following the Examinership and Reconstruction processes, it is expected that the fleet of operated aircraft will be significantly reduced. Please refer to sections 4.7 and 4.13 for more information.

4.14.2 Principal investments in progress

The Group has not made any material investments since the date of the Annual Financial Statements of 2020.

The Company has no commitments to any aircraft manufacturer or lessor regarding fleet orders. No material capital expenditure related to any aircraft deliveries will be incurred until needed to induct aircraft for Q2 2022 (which would require discussions and agreements with manufacturers and/or lessors). The Company plans to right-size its operations and the fleet plan (and aircraft selection) will be dependent on the market after COVID-19, with route profitability being key.

In June 2020, Norwegian and Arctic issued a notice to Boeing of termination of the Company's purchase agreements of the remaining five Boeing 787 aircraft and 92 Boeing 737 MAX aircraft on order and the Boeing GoldCare service (BGS) agreements related to the 787 and MAX aircraft. In addition, Norwegian and Arctic filed

a complaint on 29 June 2020 in the Circuit Court of Cook County, Illinois against Boeing and Boeing Commercial Aviation Services Europe Limited in the US seeking confirmation of its right to terminate the purchase agreements and the related BGS agreements, the return of predelivery payments (PDPs) previously paid to Boeing related to the aircraft and the payment by Boeing of substantial compensation for the Company's losses related to the grounding of the 737 MAX and engine issues on the 787 (in which Boeing has contested and asserted claims against the Group). In addition, the Company has, without prejudice to its belief that the contracts have been terminated, repudiated the abovementioned Boeing contracts (and ancillary contracts) as part of the Irish Examinership and Norwegian Reconstruction. Furthermore, the Company has also repudiated its purchase agreement with Airbus with respect to eighty-eight undelivered A320neo and A321neo model aircraft and has no further financial or legal obligations towards Airbus.

The Company, via its wholly-owned subsidiary Arctic Aviation Assets DAC, continues to hold a 30% equity stake in a joint venture leasing entity ("JV") with CCB Leasing (International) Corporation DAC ("CCBLI"), a wholly owned subsidiary of China Construction Bank Corporation. The JV currently holds three A320neo aircraft on lease with a third-party operator, HK Express (part of the Cathay Pacific Airways group). The Company has no further delivery or capital expenditure commitments in connection with the JV.

4.15 Key financing agreements

At the date of this Registration Document, the Group has the following key financing agreements.

NAS07

The bond terms in respect of the EUR 250,000,000 7.25% Norwegian Air Shuttle ASA Senior Secured Bond Issue 2015/2019 with ISIN NO 001 0753437 ("**NAS07**"), originally entered into on 9 December 2015 as amended and restated in the Phase 1 Restructuring (the "**NAS07 Bond Terms**"). The NAS07 Bond Terms are based on the standard Nordic Bond Terms for corporate high yield bonds in Norway and material covenants include restrictions on incurrence of financial indebtedness and payment of dividends, repurchases or other distributions to shareholders, negative pledge, a minimum book equity covenant of NOK 1,500 million and a minimum liquidity covenant of NOK 100 million until 1 July 2021, and NOK 500 million thereafter. The NAS07 Bond Terms also contain a cross-default threshold of NOK 75 million and (until 1 July 2021) cross-acceleration threshold of USD 20,000,000, as well as market standard events of default including non-payment, breach of obligations, misrepresentation, insolvency proceedings and material adverse change. The NAS07 bonds are secured by the Group's take-off and landing slots at London Gatwick Airport.

As of the date of this Registration Document, EUR 125,000,000 of the NAS07 bonds remain outstanding.

The NAS07 Bond Terms are available at www.stamdata.com.

NAS08

The bond terms in respect of the SEK 963,500,000 7.25% Norwegian Air Shuttle ASA Senior Secured Bond Issue 2017/2020 with ISIN NO 001 0783459 ("**NAS08**"), originally entered into on 7 February 2017 as amended and restated in the Phase 1 Restructuring (the "**NAS08 Bond Terms**"). The NAS08 Bond Terms are based on the standard Nordic Bond Terms for corporate high yield bonds in Norway, and are otherwise materially similar to the NAS07 Bond Terms described above.

As of the date of this Registration Document, SEK 481,750,000 of the NAS08 bonds remain outstanding.

The NAS08 Bond Terms are available at www.stamdata.com.

Pursuant to a summons for written resolutions dated 12 March 2021 (the "**Summons**") in respect of NAS07 and NAS08, the amount outstanding under NAS07 and NAS08 bond issues shall, on or about the effective date of the Restructuring Proposal, be converted to NOK and written down to NOK 750,000,000 (the "**NAS13 Issue Amount**") and the remaining outstanding portion treated as unsecured debt under and in accordance with the

Restructuring Proposal. With respect to the NAS13 Issue Amount, the NAS07 Bond Terms and the NAS08 Bond Terms shall be combined and amended to reflect the terms set out under NAS13 below.

NAS09

The bond terms in respect of the NOK 250,000,000 FRN Norwegian Air Shuttle ASA Senior Secured Bond Issue 2017/2020 with ISIN NO 001 0909940 (“**NAS09**”), originally entered into on 16 November 2017 as amended and restated in the Phase 1 Restructuring (the “**NAS09 Bond Terms**”). The NAS09 Bond Terms are based on the standard Nordic Bond Terms for corporate high yield bonds in Norway. The interest rate under the NAS09 bonds is 3 mo. NIBOR + 3.95% p.a. Material covenants include restrictions on incurrence of financial indebtedness and payment of dividends, repurchases or other distributions to shareholders, negative pledge, a minimum book equity covenant of NOK 1,500 million and a minimum liquidity covenant of NOK 100 million until 1 July 2021, and NOK 500 million thereafter. The NAS09 Bond Terms also contain a cross-default threshold of NOK 75 million and (until 1 July 2021) a cross-acceleration threshold of USD 20,000,000, as well as market standard events of default including non-payment, breach of obligations, misrepresentation, insolvency proceedings and material adverse change. The NAS09 bonds are secured by a ground lease agreement in respect of an aircraft hangar in Ullensaker municipality.

As of the date of this Registration Document, NOK 250,000,000 of the NAS09 bonds remain outstanding.

The NAS09 Bond Terms are available at www.stamdata.com.

Following (and conditional upon) the implementation of the Restructuring Proposal and pursuant to the NAS07 and NAS08 Summons, NAS09 will be repaid at par value upon emergence from the Examinership and the Reconstruction.

November 2019 Bonds

The bond terms in respect of the Norwegian Air Shuttle ASA 6.375% Senior Unsecured Convertible Bonds with ISIN NO 001 0868284, originally entered into on 13 November 2019 as amended and restated in the Phase 1 Restructuring (the “**November 2019 Bond Terms**”). The November 2019 Bond Terms are based on the standard Nordic Bond Terms for corporate high yield bonds in Norway and are convertible into Shares at the option of the holder, at a conversion price of NOK 424,919 (with the nominal amount of the applicable bonds being converted to NOK at the fixed exchange rate set out in the November 2019 Bond Terms, being 1:10.5528), subject to the so-called Euro-market standard anti-dilution provisions.

Material covenants include restrictions on incurrence of financial indebtedness and payment of dividends, repurchases or other distributions to shareholders, negative pledge, a minimum book equity covenant (on a consolidated basis) of NOK 1,500 million and a minimum liquidity covenant of NOK 100 million until 1 July 2021, and NOK 500 million thereafter. The November 2019 Bond Terms also contain a cross-default threshold of USD 10 million (subject to material adverse effect) and (until 1 July 2021) a cross-acceleration threshold of USD 20,000,000 as well as market standard events of default including non-payment, breach of obligations, misrepresentation, insolvency proceedings and material adverse change. The November 2019 Bonds are unsecured.

As of the date of this Registration Document, USD 6 256 000 of the November 2019 Bonds remain outstanding.

The November 2019 Bond Terms are available at www.stamdata.com.

Perpetual Bonds

The bond terms in respect of the following Norwegian Air Shuttle ASA zero coupon perpetual subordinated convertible bonds originally entered into on 22 May 2020 (the “**Perpetual Bond Terms**”):

- (a) Norwegian Air Sh ASA 20/PERP 0% USD CONV ISIN NO0010883515 (“**USD Bonds**”);

- (b) Norwegian Air Sh ASA 20/PERP 0% EUR CONV ISIN NO0010883416 (“EUR Bonds”); and
- (c) Norwegian Air Sh ASA 20/PERP 0% SEK CONV ISIN NO0010883473 (“SEK Bonds”).

The Perpetual Bond Terms are based on the standard Nordic Bond Terms template for corporate high yield bonds in Norway and are convertible into Shares at the option of the holder, at a conversion price of NOK 424,919 (with the nominal amount of the applicable bonds being converted to NOK at the fixed exchange rate set out in the Perpetual Bond Terms, being (subject to so-called Euro-market standard anti-dilution provisions)):

- (a) with respect to the USD Bonds, USD:NOK at 1:10.5528;
- (b) with respect to the EUR Bonds, EUR:NOK at 1:11.3875; and
- (c) with respect to the SEK Bonds, SEK:NOK at 100:103.72.

The Perpetual Bonds are perpetual with no mandatory instalments or scheduled maturity date and are fully subordinated to the Company’s other debt liabilities, but rank prior to the ordinary share capital. The Perpetual Bonds are unsecured and the Perpetual Bond Terms do not contain any event of default provisions, save for on or after the date on which any order is made or resolution is passed for the final liquidation, final winding-up or final dissolution (or analogous insolvency process in any jurisdiction) of the Company.

As of the date of this Registration Document, the following amounts remain outstanding under each of the Perpetual Bonds:

- (a) USD 6,403,711.00 with respect to the USD Bonds
- (b) EUR 7,167,931.00 with respect to the EUR Bonds
- (c) SEK 13,593,553.00 with respect to the SEK Bonds

NOK 330 million state-backed term facility

On 31 March 2020, the Company obtained the first tranche of the state guarantee scheme by way of a single currency term facility in the aggregate amount of NOK 330 million. The terms of the loan agreement include, amongst others, restrictions on financial indebtedness and restrictions on dividends and distributions during the tenor of the loan. The facility agreement does not contain any financial covenants, but includes provisions on event of default with respect to non-payment, misrepresentations, cross-acceleration and insolvency proceedings. The premium payable in respect of the guarantee is 2 percent per annum during the COVID-19 situation and on market terms once the Ministry of Trade and Fisheries determines that commercial air traffic in Norway is no longer restricted as a result of COVID-19.

As of the date of this Registration Document, the NOK 330 million state-backed term facility is fully drawn.

NOK 2.99 billion state-backed term facility

On 20 May 2020, the Company obtained the second and third tranches of the state guarantee scheme by way of a single currency term facility in the aggregate amount of NOK 2.99 billion. The terms of the loan agreement are substantially similar to those in respect of the NOK 330 million state-backed term facility.

As of the date of this Registration Document, the NOK 2.99 billion state-backed term facility is fully drawn.

Aircraft leases and financing arrangements

The Group has entered into aircraft operating lease agreements, pursuant to which the aggregate lease liabilities were NOK 3,351.1 million as of 31 December 2020. In addition, the Group had aircraft financing

liabilities in the amount of NOK 3,812.0 million as of 31 December 2020. Finally, the Group had aircraft financing and lease liabilities in the amount of NOK 30,767.8 million classified as Liabilities included in disposal group classified as held for sale as of 31 December 2020. In aggregate, the Group had NOK 37,930.9 million in lease and aircraft financing liabilities as of 31 December 2020.

Key financing agreements following implementation of the Restructuring Proposal

Following (and conditional upon) the implementation of the Restructuring Proposal (including the completion of the Capital Raise), the Group will have the following key financing agreements.

Dividend Claims

Pursuant to the Restructuring Proposal, existing unsecured creditors shall receive dematerialised/uncertificated unsecured debt claims towards the Company in full and final satisfaction of its original unsecured claim, which shall be governed by dividend claims terms attached to the Restructuring Proposal documents (the “**Dividend Claims Terms**”). Each Dividend Claim shall be freely assignable on notice to the Company and convertible into Shares as set out below.

Subject to the option of holders of Dividend Claims (“**Dividend Claims Creditors**”) to opt out of the share conversion and/or the Structured Sale Process (as defined below), the Dividend Claims shall be converted to Shares on the date that falls 60 days from the effectiveness of the Restructuring Proposal (the “**Structured Sale Conversion Date**”), and the resulting Shares shall be sold in the market by DNB Markets (the “**Broker**”) by way of a structured sale process, the structure of which (including timing and sale price) shall be determined by the Broker in its discretion within a commercially reasonable time period, based on liquidity and other market factors (the “**Structured Sale Process**”). The Broker shall use reasonable efforts to complete the Structured Sale Process within three months from the Structured Sale Conversion Date, though may in its discretion extend such period where it considers in its professional judgement that this would be in the best interests of the Dividend Claims Creditors who have not opted out of the Structured Sale Process. The cash proceeds of the Structured Sale Process will be distributed to the applicable Dividend Claims Creditors following close of the Structured Sale Process.

On the date that falls 5 business days prior to the Structured Sale Conversion Date, the Company shall fix the conversion price under the Dividend Claims such that all Dividend Claims together would convert into 233,548,229 Shares.

Subject to applicable securities law, a Dividend Claims Creditor may in respect of any Dividend Claim opt-out of the Structured Sale Process, in which event such Dividend Claim shall, promptly following the close of the Structured Sale Process (and in no event later than three months after commencement of the Structured Sale Process) (the “**No-Sale Conversion Date**”) be converted to Shares and delivered to such Dividend Claim Creditor. Alternatively, a Dividend Claims Creditor may in respect of a Dividend Claim opt out of conversion to Shares altogether, in which event such Dividend Claims shall persist as a 7-year unsecured debt claim with no covenants or events of default, accruing NIBOR +1% interest from the No-Sale Conversion Date. Each of the aforementioned opt-out rights shall be exercised no later than 2 business days prior to the Structured Sale Conversion Date.

New Capital Perpetual Bonds

The New Capital Perpetual Bonds will be issued to certain holders of debt who has the right to and subscribes for New Capital Perpetual Bonds, against the companies subject to the Irish Examinership and the Reconstruction.

The New Capital Perpetual Bonds will rank senior in right and priority of payment to the ordinary share capital of the Company and be subordinated to all present and future claims of all unsubordinated creditors of the Company and unsubordinated creditors whose rights are expressed to rank senior to the New Capital Perpetual Bonds. The New Capital Perpetual Bonds will have no maturity date and may in the option of the holder be

convertible into ordinary Shares of the Company. The conversion period in respect of the New Capital Perpetual Bonds will commence on the date falling on the second anniversary of the issue date, however such that the first NOK 20,000,000 of New Capital Perpetual Bonds subscribed for by each creditor or class of creditor under the scheme (taken together with its affiliates) may be converted immediately following the issue date. The conversion price shall be 150% of the share price in respect of the Offering, with market-standard anti-dilution provisions.

The New Capital Perpetual Bonds will incur step up margin as set out below and a default interest rate of 2 per cent p.a. Interest shall be settled in cash, unless the Company elects to pay interest through issuance of additional bonds (PIK Bonds).

| Year 1 | Years 2-3 | Years 4-5 | Years 6-7 | Year 8+ |
|---------|-----------|-----------|-----------|---------|
| 250 bps | 350 bps | 500 bps | 700 bps | 950 bps |

The New Capital Perpetual Bonds will include customary information undertakings and the Company would be restricted from making distributions in respect of equity while any PIK Bonds remain outstanding, with a first call date after the fourth anniversary of the issue date. The New Capital Perpetual Bonds will not contain any event of default provisions, but the bond trustee may declare that the bonds shall become due and payable on or after the date which any order is made or resolution passed for the final and irrevocable liquidation, winding-up or dissolution of the Company.

As a matter of law, the Company may not grant approval for conversion rights in excess of five years. As such, the conversion rights in the New Capital Perpetual Bonds must be renewed periodically at a general meeting of the Company. In the event the Company fails to renew the conversion rights, the holders of the New Capital Perpetual Bonds would be unable to call or convert the instrument following lapse of the approval then in effect. In order to minimize this risk, the Company is incentivized to renew the conversion rights by way of accrual of 20 percent interest on the New Capital Perpetual Bonds following any expiry of the conversion rights therein.

Retained Claims Bonds

The Retained Claims Bonds will be issued to certain creditors that participate in the New Capital Perpetual Bonds or the Private Placement, in an amount equal to 200% of the aggregate nominal value of the New Capital Perpetual Bonds issued to such creditors, or in respect of creditors that participate in the Private Placement, 200% of the total amount paid for the Shares.

The Retained Claims Bonds will constitute senior unsecured debt obligations of the Company and will rank at least *pari passu* with each other and with all obligations of the Company (save for such claims which are preferred by bankruptcy, insolvency, liquidation or other similar laws of general application). The Retained Claims Bonds will incur no interest and will become payable in instalments, such that 50% of the Retained Claims Bonds shall become due and payable on 30 September 2025 and the remaining 50% of the bonds shall become payable on 30 September 2026.

The bond terms in respect of the Retained Claims Bonds will include standard general undertakings and standard event of default provisions with a cross acceleration threshold of NOK 75 000 000 and an equal threshold for insolvency and insolvency proceedings and creditor's process. Under the Retained Claims Bonds, the Company will be restricted from making any dividend payments, repurchase of shares or other distributions or loans to shareholders while the Retained Claims Bonds remain outstanding. In addition, the Retained Claims Bonds will include a provision on negative pledge, with certain exceptions relating to security (i) granted by AAA, (ii) expressly contemplated by the Irish Examinership and/or Reconstruction (or any immediate or subsequent financing in relation thereto), (iii) securing any financial indebtedness incurred by the Group which is wholly or partly guaranteed or provided by any government to the Group or incurred to enable the Group to cover

corporate expenses during the restrictions on air traffic as a result of COVID-19, or (iv) securing any trade instrument arising in the Group's ordinary course of trading.

NAS13

The existing NAS07 and NAS08 bond issues shall, subject to certain conditions as more particularly described in the Summons, be converted to NOK and written down to NOK 750,000,000 (the "NAS13 Bonds") and the NAS07 Bond Terms and NAS08 Bond Terms shall be combined and amended to reflect the terms set out below ("NAS13 Bond Terms").

The NAS13 Bond Terms shall be based on the standard Nordic Bond Terms for corporate high yield bonds in Norway. The NAS13 Bonds will accrue interest at a percentage rate per annum which is the aggregate of 6-month NIBOR with a margin of 2 per cent, however such that no interest shall accrue on the NAS13 Bonds from and including the issue date until 1 June 2023. The NAS13 Bonds includes a default interest rate of 2 per cent p.a. and shall have the following amortization and repayment profile:

| Payment Date | Amount |
|-----------------------------|------------------------|
| 30 days from Issue Date | NOK 50,000,000 |
| One year from Issue Date | NOK 125,000,000 |
| Two years from Issue Date | NOK 125,000,000 |
| Three years from Issue date | NOK 125,000,000 |
| Four years from Issue Date | NOK 125,000,000 |
| Maturity Date | NOK 200,000,000 |
| Sum | NOK 750,000,000 |

The NAS13 Bond Terms shall include similar covenants as the Retained Claims Bonds, in addition to restrictions on the owner which from time to time holds the slots of the Group at London Gatwick Airport (the "Slot Owner"). Slot Owner covenants shall include certain obligations imposed on the Company to, amongst other, procure that the Slot Owner maintain its status as an air carrier and retain ownership of all slots held by the Group at London Gatwick Airport, save that the Slot Owner may sell, trade, swap or otherwise dispose of slots to the extent all material consideration in such transaction is cash and provided that proceeds are paid into a pledged account secured in favour of the bondholders. In addition, the Company shall procure that the Slot Owner maintains liquidity of no less than USD 2,000,000 and that the Slot Owner does not incur any financial indebtedness other than amounts arising in relation to intra-group aircraft leasing or intercompany claims, subject to intercompany claims in the excess of NOK 10,000,000 and expected to be outstanding for more than 3 months having been assigned to serve as security for the bondholders. The NAS13 Bond Terms shall also contain a cross-default threshold of NOK 75 000 000, as well as market standard events of default including non-payment, breach of obligations, misrepresentation, insolvency proceedings, creditor's process and unlawfulness. The NAS13 Bonds shall remain secured by the Group's take-off and landing slots at London Gatwick Airport.

NAS09

The NAS09 bonds will be repaid by the Company upon emergence from the Reconstruction. NAS09 will be repaid at par value of NOK 250,000,000, plus fees and expenses and accrued interest.

Aircraft leases and financing arrangements

The Group is reducing its lease liabilities and aircraft financing liabilities after 31 December 2020 through its restructuring process. At the date of this Registration Document, the Group has entered into aircraft leasing and financing agreements or is documenting agreements, and expects to have (conditional on a successful outcome of the restructuring process) an aggregate amount of lease liabilities and aircraft financing in a range from NOK 5,800 million to NOK 6,300 million.

5. INDUSTRY OVERVIEW

This Section 5 includes selected general information about the industry in which the Group operates, and is not a complete nor comprehensive description of such industry. The following discussion and the discussion appearing elsewhere of this Registration Document also contain information sourced from third parties.

5.1 The Airline Market

While on the one hand the airline industry is characterized by intense competition and stringent streamlining requirements, it has also historically been characterized by substantial growth. Continuous efficiency enhancements in combination with the liberalization of the industry in the 1990s contributed to fundamental changes in the airline industry. Liberalization has predominantly led to more competition and the emergence of low-cost carriers.

The Group has over the last decade become one of the largest low-cost carriers in the world.¹⁴ In addition to a vast domestic route network in Norway, Sweden, Denmark, Finland and Spain, the Group's route network has historically stretched across Europe into North Africa, the Middle East, the Americas and Southeast Asia. In 2019, the Group's long-haul business comprised more than 60 intercontinental routes to 20 destinations. Following the COVID-19 pandemic and recent restructurings in 2020 and 2021, the Group has decided to reduce the fleet and focus on the domestic and short haul route network in the Nordics and Europe. Please refer to Section 4 "Presentation of the Group" for further details.

5.2 Historical air traffic growth and market forecast

In 2019, average monthly year-over-year growth in ASK was 3.5 percent, as several carriers (including the Group) reduced growth targets compared to previous years¹⁵.

In line with ASK, global growth in revenue passenger kilometers ("RPK") has also slowed in 2019 compared to 2018. According to figures from the Assembly of the International Civil Aviation Organization ("ICAO"), average monthly year-over-year growth declined from 6.5 percent in 2018 to 4.3 percent in 2019. The largest decline in RPK growth occurred in Africa and the Middle East, i.e. outside of the areas where the Group historically has been the most active¹⁵. In 2020, total number of passengers was down -60% from 2019 to 1.8 billion, driven by the COVID-19 pandemic. This represents a set-back to 2003 levels. The number of international passengers in 2020 was down -74%.

As shown by the figure below, air traffic has historically proven resilient to external shocks and slow economic growth, demonstrating the world's appreciation of the benefits aviation brings. The figure does however not include the COVID-19 outbreak, which has severely impacted the airline industry and induced significant uncertainty to the overall market. The potential implications from COVID-19 on the airline industry are addressed separately in section 5.8 "COVID-19 impact".

Figure: Air travel has proven resilient to external shocks, pre-COVID-19

Source: Airbus Global Market Forecast 2019 (<https://www.airbus.com/content/dam/corporate-topics/strategy/global-market-forecast/GMF-2019-2038-Airbus-Commercial-Aircraft-book.pdf>)

For the next 20 years, the Airbus Global Market Forecast (“Airbus GMF”) estimates a compounding average growth rate (“CAGR”) in RPK of 4.3 percent, despite some downward revision of future economic growth by a number of forecasters in several regions of the world. The highest long-term growth is expected to occur in the Middle East with an RPK CAGR of 5.6 percent. In Europe, the expected RPK CAGR is 3.3 percent¹⁶. The Airbus GMF estimates are pre-COVID-19 and do not reflect the potential impact from the virus outbreak. The commercial market outlook for 2019-2039 as of December 2020 by Boeing indicates an average growth rate of 4.0 percent.

Figure: Long-term demand prediction (Airbus), pre-COVID-19

¹⁶ Source: Airbus Global Market Forecast 2019 (<https://www.airbus.com/content/dam/corporate-topics/strategy/global-market-forecast/GMF-2019-2038-Airbus-Commercial-Aircraft-book.pdf>)

The main regions for air travel are Europe, North America and Asia Pacific. In terms of growth, emerging markets are expected to be the main drivers.

Figure: Airline passenger traffic (RPK in billions) in 2019

| | Africa | Latin America | Middle East | Europe | North America | Asia Pacific |
|---------------|--------------|---------------|--------------|----------------|----------------|----------------|
| Asia Pacific | N/A | N/A | 269.8 | 569.0 | 379.4 | 4,586.5 |
| North America | N/A | 286.1 | 96.7 | 620.5 | 2,572.1 | 379.4 |
| Europe | 184.4 | 249.1 | 314.0 | 2,089.8 | 620.5 | 569.0 |
| Middle East | 69.5 | N/A | 480.2 | 314.0 | 96.7 | 269.8 |
| Latin America | N/A | 551.0 | N/A | 249.1 | 286.1 | N/A |
| Africa | 142.3 | N/A | 69.5 | 184.4 | N/A | N/A |

Source: Boeing Commercial market outlook 2020 forecast data

(https://www.boeing.com/resources/boeingdotcom/market/assets/downloads/2020_CMO_PDF_Download.pdf)

According to Airbus (pre-COVID-19 estimates), Asia-Pacific will have the highest share of the total world air traffic by 2038. Traffic between emerging countries is forecasted to grow at 5.9 percent per annum and emerging countries are expected to increase their share of total traffic from 30 percent in 2018 to 41 percent by 2038. Domestic Chinese traffic is forecasted to increase 3.2 times by 2038, with Domestic US traffic increasing by 50 percent from an already high base. The three major flows connecting Western Europe are all expected to grow considerably from 2018 to 2038; routes between the US, intra Western-European routes and routes to the Middle East are expected to grow 1.7, 1.6 and 2.6 times, respectively¹⁷.

5.3 Demand for air travel

Economic growth is one of the primary drivers of air traffic demand. It is highly correlated with past performance and forms much of the basis for future growth. The figure below illustrates the correlation between global Gross Domestic Product (“GDP”) and air traffic growth from 2009 to 2019, measured in RPK flown. In recent years up until 2019, air travel has grown at a higher pace than global GDP.

Figure: Relationship between global GDP growth and RPK growth

Sources: World Bank (<https://data.worldbank.org/indicator/ny.gdp.mktp.kd.zg?end=2018&start=2007&view=chart>), Boeing Commercial Market Outlook 2019 (<https://www.boeing.com/resources/boeingdotcom/commercial/market/commercial-market-outlook/assets/downloads/cmo-sept-2019-report-final.pdf>)

In terms of propensity to travel, inhabitants of wealthier countries travel more. This is illustrated in the figure below, which shows the relationship between GDP per capita and trips per capita for 2018, as estimated by Airbus. The figure shows that the positive correlation between GDP per capita and trips per capita is higher when GDP per capita is low. This will potentially contribute to positive demand growth from highly populated emerging countries as large parts of the population in these countries are expected to move into the middle class.¹⁸

¹⁸ Source: Boeing commercial market outlook 2019 (<https://www.boeing.com/resources/boeingdotcom/commercial/market/commercial-market-outlook/assets/downloads/cmo-sept-2019-report-final.pdf>)

Figure: Propensity to travel, relationship between GDP per capita (x-axis) and trips per capita (y-axis)

Source: Airbus Global Market Forecast 2019 (<https://www.airbus.com/content/dam/corporate-topics/strategy/global-market-forecast/GMF-2019-2038-Airbus-Commercial-Aircraft-book.pdf>)

It should be mentioned that there is a risk of overstating economic activity as a driving force to air traffic growth, especially during downturns. Although the air transport industry is subject to occasional market shocks, the industry's demand is resilient; services are often seen as essential, and spending on discretionary trips for vacations or family events is frequently high priority. Over the past 30 years, the aviation industry has experienced recessions, oil-price shocks, near pandemics, wars, and security threats, yet traffic has continued to grow on average at 5 percent annually. The COVID-19 outbreak however differs in abruptness and severity and has induced significant uncertainties to the industry. The virus outbreak has had and is likely to continue to have a larger and more severe impact on global air traffic compared to the other mentioned crises. Refer to section 5.8 “COVID-19 impact”.

5.4 Airline profitability

Lower fuel costs lead to increased airline profitability and reduced air fares. Although effects differ from country to country, lower oil prices represent a net gain for global economic growth as resources are shifted to more efficient economies on average, and consumer spending is stimulated in the world's largest oil importing economies.

In Q4 2014, the price of Brent crude oil decreased considerably and remained low throughout 2015, leading to a substantial increase in airline profitability as evidenced in the figure below. The price of Brent oil did however increase during 2016, 2017 and the first three quarters of 2018, reversing some of the positive effects on operating margins. In Q4 2018, the monthly average price of Brent crude oil dropped from USD 81 to USD 57 per barrel. The monthly average price per barrel of Brent crude oil has remained relatively stable throughout 2019, ranging from USD 59 to USD 71. The monthly average price per barrel of Brent crude oil showed a significant drop in March 2020 to USD 32, representing the lowest monthly average price since January 2016.¹⁹

5.5 Principal markets

5.5.1 Introduction

The airline sector in Europe has evolved significantly since the liberalization of the EU air transportation market in the 1990s. In 1992, EU member states adopted a final package of liberalization measures that, from 1 January 1993, permitted greater access to intra-EU international routes. In 1995, the creation of the EEA extended these measures to Norway, Iceland and Liechtenstein. In April 1997, liberalization was further extended to the domestic routes of members of the EEA, so that any EEA carrier would be able to provide passenger services on any route within the EEA without restriction on price or capacity. This changed the nature of competition in European aviation and paved the way for the growth of low-cost carriers.

Liberalization of the air transportation market has continued, with the EU having concluded horizontal agreements with a number of third-party nations, including the United Arab Emirates, as well as full open-skies agreements with other third-party nations, including the United States, Israel, the Balkan states, Georgia and Moldova. These open-skies agreements have progressively liberalized air markets, ultimately allowing any number of carriers from either contracting party to operate services on any route between them, without restrictions on price or capacity.

The EU has a mature air transport market, with 17% growth between 2016 and 2019 compared to 13-33% for other regions. The European airline market is very fragmented with Europe's top seven airline groups only controlling 55 percent of seats to/from/within Europe in summer 2018, compared with an 82 percent share for North America's top seven.²⁰ In general, legacy carriers have progressively been losing ground to low-cost carriers over the past ten years, especially in the short and medium-haul market. Between 2016 and 2019, European low-cost carriers were responsible for 72 percent of the EU+ passenger traffic growth²¹ while the majority of European legacy carriers experienced substantially lower growth. The largest low-cost carriers,

²¹ <https://op.europa.eu/en/publication-detail/-/publication/41452579-7005-11eb-9ac9-01aa75ed71a1>

Ryanair, easyJet and Wizz Air, were also the top three airlines in terms of absolute growth between 2016 and 2019.

Figure: Market concentration across different world regions

Number of groups to reach cumulative share indicated

| | Share of seats top 5 groups | 25% | 50% | 90% |
|---------------|--------------------------------|-----|-----|-----|
| North America | 72% | 2 | 3 | 16 |
| Middle East | 57% | 2 | 4 | 30 |
| Latin America | 51% | 2 | 5 | 25 |
| Europe | 43% | 3 | 7 | 47 |
| Africa | 36% | 3 | 9 | 47 |
| Asia Pacific | 33% | 4 | 11 | 49 |

Source: CAPA / EU Report 2016 - Air Transport Industry Analysis as of March 2017

(https://ec.europa.eu/transport/sites/transport/files/2016_eu_air_transport_industry_analyses_report.pdf)

According to the Centre for Aviation (“**CAPA**”), the Group was the ninth largest airline group in Europe in 2019 and the fourth largest low-cost carrier (“**LCC**”). The largest groups are Ryanair, Lufthansa and International Airline Group (“**IAG**”).²²

Note: * Note: * Indicates 2019 passenger numbers not yet reported or not available; figures are CAPA estimates based on Nov-2019 YTD growth, calendar 2019 seat growth data from OAG, or other available data. ** Figures for 12 months to Sep-2019.

The airline industry and demand for air travel are affected by both local and global economic conditions. A number of European airlines have gone out of business in recent years, including AeroSvit, Cyprus Airways, Spanair, Malév, Sky Europe, Centralwings, Silverjet, Sterling, XL Airways, Air Berlin, Monarch, WOW Air and Thomas Cook.

5.5.2 Norway

A total of 22.3 passengers arrived and departed at Norwegian airports on all commercial flights in Norway during 2020, down from 57.9 million in 2019.²³ Driven by challenging topography and scattered population, the people of Norway have become among the most frequent flyers in Europe. According to Eurostat, using passenger figures for 2018 in terms of number of flights, two of the ten busiest European routes are found in Norway. Oslo-Trondheim is the fifth busiest route, and Oslo-Bergen is the seventh busiest.²⁴ Norway is also a relatively mature market with a 2016-2019 growth in airline passenger traffic of 8%, versus 17% for EU+.²³

Figure: Air transport. Passengers, by traffic type:

| | 2010 | 2011 | 2012 | 2013 | 2014 | 2015 | 2016 | 2017 | 2018 | 2019 | 2020 |
|---------------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|
| Million passengers: | | | | | | | | | | | |

Growth:

| | | | | | | | | | | | |
|---------------|-------------|-------------|-------------|-------------|-------------|--------------|-------------|-------------|-------------|--------------|---------------|
| Domestic | 10.8% | 10.4% | 8.3% | 9.6% | 3.1% | 0.2% | 0.4% | 2.7% | 4.0% | 1.7% | -49.7% |
| International | 4.9% | 9.7% | 5.8% | 4.7% | 1.9% | -1.0% | 0.5% | 2.6% | 2.6% | 0.5% | -77.6% |
| Total | 1.7% | 9.3% | 4.3% | 1.7% | 1.1% | -1.9% | 0.5% | 2.6% | 1.7% | -0.4% | -61.5% |

Source: Statistics Norway table 08508 (<https://www.ssb.no/statbank/table/08508/>)

Over the period 2010 to 2019, the number of passengers at Norwegian airports increased by 13.5 million, equivalent to an average annual growth rate of 3.0 percent. This positive trend has been present for both domestic passengers and international passengers, however, international passenger numbers have grown faster than domestic passengers, as can be seen from the diagram above. While traffic in 2020 and 2021 has been severely affected by travel restrictions imposed as a consequence of the COVID-19 pandemic, passenger growth is expected to resume as restrictions are lifted and widespread vaccination is achieved. As an example, Avinor predicts rapid growth from 2022 and expects air traffic to have fully recovered and have reached 2019-levels after 2024²⁵. This is further supported by an analysis by IATA in July 2020²⁶. However, there is significant uncertainty tied to the forecasts and changes in travel habits as a consequence of the pandemic may affect demand permanently.

Figure: Passengers carried in 2020 at top 10 Norwegian airports

| | Million passengers | % share |
|--------------------------|-----------------------|--------------|
| Oslo Gardermoen | 9.0 | 40.3% |
| Bergen Flesland | 2.8 | 12.4% |
| Trondheim Værnes | 1.8 | 8.2% |
| Stavanger Sola | 1.7 | 7.5% |
| Tromsø Langnes | 1.3 | 6.0% |
| Bodø | 1.1 | 5.0% |
| Sandefjord Torp | 0.6 | 2.8% |
| Ålesund Vigra | 0.5 | 2.1% |
| Harstad/Narvik Evenes | 0.4 | 1.8% |
| Kristiansand Kjevik | 0.4 | 1.7% |

5.6 Market segmentation

Passenger airlines can mainly be divided into the broader categories of legacy carriers, LCC and regional carriers. Most airlines can be assigned into one or the other category, but some also overlap. Certain legacy airlines offer a set of low fares on otherwise standard services, whilst some LCCs have begun to increase the number of legacy style services that they offer. Historically, the legacy carriers have dominated the market, while in recent years LCCs have gained considerable traction. The figure below shows an overview of LCC's market share across different regions.

Figure: LCC short-haul penetration (share of total seats) by region 2018

Source: Boeing Commercial Market Outlook 2019 (<https://www.boeing.com/resources/boeingdotcom/commercial/market/commercial-market-outlook/assets/downloads/cmo-sept-2019-report-final.pdf>)

LCCs operate at significantly lower costs than legacy carriers. For an overview of cost structure among selected LCCs and legacy carriers, please see the figure below.

5.6.1 Legacy carriers

Legacy carriers operate a full-service business model, which aim to offer passengers a comprehensive service. Legacy carriers may enter into alliances with other airlines and/or code-sharing and interline arrangements. Legacy carriers typically have two or more classes of service with a broad range of supplementary services, such as catering, in-flight entertainment and various levels of ticket flexibility. As a result of the comprehensive and varied service offering, a wide range of price levels exist even on the same journey. The primary aim of these airlines is to develop certain airports as their intercontinental hubs and to feed traffic to these hubs from their own domestic markets, from intra-European markets and from intercontinental interline traffic. These airlines are focused on long-haul premium traffic and high yielding corporate accounts. Legacy carriers hope to obtain a revenue premium by providing expensive services. Regarding their short-haul traffic, they either operate these routes themselves or utilize the services of regional airlines either through ownership or franchise operations.

In Europe, the legacy carriers are predominantly made up of the flag carrier airlines, such as IAG (British Airways and Iberia), Air France-KLM and Lufthansa. In the past, the majority of these carriers were state owned and some may have benefited from state aid. Many of these carriers have been either fully privatized (for example, IAG and Lufthansa) or partly privatized (for example, Air France-KLM and SAS).

5.6.2 Low-cost carriers

Traditionally, the principal aim within the business model of a low-cost carrier is to offer as simple a product as possible and minimize the business' costs in order to offer competitive low ticket prices. Typical low-cost carrier characteristics are summarized below. Most low-cost carriers adhere to most of these characteristics. Low-cost carriers aim to maximize Load Factor and aircraft utilization rates by stimulating demand through offering flights at the lowest cost possible and typically only operating on short-haul point-to-point routes, with a smaller proportion of routes classified as medium haul. Costs are kept low by having a ticketless service, using a single aircraft-family fleet, having only one class of service and predominantly flying to less-congested secondary airports serving a destination to the extent possible. Tickets are generally sold online or directly by the airline in order to avoid agency costs and global distribution system charges. Supplementary services typically included in the ticket price offered by legacy carriers are available at an additional cost. Turnaround times are kept to a minimum by having no pre-flight seating plan for passengers. The operational model means that such airlines typically have unit costs that are as much as 50 percent lower than their full-service competitors and hence they are generally able to charge much lower prices.

European low-cost carriers include EasyJet, Norwegian, Ryanair, Vueling Airlines S.A. ("**Vueling**") and Wizz Air. Some of these carriers are independently owned (for example, EasyJet and Ryanair) whilst others have been formed and/or are owned by national flag carriers (for example, Vueling which is majority-owned by IAG or Eurowings which is owned by Lufthansa).

5.6.3 Regional carriers

Regional carriers are characterized by reference to the smaller aircraft they operate and the regional markets they serve. Regional carriers typically operate regional jets or turboprop aircraft. These regional aircraft, which are generally smaller in terms of passengers carried than those operated by European low-cost carriers, serve scheduled point-to-point European routes. There are primarily two distinct roles of regional airlines in Europe. The first is to provide passenger feed into the main hubs for their main shareholder or franchisor airline and the second is to provide region-to-region air services linking regional communities.

5.7 Recent trends in the airline industry, pre-COVID-19

Key recent trends in the airline industry revolve around political, environmental and technological factors, as well as new market models being introduced by market participants. The COVID-19 virus outbreak is not considered in this section and is addressed separately in Section 5.8 "COVID-19 Impact".

The years since 2017 have been challenging for the airline industry. Various geopolitical and macroeconomic issues impacted the trading environment, and intense competition and a rising cost environment, notably increases in fuel prices, but also labor costs in some cases, squeezed margins of all operators. In addition, terrorist attacks in Barcelona and London and the Brexit vote dulled consumer confidence and dampened demand.

These, as well as other issues, have been major contributing factors to several high-profile airline failures in recent years (Monarch, Air Berlin, Alitalia administration, WOW Air and Thomas Cook). A few of the Group's competitors have conducted mergers and acquisitions, of both distressed and non-distressed competitors, such as IAG's purchase of Air Europa and Lufthansa's purchase of Air Berlin. Additionally, several of the largest airlines in Europe have reacted to the dampened demand by decreasing growth targets. European growth in ASK is expected to slow down going into the first half of 2020 (not considering impact of COVID-19). An improved supply-demand balance can potentially have a positive impact on European airlines' profit margins. Part of the slowing growth is likely caused by the continued grounding of Boeing 737 MAXs. A re-introduction of these planes could create some upside risk to expected growth.

The industry finds itself undergoing changes with new and stricter requirements from its operating environment, which affects all operators, and customers are increasingly demanding air travel with a lower climate impact. This has resulted in a heightened focus on environmental issues by European airlines and several have launched initiatives aimed at reducing their environmental footprint. For example, the Group has,

amongst other initiatives, invested in a new weather system which analyzes the weather to optimize route choices, leading to reduced Fuel Consumption and flight time.

The continued emergence and growth of big data analytics is also affecting the airline industry. By effectively analyzing their large amounts of data, airlines are able to optimize operations and improve their offering to customers.

The Group is well positioned to react to environmental and other forces affecting the operating environment. With a wide network throughout Europe, the Group is not as reliant as some other airlines on one key market. The Group's capacity can be redeployed quickly to accommodate affected markets.

Despite the challenges affecting the airline industry, there has been continued passenger growth at the airports which have been key to the Group's business (Oslo, Stockholm, Copenhagen, Helsinki, Gatwick and Spanish bases in general).

5.8 COVID-19 impact

The impact of COVID-19 on the airline industry is unprecedented and differs in abruptness and severity to any other crisis faced in modern times. Given the abruptness and severity of the impact, there are significant uncertainties as to when the global airline market will recover to pre-crisis levels.

Figure: Air travel impact from external shocks

Source: Company

Since March 2020, most countries have imposed travel restrictions and quarantine rules for any arriving passengers. Airlines around the globe have cut capacity to match the lower demand, and projections change almost daily due to the significant uncertainty induced by the virus outbreak with regards to how it will continue to develop and impact global markets.

According to ACI, passenger traffic reached its peak levels post-COVID in August with up to 3 million passengers on busiest day (overall -69 percent in August 2020 vs August 2019). Since then, on 22 November, ACI reported 0.99 million passengers compared to 5.9 million on the comparable date 24 November 2019 (-83 percent). Overall, since January 2020, European airports experienced a loss of 1.5 billion passengers compared to 2019 (-80 percent). (Source Eurocontrol, 3 December 2020).

One of the main challenges of the COVID-19 crisis for airlines has been controlling their cash burn in order to survive until air travel demand recovers. Q2 2020 had been the worst quarter for the airlines as the industry faced unprecedented loss of revenues (circa 80% compared to the same period of the previous year), with almost full grounding of the passenger fleet despite strong cargo revenues. Airlines turned their focus on cutting expenses during this period. However, operating costs were brought down by only c. 50% year-on-year due to unavoidable semi-fixed costs such as labor and maintenance costs. In October 2020 IATA revised its yearend 2020 passenger forecasts to 68 per cent decline yoy from its July forecast of -55 per cent decline on the basis

of new travel restrictions and the weakness in forward bookings. According to IATA, the median airline’s cash would last just 8.5 months at H2 2020 rate of cash burn.

Figure: Airline Industry will continue to burn cash through 2021

Source: IATA Economics analysis (26 February 2021)

The long-term impact from COVID-19 on the global airline industry is highly uncertain and depends on various factors, inter alia, duration and magnitude of the outbreak, containment measures, consumer confidence and economic conditions. The environment is changing rapidly, and it is unclear how the virus will continue to develop and when the airline industry will see a recovery to baseline levels.

Note that all Forward-looking statements and forecasts throughout Sections 5.1 - 5.7 of this Registration Document are pre-COVID-19 and do not reflect the potential impacts from the virus outbreak. As such, these statements and forecasts are likely outdated and subject to substantial change as the situation evolve and more information becomes available.

5.9 Insurance

The Group maintains aviation insurance covering liability to passengers and crew, third-party liability, terrorist incidents and aircraft loss or damage and general insurance including property, general employer and tenant liability, accident and life insurance, travel insurance and crew related loss of license and directors' and officers' cover, in each case in amounts that are consistent with industry standards and that meet the Group's obligations under applicable laws and regulations.

6. FINANCIAL INFORMATION

6.1 Financial Information

The Company's audited consolidated financial statements as of and for the years ended 31 December 2020, 2019 and 2018 (the "Annual Financial Statements") have been prepared in accordance with IFRS, and have been incorporated by reference hereto. See Section 12.4 "Documents incorporated by reference".

The Company presents the Annual Financial Statements in NOK rounded to the nearest thousands.

The Company's Annual Financial Statements for 2020 have been audited by PwC, as set forth in their auditor report included therein.

The audit opinion for the 2020 Annual Financial Statements contained an emphasis on the material uncertainty related to going concern and identified three additional key audit matters: (i) effects from the financial restructuring on the financial statements during the first half of 2020, (ii) reclassification and valuation of assets and liabilities to held for sale and (iii) carrying value of aircraft and right of use aircraft. The opinion contains several general disclaimers, but none that are not commonly used in audit opinions of similar companies. The emphasis on material uncertainty related to going concern is reprinted below:

Material Uncertainty Related to Going Concern

We draw attention to Note 2 in the financial statements of the Group and Note 2 in the financial statements of the Company and the Board of Directors' report. As stated in the Notes and Board Directors' report, the Group and the Company are significantly impacted by the COVID-19 pandemic. Travel restrictions continue to have a negative impact on the net cash inflow from operations which in turn has reduced the company's possibility to service its debts. As a result, the company has entered into examinership in Ireland and a reconstruction process in Norway aiming to reduce debt and secure new capital. The Group and the Company are dependent on completing the ongoing Examinership and Reconstructions processes to continue its operations. These conditions, along with other matters as set forth in the Notes and the Board of Directors' report, indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter

The audit opinion for the 2019 Annual Financial Statements, issued by the Company's previous auditor, Deloitte, contained an emphasis on the material uncertainty related to going concern and identified two additional key audit matters: (i) carrying value of aircraft and value of future committed aircraft purchases and (ii) tax assets and liabilities. The opinion contains several general disclaimers, but none that are not commonly used in audit opinions of similar companies. The emphasis on material uncertainty related to going concern is reprinted below:

Material Uncertainty Related to Going Concern

We draw attention to Note 2.8 in the financial statements of the Group and Note 1 in the financial statements of the Company and the Board of Directors' report. As stated in the Notes and Board of Directors' report, the Group and the Company are significantly impacted by the current outbreak of the COVID-19. The long-term effects of the pandemic are still highly uncertain, and the Group and the Company will require additional working capital to resume the operation from its current hibernation mode as well as if the hibernation mode continues into Q1 2021. Further the Group and the Company are dependent on completing the ongoing restructuring process of the aircraft financing and other creditors. These uncertainties, along with other matters as set forth in the notes and the Board of Directors' report, indicate that a material uncertainty exists that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

6.2 Recent Developments - Financial Position of the Group

The Company is currently in adverse financial distress and is subject to Examinership in Ireland and Reconstruction in Norway, with an unpredictable outcome. Due to the current financial distress, examinership

in Ireland, reconstruction in Norway, and the unpredictable outcome of such events, historical financial information may not be representative for future operations or financial performance.

Please refer to section 4.7 for more details on the Examinership and Reconstruction process, including Norwegian's expectations to further reduce its fleet and debt obligations as part of the Restructuring Proposal and the Company's Proposal.

On 29 April 2021, the Company gave a trading update for the first quarter 2021, including a result announcement for the three month period ended 31 March 2021. The announcement is incorporated by reference to this Registration Document (see section 12.4 "Documents incorporated by reference") and shows, *inter alia*, an operating revenue of NOK 225.3 million and a loss before tax of NOK 1,461.8 million for the three month period ended 31 March 2021.

6.3 Currency and rounding

In this Registration Document, all references to "NOK" are to the lawful currency of Norway, all references to "USD" are to the lawful currency in the US, and all references to "EUR" are to the official currency of the EU. No representation is made that the NOK, USD, and EUR amounts referred to herein could have been or could be converted into NOK, USD, or EUR as the case may be, at any particular rate, or at all.

Certain figures included in this Registration Document have been subject to rounding adjustments (by rounding to the nearest whole number or decimal or fraction, as the case may be). Accordingly, figures shown for the same category presented in different tables may vary slightly. As a result of rounding adjustments, the figures presented may not add up to the total amount presented.

6.4 Overview of debt facilities and debt maturities

The table below sets forth an overview of the outstanding financial debt of the Company as per 31 December 2020. Please refer to section 4.7 for more details on Norwegian's expectations to reduce its debt as part of the Restructuring Proposal and the Company's Proposal.

| | Outstanding amount per 31 December 2020 (NOK million) |
|-----------------------------------------------------|-------------------------------------------------------|
| Aircraft financing | 3,879.6 |
| Bonds | 2,434.8 |
| Lease liabilities | 3,351.1 |
| Loan with state guarantee | 2,989.0 |
| Disposal group aircraft financing | 16,344.6 |
| Disposal group lease liabilities | 15,106.6 |
| Other | 437.2 |
| Total book value debt | 44,542.9 |
| Amortized financing costs and fair value adjustment | 1,654.1 |
| Book value of outstanding debt | 42,888.8 |

The Company uses various sources for aircraft financing. The table below sets forth an overview of the various sources that the Company currently uses as well as the outstanding amounts as per 31 December 2020.

| Financing source | # of aircraft | Book value per 31 December 2020 (NOK million) |
|---------------------------------------|---------------|-----------------------------------------------|
| US Export Credit Financing | 13 | 2,921.1 |
| US Private Placement | 7 | 1,464.3 |
| Bank loans | 3 | 785.4 |
| Enhanced Equipment Trust Commitment | 10 | 2,395.8 |
| Aircraft Finance Insurance Consortium | 14 | 5,959.3 |
| U.K. Export Credit Financing (UKEF) | 3 | 2,648.7 |
| UKEF / Japanese Operating Lease Co. | 3 | 3,496.1 |
| Finance lease | 2 | 653.5 |
| Aircraft financing | 55 | 20,324.3 |
| Aircraft lease liabilities | 76 | 17,664.6 |
| Total aircraft financing | 131 | 37,988.8 |

The table below sets forth an overview of the Company's borrowings as per 31 December 2020, including repayment schedule and anticipated interest. As the Company were in breach of the covenants, the liabilities were due at 31 December 2020. Note that the table does not include anticipated new borrowings relating to the delivery of new aircraft, nor any reduction of debt that may be carried out as part of the Restructuring Proposal and the Company's Proposal.

Bonds:

In NOK million

| Name of facility | NAS07 | NAS08 | NAS09 | USD-CONV | State guaranteed loan | Private loan |
|------------------------------|----------|----------|----------|----------|-----------------------|--------------|
| Currency | EUR | SEK | NOK | USD | NOK | NOK |
| Interest rate type | Fixed | Floating | Floating | Floating | Floating | Floating |
| Outstanding at year-end 2020 | 1,326.4 | 527.8 | 250.0 | 54.8 | 2,989.0 | 333.0 |
| Down payments 2021 | 1,326.40 | 527.8 | 250.0 | 54.8 | 2,989.0 | 333.0 |
| Interest payments 2021 | 0 | 0 | 0 | 0 | 0 | 0 |

7. BOARD OF DIRECTORS, MANAGEMENT AND EMPLOYEES

7.1 The Board

7.1.1 Overview of the Board and its responsibilities

In accordance with Norwegian law, the Board of Directors is responsible for, among other things, supervising the general and day-to-day management of its business, ensuring proper organization of its business, preparing plans and budgets for its activities, ensuring that its activities, accounts and asset management are subject to adequate controls, and undertaking investigations necessary to perform its duties.

7.1.2 The Board

The following table sets forth the members of the Company's Board of Directors as of the date of this Registration Document.

| <u>Name</u> | <u>Position</u> | <u>Has served since</u> | <u>Term expires</u> |
|----------------------------|-----------------|-------------------------|---------------------|
| Niels Smedegaard | Chair | 2019 | 2021 |
| Chris Browne | Director | 2020 | 2022 |
| Eric Holm | Director | 2019 | 2022 |
| Geir Olav Øien | Director | 2016 | 2022 |
| Ingrid Elvira Leisner | Director | 2019 | 2021 |
| Jaan Albrecht Binderberger | Director | 2020 | 2022 |
| Katrine Gundersen | Director | 2019 | 2022 |
| Sondre Gravir | Director | 2018 | 2022 |
| Vibeke Hammer Madsen | Director | 2020 | 2022 |

7.1.3 Brief biographies of the directors of the Board

Set out below are brief biographies of the directors of the Board (the "**Directors**"), including their relevant management expertise and experience, an indication of any significant principal activities performed by them outside the Company and names of companies and partnerships of which a Director is or has been a member of the administrative, management or supervisory bodies or partner the previous five years.

Niels Smedegaard, Chair of the Board

Mr. Niels Smedegaard (born 1962) was the President and CEO of DFDS Group from 2007 to 2019. He has previously held positions in companies such as Gate Gourmet Group, Swissair and SAS. Mr. Smedegaard is a Danish citizen and holds a master's degree from Copenhagen Business School.

Mr. Smedegaard also holds a number of board appointments in various European companies. Mr. Smedegaard was elected as Chair in 2019 and has been elected for the period 2019-2021. The business address is c/o Oksenøyveien 3, 1336 Lysaker, Norway.

| <u>Description</u> | <u>Information</u> |
|------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| | |

Jaan Albrecht Binderberger, Board member

Mr. Jaan Albrecht Binderberger (born 1955) was the CEO of Saudi Arabian Airlines from 2017 until early 2020, when he moved to the Holding as an Advisor to the Chairman of the company. Mr. Albrecht is a former pilot and held various management positions at Mexicana de Aviación, including Fleet Chief Pilot, Chief Operating Officer, Chief Commercial Officer and CEO of the Cargo Division. He was the CEO of Star Alliance for ten years and later held the same position at Austrian Airlines and Sunexpress before joining Saudi Arabian Airlines. Mr. Albrecht studied architecture and has a master's degree in Business Administration from Innestec Mexico City. Mr. Albrecht has been elected for the period 2020-2022 and is an independent board member.

7.2.2 Chief Executive Officer

Introduction

The CEO is responsible for the day-to-day management of the Company, a Norwegian public limited liability company (“PLLC”) and operates in accordance with the instructions set out by the Board of Directors. Among other things, the CEO of a PLLC is obligated to ensure that the company’s accounts are kept in accordance with existing Norwegian legislation and regulations, and that the assets of the company are managed responsibly.

²⁷ On 26 March 2021, the Company announced the appointment of Adrian Dunne as Executive Vice President Operations. Mr. Dunne will begin in the Company at a later unconfirmed date (expected Q3 2021). Johan Gauer mann continues to serve as interim in this role.

In addition, at least once a month the CEO of a PLLC must brief the Board of Directors about the company's activities, position and operating results.

Brief biography of Jacob Schram, the Company's Chief Executive Officer

Mr. Jacob Schram (born 1962) joined the Company as Chief Executive Officer in January 2020. He has several years of experience from large international companies, including 22 years in Circle K (previously Statoil Fuel & Retail (SFR)), where he was Group President for Europe for 14 years until he stepped down in 2018. As CEO, he led the process of publicly listing SFR on the Norwegian Stock Exchange in 2010. Previously, he has also held managing roles in McDonalds and McKinsey. During 2019 he worked with private investments, start-ups and presentations related to his book "The Essence of Business", in addition to holding the position as Senior Advisor at McKinsey. Mr. Schram has a Master of Science in Economics from Copenhagen Business School. The business address is c/o Norwegian Air Shuttle ASA, Oksenøyveien 3, 1336 Lysaker, Norway.

7.4 Overview of Options and other remuneration programs

Options program

The Company has historically had option programs that are approved by the annual general meeting of the Company (the “AGM” or the “Annual General Meeting”) for one year at the time. In 2020 however, no option program was offered to the management.

Options issued in 2019

On 7 May 2019, the Annual General Meeting of the Company adopted a share option program limited to 12,000 share options. 12,000 options under this program were granted to ten executives in May 2019. Options may be exercised in 2022 at the earliest, and any remaining options in 2026 at the latest. The exercise price is NOK 4,300 adjusted for the reverse share split, which was the average price of the NAS share on trading days during the first ten calendar days after the presentation of the Company’s first quarter 2019 financial results plus 15 percent (rounded to the nearest NOK 1).

In relation to the appointment of Jacob Schram as new Chief Executive Officer of the Company in November 2019, Jacob Schram and Geir Karlsen were awarded 3,000 share options each. The share options were given on similar terms as the 12,000 options adopted at the 2019 Annual General Meeting.

As of the date of this Registration Document, there were 14,000 outstanding share options.

Options issued in 2018

On 8 May 2018, the Annual General Meeting of the Company adopted a share option program limited to 4,000 share options. 3,800 options under this program were granted to eleven executives in September 2018. Options may be exercised in 2021 at the earliest, and any remaining options in 2025 at the latest. The exercise price was NOK 27,800, which was the average price of the NAS share on trading days during the first ten calendar days after the presentation of the Company’s second quarter 2018 financial results plus 15 percent (adjusted for the reverse share split). To maintain the incentive of the plan, the Board approved and adjustment to the

strike price from NOK 27,800 to NOK 4,300 on 24 September 2019. As of the date of this Registration Document, there were 1,000 outstanding share options with strike price NOK 4,300 and 800 outstanding share options with strike price NOK 27,800 (adjusted for the reverse share split).

The below table sets forth the outstanding share options held by the Company's management team:

| | | |
|-------------------------------|-------------|-------------|
| Options issued in year | 2018 | 2019 |
| Strike price, NOK | 4,300 | 4,300 |
| Expiry year | 2025 | 2026 |

| Name | Title | Outstanding | |
|---------------------|------------------------------|--------------------|-------|
| Jacob Schram | Chief Executive Officer | 0 | 3,000 |
| Geir Karlsen | Chief Financial Officer | 500 | 4,500 |
| Anne-Sissel Skånvik | Chief Communications Officer | 200 | 500 |

There were no changes in the amount of outstanding share options held by the Company's management team as of the date of this Registration Document.

Share savings program

In addition to the options program for the Management, the Company has implemented a share purchase savings program for the employees, whereby the employees purchase shares in the parent company by way of salary deductions, and the Company will fund up to 50 percent of the purchased shares, limited to NOK 6,000 per year. Employees are not permitted to sell the shares in a period of twelve months after date of acquisition. The Company will also distribute one bonus share per ten shares kept by the employee for two years after acquisition date.

7.5 Board sub-committees

7.5.1 The nomination committee

The nomination committee's task is to nominate candidates to the General Meeting for the shareholder-elected Directors' and deputy members' seats. The Articles of Association state that the nomination committee shall have minimum three members who shall be shareholders or representatives of shareholders. The members are elected by the General Meeting for two years at a time.

The guidelines for the nomination committee are included in the Company's Annual Corporate Governance Statement.

As described in the guidelines, the nomination committee should have contact with shareholders, the Board of Directors and the Company's executive personnel as part of its work on proposing candidates for election to the Board of Directors.

The nomination committee currently consists of the following three members:

- Mr. Sven Fermann Hermansen, pilot in the Company;
- Mr. Nils Bastiansen, Chief Investment Director Folketrygdfondet; and
- Mr. Bjarne Borgersen, Partner, Borgersen & Partners.

Mr. Sven Fermann Hermansen and Mr. Nils Bastiansen were elected by the Annual General Meeting on 30 June 2020 and Mr. Bjarne Borgersen was elected at the Extraordinary General Meeting on 17 December 2020. The members of the nomination committee are elected for two years at a time. None of the members of the

nomination committee represent the Management. The members are considered as independent of the Management and the Board. The composition of the nomination committee is regarded as reflecting the common interests of the community of Shareholders.

The business address of the nomination committee is c/o Norwegian Air Shuttle ASA, Oksenøyveien 3, 1336 Lysaker, Norway.

7.5.2 The audit committee

The audit committee was established by the Annual General Meeting in 2010. The audit committee currently consist of the following two members, who are also board members of the Company:

- Ms. Ingrid Elvira Leisner (committee chair); and
- Mr. Jaan Albrecht Binderberger

The quarterly financial reports are reviewed by the audit committee prior to Board approval and disclosure. The appointed external auditor annually presents the main features of the audit plan for the Group to the audit committee. The auditor presents a review of the Group's internal control procedures at least once a year to the audit committee, including identified weaknesses and proposals for improvements. The auditor participates in meetings with the audit committee and presents the report from the auditor that addresses the Group's accounting policy, risk areas and internal control routines.

The business address of the audit committee is c/o Norwegian Air Shuttle ASA, Oksenøyveien 3, 1336 Lysaker, Norway.

7.6 Conflicts of interest

There are currently no actual or potential conflicts of interest between the Group and the private interests or other duties of any of the members of the Board of Directors and the members of the Management.

7.7 Convictions for fraudulent offences, bankruptcy, etc.

None of the members of the Board of Directors or members of the Management have during the last five years preceding the date of this Registration Document:

- Been presented with any convictions related to indictable offences or convictions related to fraudulent offences;
- Received any official public incrimination and/or sanctions by any statutory or regulatory authorities (including designated professional bodies) or ever been disqualified by a court from acting as a member of the administrative, management or supervisory bodies of a company or from acting in the management or conduct of the affairs of any company; or
- Been declared bankrupt or been associated with any bankruptcy, receivership, liquidation or companies put into administration in his capacity as a founder, director or senior manager of a company.

7.8 Employees

Introduction

At the end 2020, the Group facilitated employment for a total 6,365 people, compared to 9,388 at the end of 2019, apprentices and staff employed in partner companies included. This includes 4,754 cabin crew and 2,377 pilots. Remaining employees are administration, ground handling and technical maintenance and warehouse.

The Company's successful apprentice program in Travel & Tourism continued in 2019 with apprentices from Norway. The program is approved by the Norwegian Educational Authorities and comprised of approximately 100 apprentices at the end of 2019. The program runs over a two to three-year period dependent on the apprentice's educational background and has year-round rolling admission. At graduation, the apprentices had successfully completed modules in Sales & Marketing, Customer Support & Booking and Ground Handling. They also had two international assignments over a longer period and had spent several months flying as cabin crew members across Scandinavia and Europe. The standard of Norwegian apprentices is at the highest level with a perfect pass rate in 2019.

The Company's human resources policy strives to be equitable, neutral and non-discriminatory. The airline industry has historically been male dominated, but NAS has a strong tradition of practicing equality since its inception in 2002. Norwegian has talented and highly competent staff and is committed to recruiting both women and men to key positions. In 2020, 45 percent of staff were female and 55 percent male. Most pilots are male, while women represent around a 5 percent share of pilots. Most cabin personnel are female, while males account for approximately 34 percent. Among administrative staff, 35 percent are female and 65 percent male. Technicians and engineers have historically been men, but in the past few years, the number of female staff has been rising. The Board of Directors has 44 percent (4/9) female representation.

Active monitoring of HSE (Health, Safety and Environment) indicators, corporate health insurance policies and continued cooperation with protective services will help ensure that a reduction of sickness leave remains a priority. Several key HSE activities are conducted in compliance with labor laws and corporate guidelines. This includes risk assessments, audits, handling of occurrence reports, conflicts, work environment surveys and following up with Group processes on base meetings for crew and technical staff. Activities also include participation in ERM organization, and regular meetings with Fatigue Risk Manager, Non-SAG and in several HSE-related projects. HSE information is also provided in connection with the training of crew, pilots, and technical staff. HSE provides leader training and seminars focusing on positive work engagement. The Group HSE function also ensures HSE supervision, leads the work on preventing addiction and abuse problems, Work Environment committees (WEC) and safety representative meetings. A well-functioning safety representative organization has been established and there is ongoing work to create WECs throughout the organization, as part of implementing HSE aligned with global requirements.

The Company is a member of NHO Aviation, which is a member of NHO, the Confederation of Norwegian Enterprise. Salary reviews are conducted through local union negotiations or according to local laws, regulations and CBA (collective bargaining agreements). The salary development reflects the social situation and market requirements and in 2019 was moderate according to the consumer price index. People working at Norwegian are employed in the country they are based and follow the laws and regulations of their respective country. However, Norwegian's policies and guidelines are based upon a Scandinavian approach according to its legacy and organizational culture. Sickness leave for the Group across all units was 7,6 % percent for 2020. This is an increase of 0,9 % from 2019, this can somewhat be related to the global pandemic of Covid-19 and the consequences of that.

²⁾ Headcount

Please refer to section 4.7 for more information on the Company's Proposal to exit the Examinership and Reconstruction process, including the proposal to reduce Norwegian's fleet and consequently its operations and thereby its employees.

8. SHARE CAPITAL AND SHAREHOLDER MATTERS

The following description includes certain information concerning the Company's share capital, a brief description of certain provisions contained in the Company's Articles of Association and Norwegian law in effect as of the date of this Registration Document. Any change in the Articles of Association is subject to approval by a General Meeting. This summary does not intend to be complete and is qualified in its entirety by the Articles of Association and Norwegian law.

8.1 Share capital and shares

8.1.1 General

NAS is a public limited liability company organized under the laws of Norway and subject to the Norwegian Public Limited Liability Companies Act, with registered office at Oksenøyveien 3, 1366 Lysaker, Norway.

8.1.2 Share capital

As of the date of this Registration Document, the Company's registered share capital is NOK 4,205,247.20 divided into 42,052,472 Shares each with a nominal value of NOK 0.10. All the Shares are issued and fully paid.

The Company has one class of shares, each Share carrying equal shareholder rights, including one voting right at the General Meeting. The Articles of Association do not provide for limitations on the transferability or ownership of Shares.

The existing Shares have been created, and any New Shares re will be created, under the Norwegian Public Limited Liability Companies Act and registered in book-entry form with the VPS. The existing Shares are, and the New Shares will be, registered under ISIN NO 001 0196140. The registrar for the Shares is DNB Bank ASA. The Company has been listed on Oslo Børs since December 2003 under the ticker NAS.

8.1.3 Warrants, convertible loans and authorizations to issue new Shares

The Company has not issued any options, warrants, convertible loans or other instruments that would entitle a holder of any such instrument to subscribe for any Shares in the Company, other than those options held by the members of Management as described in Section 7.4 "Overview of options and other remuneration programs", the November 2019 Bonds and the Perpetual Bonds. Assuming the Restructuring Proposal becomes effective, the November 2019 Bonds and the Perpetual Bonds shall cease to exist at such time, and the holders thereof shall receive Dividend Claims as described in section 4.15 above.

Further, the Company has not issued subordinated debt or transferable securities other than the Shares, the November 2019 Bonds and the Perpetual Bonds, however the Restructuring Proposal contemplates that transferable securities shall be issued, in the form of the New Capital Perpetual Bonds (which shall be subordinated), the Retained Claims Bonds and the NAS13 Bonds, each as described in section 4.15 above.

Rights Issue

The EGM held on 17 December 2020 approved to carry out a rights issue where the Company receives gross proceeds of up to NOK 400 million at a subscription price of minimum NOK 5 and maximum NOK 200 as determined at the discretion of the Board.

The resolution is as follows:

- 1. The share capital is increased by minimum NOK 0.01 and maximum NOK 8 million by issue of minimum 1 and maximum 800 million new shares, each with a nominal value as determined by the resolution "Reduction of share capital" above.*
- 2. The subscription price is minimum NOK 5 and maximum NOK 200 as determined at the discretion of the board of directors.*
- 3. The shareholders, as of a future date to be decided by the board of directors, shall have preferential rights to the new shares in proportion to their shareholding in the company. Consequently, the date of which shareholders shall be eligible to receive subscription rights, and the corresponding ex-date*

and record date for allocation of subscription rights to the shareholders shall be determined by the board of directors following the determination of the subscription price.

4. Tradeable subscription rights will be issued and registered with the Norwegian Central Securities Depository (VPS) prior to the commencement of the subscription period. The subscription rights shall be tradable from commencement of the subscription period and until 16:30 (Oslo time) two trading days prior to the end of the subscription period. Over-subscription and subscription without subscription rights is permitted.
5. The company shall prepare a prospectus for the rights offering to be approved by the Norwegian Financial Supervisory Authority. Unless the board of directors decides otherwise, the prospectus shall not be registered with or approved by any foreign prospectus authority. The new shares may not be subscribed for by investors in jurisdictions (outside Norway) where such subscription is not permitted or to whom the new shares cannot lawfully be offered without a prospectus, registration, due to local rules or similar. The company may at its discretion sell subscription rights issued to shareholders in such jurisdictions and transfer the net proceeds thereof to such shareholders.
6. The subscription period shall commence on the second business day after the Norwegian Financial Supervisory Authority has approved the prospectus for the rights offering, and shall expire at 16:30 hours (CEST) two weeks thereafter.
7. The subscription amount shall be paid in cash. Payment for the new shares shall be made no later than the fourth trading day after the expiry of the subscription period. Subscribers who have a Norwegian bank account shall provide a one-time irrevocable authorization to debit a specified Norwegian bank account for the amount payable for the shares allocated to the subscriber on or around the payment date. Further, payment regulations, including for shareholders without a Norwegian bank account, shall be included in the prospectus.
8. The new shares shall be allocated by the board of directors. The following allocation criteria shall apply:
 - a) Allocation of shares to subscribers shall be made in accordance with granted and acquired subscription rights which have been validly exercised during the subscription period. Each subscription right will give the right to subscribe for and be allocated one new share.
 - b) If not all subscription rights are validly exercised, subscribers having exercised their subscription rights and who have over-subscribed, will be allocated additional new shares on a pro rata basis based on the number of subscription rights exercised by each such subscriber. To the extent that pro rata allocation is not possible, the company shall determine the allocation by the drawing of lots.
 - c) New shares not allocated pursuant to a) and b) above will be allocated to subscribers not holding subscription rights. Allocation will be sought made on a pro rata basis based on the relevant subscription amounts.
9. The new shares will carry rights to dividends and other shareholder rights in the company from the time the share capital increase is registered with the Norwegian Register of Business Enterprises.
10. § 3 of the articles of association shall be amended to state the company's share capital and number of shares following the share capital increase.
11. The estimated costs for this capital increase are 3 per cent of the gross proceeds.
12. The board of directors may, at its discretion, determine not to implement this resolution.

Conversion of senior loans of the Group to Shares

At the EGM held on 17 December 2020, the shareholders of the Company resolved to approve to convert all or part of the Group's senior loans in the amount of up to NOK 5.18 billion as of 30 September 2020, including the Bond Loans and bank financing, to Shares at a minimum conversion price of NOK 5 and a maximum conversion price of NOK 200, subject to the outcome of the Restructuring Proposal and discussions with the applicable creditors.

The resolution is as follows:

1. *The share capital is increased by minimum NOK 0.01 and maximum NOK 10.36 million by issue of minimum 1 and maximum 1,036 million new shares, each with a nominal value as determined by the resolution "Reduction of share capital" above.*
2. *The subscription price is minimum NOK 5 and maximum NOK 200 as determined at the discretion of the board of directors.*
3. *The shares may be subscribed by lenders under the group's senior loan agreements, including bonds and bank financing, or affiliates of such lenders.*
4. *The new shares shall be subscribed for no later than 30 June 2021.*
5. *The subscription amount shall be settled by set-off (conversion) of all or parts of the group's debt under its senior loan agreements, including interest accrued on the debt being converted until and including the last interest payment date. Upon conversion, the value of debt shall if denominated in a currency other than NOK be calculated using the exchange rate published by Norges Bank on Tuesday 1 December 2020.*
6. *The new shares issued will be registered with a separate ISIN number and be subject to a lock-up to be agreed.*
7. *The new shares will carry the same rights as the other shares in the company. However, if one senior creditor subscribes for shares, which give the senior creditor (alone or on a consolidated basis) an aggregate shareholding in excess of 33.3 % of the share capital in the company following this capital increase, the company shall, if requested by the senior creditor, issue a number of shares without voting rights in a new and separate share class to such senior creditor so that the senior creditor (alone or on a consolidated basis) only holds shares representing 33.3 % of the voting rights in the company following the capital increase. The holder of shares without voting rights may at any time require that such shares be converted to ordinary shares in the company.*
8. *The new shares will carry rights to dividends and other shareholder rights in the company from the time the share capital increase is registered with the Norwegian Register of Business Enterprises.*
9. *§ 3 of the articles of association shall be amended to state the company's share capital and number of shares following the share capital increase.*
10. *The aggregate estimated costs for this capital increase are 0.04 per cent of the debt converted.*

Note that no commitments or agreements have been entered into with respect to conversion of senior loans to Shares, nor are the terms of any such conversion decided. Such conversion may therefore not be carried out on the above-mentioned terms or at all.

Conversion of lease debt and aircraft financing liabilities to Shares

At the EGM held on 17 December 2020, the shareholders of the Company resolved to approve to convert all or part of the Group's operating lease liabilities and aircraft financing liabilities in the amount of, respectively, NOK 31.73 billion and NOK 21.62 billion as of 30 September 2020, to Shares at a minimum conversion price of NOK 5 and a maximum conversion price of NOK 200, subject to the outcome of the Restructuring Proposal and discussions with the applicable creditors.

The resolution is as follows:

1. *The share capital is increased by minimum NOK 0.01 and maximum NOK 106.71 million by issue of minimum 1 and maximum 10,671 million new shares, each with a nominal value as determined by the resolution "Reduction of share capital" above.*
2. *The subscription price is minimum NOK 5 and maximum NOK 200 as determined at the discretion of the board of directors.*
3. *The shares may be subscribed for by lessors, aircraft financiers or affiliates of such lessors or aircraft financiers.*
4. *The new shares shall be subscribed for no later than 30 June 2021.*

5. *The subscription amount shall be settled by set-off (conversion) of all or parts of the debt under the lease agreements and aircraft financing agreements, including interest accrued on the debt being converted until and including the last interest payment date. Upon conversion, the value of the lease and aircraft financing debt shall be calculated using the exchange rate for USD/NOK as published by Norges Bank on Tuesday 1 December 2020. The set-off is completed by a notice to the company being made in connection with the share subscription.*
6. *The new shares issued will be registered with a separate ISIN number and be subject to a lock-up to be determined at the discretion of the board of directors.*
7. *The new shares will carry the same rights as the other shares in the company. However, if one lessor or aircraft financier subscribes for shares, which give the lessor or aircraft financier (alone or on a consolidated basis) an aggregate shareholding in excess of 33.3 % of the share capital in the company following this capital increase, the company shall, if requested by the lessor or aircraft financier, issue a number of shares without voting rights in a new and separate share class to such lessor or aircraft financier so that the lessor or aircraft financier (alone or on a consolidated basis) only holds shares representing 33.3 % of the voting rights in the company following the capital increase. The holder of shares without voting rights may at any time require that such shares be converted to ordinary shares in the company.*
8. *The new shares will carry rights to dividends and other shareholder rights in the company from the time the share capital increase is registered with the Norwegian Register of Business Enterprises.*
9. *§ 3 of the articles of association shall be amended to state the company's share capital and number of shares following the share capital increase.*
10. *The aggregate estimated costs for this capital increase are 0.04 per cent of the debt converted.*

Note that no commitments or agreements have been entered into with respect to conversion of lease liabilities and aircraft financing liabilities to Shares, nor are the terms of any such conversion decided. Such conversion may therefore not be carried out on the above-mentioned terms or at all.

Conversion of other current and non-current liabilities of the Group to Shares

At the EGM held on 17 December 2020, the shareholders of the Company resolved to approve to convert all or part of certain other current and non-current liabilities of the Group, including trade and other accounts payable, in the amount of NOK 14.84 billion as of 30 September 2020, to Shares at a minimum conversion price of NOK 5 and a maximum conversion price of NOK 200, subject to the outcome of the Restructuring Proposal and discussions with the applicable creditors.

The resolution is as follows:

1. *The share capital is increased by minimum NOK 0.10 and maximum NOK 29.69 million by issue of minimum 1 and maximum 2,969 million new shares, each with a nominal value as determined by the resolution "Reduction of share capital" above.*
2. *The subscription price is minimum NOK 5 and maximum NOK 200 as determined at the discretion of the board of directors.*
3. *The shares may be subscribed for by creditors with accounts receivable against the company or subsidiaries of the company, or affiliates of the foregoing.*
4. *The new shares shall be subscribed for no later than 30 June 2021.*
5. *The subscription amount shall be settled by set-off (conversion) of all or parts of the applicable current and non-current liabilities, including interest accrued on the debt being converted until and including the last interest payment date (if applicable). Upon conversion, the value of debt shall if denominated in a currency other than NOK be calculated using the exchange rate published by Norges Bank on Tuesday 1 December 2020.*
6. *The new shares issued will be registered with a separate ISIN number and be subject to a lock-up to be determined at the discretion of the board of directors.*

7. *The new shares will carry the same rights as the other shares in the company. However, if one creditor subscribes for shares, which give the creditor (alone or on a consolidated basis) an aggregate shareholding in excess of 33.3 % of the share capital in the company following this capital increase, the company shall, if requested by creditor, issue a number of shares without voting rights in a new and separate share class to such creditor so that the creditor (alone or on a consolidated basis) only holds shares representing 33.3 % of the voting rights in the company following the capital increase. The holder of shares without voting rights may at any time require that such shares be converted to ordinary shares in the company.*
8. *The new shares will carry rights to dividends and other shareholder rights in the company from the time the share capital increase is registered with the Norwegian Register of Business Enterprises.*
9. *§ 3 of the articles of association shall be amended to state the company's share capital and number of shares following the share capital increase.*
10. *The aggregate estimated costs for this capital increase are 0.04 per cent of the debt converted.*

Note that no commitments or agreements have been entered into with respect to conversion of certain other current and non-current liabilities of the Group, including trade and other accounts payable, to Shares, nor are the terms of any such conversion decided. Such conversion may therefore not be carried out on the above-mentioned terms or at all.

Issue of perpetual bonds

Certain creditors of the Group may be subject to regulations or investment mandates that prohibit them from owning Shares. At the EGM held on 17 December 2020, the shareholders authorised issuance of perpetual bonds to such creditors.

The resolution is as follows:

1. *The company shall issue a convertible bond pursuant to the Public Limited Liability Companies Act chapter 11. The loan shall be regulated by bond terms (the Bond Terms) entered into between the company and Nordic Trustee AS on behalf of investors.*
2. *The size of the bond issue is a minimum of NOK 1 and a maximum of NOK 15 billion (including any part of the bond issue issued in EUR, SEK or USD, converted at the fixed exchange rate set out in the Bond Terms, being the exchange rate published for each such currency published by Norges Bank on Tuesday 1 December 2020).*
3. *The bond issue will consist of bonds, each with a nominal value of EUR 1, SEK 1 or USD 1 (each a Bond).*
4. *The subscription price for each Bond is minimum EUR 0.025, SEK 0.025 or USD 0.025 and maximum EUR 1, SEK 1 or USD 1, as determined at the discretion of the board of directors.*
5. *The Bonds may only be subscribed for by the creditors of the company as determined at the discretion of the board of directors. The existing shareholders' preferential right to subscribe for bonds pursuant to the Public Limited Liability Companies Act § 11-4 is thus deviated from.*
6. *The deadline for subscription of Bonds is 30 June 2021.*
7. *The bond issue has no fixed maturity date.*
8. *The conversion right under the Bonds will expire on the date that is five years after the issue date, or at the date pursuant to any resolution by the company to extend the conversion right. As long as there is a conversion right attached to it, the Bonds may be converted into the company's ordinary shares.*
9. *The Bonds accrue no interest, save for if the company fails to extend the conversion rights in respect of the Bonds, in which event the Bonds accrue payment-in-kind interest at 20 % p.a. from the lapse of such conversion rights, and no distributions may be made in respect of equity or parity obligations to the Bonds unless all Bonds outstanding are redeemed by the company.*

10. *The loan amount constitutes the amount of obligations of the company towards subscribers that may be converted to Bonds.*
11. *The Bonds are unsecured and deeply subordinated, ranking below all secured and unsecured debt obligations of the company, senior to ordinary shares, and pari passu with the most senior ranking class of preference share of the company from time-to-time.*
12. *The new shares issued will be registered with a separate ISIN number and be subject to a lock-up to be determined at the discretion of the board of directors.*
13. *Upon conversion of Bonds to shares, a consideration per share equal to NOK 200 (the Conversion Price) shall be paid (subject to adjustment as described in item 15 below). Payment is carried out by set-off against the Bonds. The number of new shares to be issued upon conversion shall equal the aggregate nominal value of the Bonds that are to be converted, multiplied by the applicable fixed exchange rate set out in the Bond Terms, divided by the applicable Conversion Price. If this does not result in a whole number of shares, it shall be rounded down to the nearest number of whole shares. Instead of issuing new shares, the company may elect to deliver treasury shares to the holders of the Bonds.*
14. *Shares issued through conversion of Bonds will carry shareholder rights and entitle its holder to dividends from the first business date after the delivery of a conversion notice in respect of such Bonds.*
15. *Upon distributions to shareholders, subdivision or combination of shares and mergers or de-mergers, the Conversion Price shall be adjusted to the extent prescribed in the Bond Terms (based on the so-called Euro-market standard provisions as amended) which form a part of this resolution. Other than the above, the holders of the Bonds shall have rights upon decisions as mentioned in § 11-2 second paragraph no. 11 of the Public Companies Act.*
16. *The conversion right cannot be separated from the Bonds.*

Note that no commitments or agreements have been entered into with respect to issue of such bonds, nor are the terms of any such issuance decided. Such issuance may therefore not be carried out on the above-mentioned terms or at all.

Authorization to the Board to adopt capital increases by way of share issue

At the EGM held on 17 December 2020, the Board of Directors was granted a general authorization to increase the share capital.

The authorization covers increases in the share capital by up to NOK 198,666,435. This authorization is valid until the AGM in 2021, but no longer than to 30 June 2021. The preferential rights of the existing Shareholders to subscribe to the new Shares pursuant to Section 10-4 of the Norwegian Public Limited Liability Companies Act may be deviated from. The authorization may be used connected to a merger resolution and covers potential share capital increases against contribution in kind.

The mandate to increase the share capital:

1. *The board of directors is granted an authorization to increase the share capital by up to NOK 198,666,435.*
2. *The authorization applies until the ordinary general meeting of the Company in 2021, but in any case, no later than 30 June 2021.*
3. *The shareholders' preferential right pursuant to the Public Limited Companies Act § 10-4 may be deviated from.*
4. *The board of directors may determine that the new shares may carry a preferential right to distributions from the Company before the ordinary shares of the Company and/or that the new shares shall carry no or limited voting rights and be subject to transfer restrictions.*

5. *The authorization comprises capital increases against non-cash contributions and the right to incur special obligations, including mergers and demergers, cf. the Public Limited Companies Act § 13-5 and § 14-6 (2).*
6. *This authorization shall replace the previous authorization to increase the capital that is registered with the Norwegian Register of Business Enterprises with effect from the date the new authorization is registered there.*

Authorization to issue convertible loans

At the EGM held on 17 December 2020, the Board of Directors has been granted an authorization to issue convertible loans. The aggregate amount of loans that may be borrowed is NOK 10 billion (or a corresponding amount in another currency). The share capital may be increased by up to NOK 198,666,435. This authorization is valid until the AGM in 2021, but no longer than to 30 June 2021. The preferential rights of the existing Shareholders to subscribe to the new Shares pursuant to Section 10-4 of the Norwegian Public Limited Liability Companies Act may be deviated from.

The mandate to issue convertible loans:

1. *The Board of Directors is authorized to adopt resolutions regarding borrowings as mentioned in the Public Limited Companies Act § 11-1.*
2. *The aggregate amount of loans that may be borrowed is NOK 10 billion (or a corresponding amount in another currency).*
3. *The share capital may in total be increased by up to NOK 198,666,435.*
4. *The authorization applies until the ordinary general meeting of the Company in 2021, but in any case, no later than 30 June 2021.*
5. *The shareholders preferential rights upon subscription of the loans pursuant to the Public Limited Companies Act § 11-4 cf. § 10-4 and § 10-5, may be deviated from.*
6. *This authorization shall replace the previous authorization to issue convertible loans that is registered with the Norwegian Register of Business Enterprises with effect from the date the new authorization is registered there.*

8.1.4 Own Shares and mandate to acquire own Shares

As per the date of this Registration Document, the Company owns 1,380 own Shares.

Authorization to loans with interest dependent on the dividends or profits of the company

At the EGM held on 17 December 2020, the Board of Directors has been granted an authorization to issue loans in the amount of up to NOK 10 billion (or a corresponding amount in another currency) where the interest as determined at the discretion of the Board of Directors is wholly or partly dependent on the dividends that are distributed to the shareholders or the profits of the Company.

Authorization to acquire own Shares

At the AGM held on 30 June 2020, the Board of Directors has been granted authorization to repurchase the Company's own shares within a total par value of NOK 30,696,248, corresponding to 10 percent of the Company's share capital at the time of the resolution. This authorization is valid until the AGM in 2020, but no longer than to 30 June 2020.

The mandate to acquire own Shares:

"The General Meeting authorizes the Board of Directors to acquire treasury shares on the following conditions:

1. *The board of directors is authorized to acquire treasury shares with an aggregate nominal value of 30,696,248.*
2. *The authorization applies until the annual general meeting of the Company in 2021, but in any case, no later than 30 June 2021*
3. *The highest price that may be paid per share is NOK 50. The lowest price that may be paid per share is NOK 0.10.*
4. *The board of directors may at its discretion determine the method of acquisition and any disposal of the shares.*
5. *This authorization shall replace the previous authorization to acquire treasury shares.*

As of the date of this Registration Document, the Board of Directors has not used the above authorization to acquire own Shares.

8.1.5 Transferability and foreign ownership

There are no restrictions on trading in the Shares under Norwegian law, the Articles of Association or any shareholders agreement known to the Company.

There are no general restrictions on foreign ownership of the Shares, however, in accordance with articles 10 and 11 of the Articles of Association, the Board of Directors has a right to request or compel shareholders that are not being domiciled within EEA to sell shares or to redeem their shares in certain circumstances. Please refer to Section 8.4 "The Articles of Association and general shareholder matters" below for further description.

8.1.6 Legislation and rights attached to the Shares

Reference is made to the review of legislation and rights attached to the Shares in Section 8.4 "The Articles of Association and general shareholder matters".

8.2 Historical development in share capital and number of shares

Below is a table showing the development in the number of Shares and the share capital of the Company since 1 January 2016 until the date of the Prospectus (all figures in NOK), i.e. not including the New Shares:

| <u>Date of registration</u> | <u>Type of change</u> | <u>Change in share capital</u> | <u>Subscription price</u> | <u>Total issued share capital</u> | <u>No of shares</u> |
|------------------------------------------------------------|-----------------------------------------------------|--------------------------------|---------------------------|-----------------------------------|---------------------|
| Number of shares and share capital prior to 1 January 2016 | | | | 3,575,963.90 | 35,759,639 |
| 23 March 2018 | Capital increase (tranche 1 of a private placement) | 295,096.30 | 155 | 3,871,060.20 | 38,710,620 |
| 18 April 2018 | Capital increase (tranche 2 of a private placement) | 543,613.40 | 155 | 4,414,673.60 | 44,146,730 |
| 5 July 2018 | Capital increase and subsequent offering | 129,032.30 | 155 | 4,543,705.90 | 45,437,059 |
| 15 March 2019 | Capital increase (rights issue) | 9,087,131.80 | 33 | 13,630,837.70 | 136,308,377 |
| 3 December 2019 | Capital increase (private placement) | 2,725,000.00 | 40 | 16,355,837.70 | 163,558,377 |
| 20 May 2020 | Capital increase (private placement) | 40,000,000 | 1 | 56,355,837.70 | 400,000,000 |
| 20 May 2020 | Capital increase (conversion of debt) | 266,962,480.70 | 4.24919 | 306,962,480.70 | 2,669,624,807 |
| 10 June 2020 | Capital increase (conversion of debt) | 4,781,948.7 | 4.24919 | 311,744,429.4 | 3,117,444,294 |
| 17 June 2020 | Capital increase (conversion of debt) | 10,893,808 | 4.24919 | 322,638,237.4 | 3,226,382,374 |
| 26 June 2020 | Capital increase (conversion of debt) | 16,473.1 | 4.24919 | 322,654,710.5 | 3,266,547,105 |
| 2 July 2020 | Capital increase (conversion of debt) | 4,456,961.1 | 4.24919 | 327,111,671.6 | 3,271,116,716 |
| 20 July 2020 | Capital increase (conversion of debt) | 628,073.2 | 4.24919 | 327,739,744.8 | 3,277,397,448 |
| 21 July 2020 | Capital increase (conversion of debt) | 28,966,427.3 | 4.24919 | 356,706,172.1 | 3,567,061,721 |
| 3 August 2020 | Capital increase (conversion of debt) | 57,120.1 | 4.24919 | 356,763,292.2 | 3,567,632,922 |

| | | | | | |
|------------------------------------------------------------------------------------------------|------------------------------------------|------------------|---------|----------------|---------------|
| 6 August 2020 | Capital increase (conversion of debt) | 5,564,198.4 | 4.24919 | 362,270,370.5 | 3,622,703,705 |
| 7 August 2020 | Capital increase (conversion of debt) | 618,307.7 | 4.24919 | 362,888,678.2 | 3,628,886,782 |
| 19 August 2020 | Capital increase (conversion of debt) | 477,556.4 | 4.24919 | 363,366,234.6 | 3,633,662,346 |

| 3 May 2021 | Capital increase (conversion of debt) | 156,906.90 | 424.919 | 4,205,247.20 | 42,052,472 |
| Total number of shares and share capital at the date of this Registration Document: | | | | 4,205,247.20 | 42,052,472 |

8.3 Major shareholders

The table below shows, insofar as known to the Group, the largest shareholders of the Company which as of 5 May 2021 had directly or indirectly, interest in 5% or more of the issued share capital of the Company (which constitutes a notifiable holding under the Norwegian Securities Trading Act):

| Shareholder name | No. of Shares | % of shares |
|------------------|---------------|-------------|
|------------------|---------------|-------------|

| | | |
|-------------------------|-------------|--------|
| Avanza Bank AB | 5,623,399.0 | 13.37% |
| Nordnet Bank AB | 4,362,853.0 | 10.37% |
| Saxo Bank A/S | 3,867,429.0 | 9.20% |
| CLEARSTEAM BANKING S.A. | 2,958,233.0 | 7.03% |

In accordance with the disclosure obligations under the Norwegian Securities Trading Act, where a shareholder's proportion of shares and/or rights shares reaches, exceeds or falls below 5 percent, 10 percent, 15 percent, 20 percent, 25 percent, 1/3, 50 percent, 2/3 or 90 percent of the share capital or voting rights of a company listed on Oslo Børs must notify Oslo Børs immediately. The table above shows the percentage held by each such shareholder, and each shareholder with 5 percent or more of the Shares is subject to the disclosure requirement when such shareholder reaches, exceeds or falls below any of these thresholds.

There are no arrangements, known to the Company, the operation of which may at a subsequent date result in a change in control of the Company, other than what follows from the potential Restructuring.

8.4 The Articles of Association and general shareholder matters

The Company is registered with the Norwegian Register of Business Enterprises, with business registration number (Norwegian: *organisasjonsnummer*) 965 920 358. The Articles of Association of the Company are incorporated by reference to this Registration Document.

8.4.1 Introduction

According to article 3 of the Articles of Association, the Company's objective is to be engaged in aviation, other transport and travel related business activities as well as activities connected therewith. The Company may also directly or indirectly be engaged in other forms of internet-based provision of goods and services, including car-rental, hotel booking, payment services, financial services and services related to issuing of credit cards. Participation in such activities as mentioned may take place through co-operation agreements, ownership interests or by any other means.

According to article 10 and 11 of the Articles of Association, the Board of Directors has the right and duty to implement certain measures if there are circumstances that in the Board of Directors' opinion may cause the Company's or any of its subsidiaries' authorizations to carry out air traffic operations to be annulled or temporary revoked on the grounds of violation of provisions in bilateral civil aviation agreements or violation of statutory rules requiring the Company and/or its subsidiaries to be owned and controlled by shareholders who are EEA nationals. The Board of Directors has a duty to either:

- (a) request that shareholders not being domiciled within EEA to either sell shares or see to that such shares are owned and controlled by persons and/or companies domiciled within the EEA;
- (b) compel shareholders that (i) are non-EEA nationals and (ii) have acquired shares in the Company and (iii) by such acquisition cause the Company to violate provisions as mentioned in article 10 first paragraph, within a time-limit as further determined by the Board of Directors to sell shares in a portion sufficient to so as to ensure that the Company no longer violates the above mentioned provisions regarding ownership and control; or
- (c) decide that the Company shall acquire treasury shares in the Company from shareholders that (i) are non-EEA nationals and (ii) have acquired shares in the Company and (iii) by such acquisition conduce or cause the Company to violate provisions as mentioned in article 10 first paragraph of the Articles of Association (wherein such shareholders will be obliged to make such sale).

In addition to the measures included in (a) to (c) above, the Board of Directors may decide that shares that are owned by shareholders that (i) are non-EEA nationals and (ii) have acquired shares in the Company and (iii) by

such acquisition cause the Company to violate provisions as mentioned in article 10 first paragraph, shall be redeemed by reduction of the share capital of the Company, cf. the Norwegian Public Limited Liability Companies Act Section 12-7. The assessment as to whether a shareholder is an EEA national shall be based on the at any time prevailing guidelines applied by the Civil Aviation Authority.

8.4.2 Voting rights and other shareholder rights

The Company has one class of shares, and each Share carries equal voting rights at the General Meeting.

As a general rule, resolutions that shareholders are entitled to make pursuant to Norwegian law or the Articles of Association, require approval by a simple majority of the votes cast. In the case of election of directors to the Board, the person who obtains the most votes is elected to fill the vacant position.

However, as required under Norwegian law, certain decisions, including resolutions to waive preferential rights in connection with any issue of shares, convertible bonds, warrants etc., to approve a merger or demerger, to amend the Articles of Association, to authorize an increase or reduction in the share capital, to authorize an issuance of convertible loans or warrants or to authorize the Board to purchase own Shares or to dissolve the Company, must receive the approval of at least two-thirds of the aggregate number of votes cast, as well as at least two-thirds of the share capital represented at a General Meeting.

Further, Norwegian law requires that certain decisions, which have the effect of substantially altering the rights and preferences of any shares or class of shares, receive the approval of all the holders of such shares or class of shares as well as the majority required for amendments of the Articles of Association. Decisions that (i) would reduce any existing Shareholder's right in respect of dividend payments or other rights to the assets of the Company or (ii) restrict the transferability of the Shares require a majority vote of at least 90 percent of the share capital represented at the General Meeting in question as well as the majority required for amendments to the Articles of Association. Certain types of changes in the rights of shareholders require the consent of all shareholders affected thereby as well as the majority required for amendments to the Articles of Association. The Articles of Association do not contain conditions that are more significant than required by the Norwegian Public Limited Liability Companies Act, including with regard to (i) what action is necessary to change the rights of holders of the Shares, and (ii) changes in capital.

In general, in order to be entitled to vote, a Shareholder must be registered as the beneficial owner of Shares in the share register kept by the VPS or provide proof of its beneficial ownership. Beneficial owners of Shares that are registered in the name of a nominee may not be entitled to vote under Norwegian law unless such Shares are re-registered in the name of the beneficial owner, nor are any persons who are designated in the register as holding such Shares as nominees entitled to vote such Shares.

Readers should note that there are varying opinions as to the interpretation of Norwegian law in respect of the right to vote nominee-registered shares. For example, Oslo Børs has in a statement on 21 November 2003 held that in its opinion "nominee-shareholders" may vote in general meetings if they prove their actual shareholding prior to the general meeting.

Under the Norwegian Public Limited Liability Companies Act, shareholders will have preferential rights to subscribe for new securities issued by the Company, unless such rights are departed from (such departure requires a majority of two-thirds of the votes present and represented at that General Meeting).

A Shareholder will have the right to a share in the profits of the Company that are distributed as dividend, as well as any surplus following liquidation of the Company. There is no time limit after which entitlement to dividends lapses under the Norwegian Public Limited Liability Companies Act or the Articles of Association. Furthermore, there are no dividend restrictions for non-resident shareholders. See Section 10.2.1 "Taxation of dividends" for a description of the Norwegian tax rules that apply to dividend paid to domestic and foreign shareholders of the Company. The Shares are not subject to redemption rights with the exemption provided for in the Securities Note dated 6 May 2021, Section 8.9 under "Compulsory acquisition". There are no conversion provisions applicable to the Shares.

8.4.3 Additional issuances and preferential rights

If the Company issues any new Shares, including bonus share issues, its Articles of Association must be amended, which requires the same vote as other amendments to its Articles of Association. In addition, under Norwegian law, the shareholders have a preferential right to subscribe to issues of new Shares. The preferential rights to subscribe to an issue may be waived by a resolution in a General Meeting passed by the same vote required to approve amendments to the Articles of Association. A waiver of the shareholders' preferential rights in respect of bonus issues requires the approval of all outstanding shares, irrespective of class.

The General Meeting may, with a vote as required for amendments to the Articles of Association, authorize the Board of Directors to issue new Shares, and to waive the preferential rights of shareholders in connection with such issuances. Such authorization may be effective for a maximum of two years, and the par value of the shares to be issued may not exceed 50 percent of the registered nominal share capital when the authorization is registered.

Under Norwegian law, bonus shares may be issued, subject to approval by a General Meeting, by transfer from the Company's distributable equity or from its share premium reserve. Any bonus issues may be effectuated either by issuing shares or by increasing the par value of the shares outstanding.

To issue shares to holders who are citizens or residents of the United States upon the exercise of preferential rights, the Company may be required to file a registration statement in the United States under United States securities laws. If the Company decides not to file a registration statement, such holders may not be able to exercise their preferential rights and in such event would be required to sell such rights to eligible Norwegian persons or other eligible non-US holders to realize the value of such rights. See the Securities Note dated 6 May 2021, section 1.2 under "Risks related to the Shares".

8.4.4 Shareholder vote on certain reorganizations

A decision to merge with another company or to demerge requires a resolution of the shareholders passed by two-thirds of the aggregate votes cast at a General Meeting. A merger plan or demerger plan signed by the Board of Directors along with certain other required documentation, would have to be sent to all shareholders at least one month prior to the General Meeting.

8.4.5 Legal constraints on the distribution of dividends

Dividends may be paid in cash or in some instances in kind. The Norwegian Public Limited Liability Companies Act provides the following constraints on the distribution of dividends applicable to the Company:

- Section 8-1 of the Norwegian Public Limited Liability Companies Act provides that the Company may distribute dividend to the extent that the Company's net assets following the distribution covers (i) the share capital, (ii) the reserve for valuation variances and (iii) the reserve for unrealized gains. The total nominal value of own shares which the Company has acquired for ownership or as security prior to the balance sheet date, as well as credit and security which, pursuant to Section 8-7 to Section 8-10 of the Norwegian Public Limited Liability Companies Act fall within the limits of distributable equity, shall be deducted from the distributable amount.
- The calculation of the distributable equity shall be made on the basis of the balance sheet included in the approved annual accounts for the last financial year, provided, however, that the registered share capital as of the date of the resolution to distribute dividend shall be applied. Following the approval of the annual accounts for the last financial year, the General Meeting may also authorize the Board of Directors to declare dividend based on the Company's annual accounts. Dividend may also be resolved by the General Meeting based on an interim balance sheet which has been prepared and audited in accordance with the provisions applying to the annual accounts and with a balance sheet date not further into the past than six months before the date of the General Meeting's resolution.
- Dividend can only be distributed to the extent that the Company's equity and liquidity following the distribution is considered sound.

The Norwegian Public Limited Liability Companies Act does not provide for any time limit after which entitlement to dividends lapses. Subject to various exceptions, Norwegian law provides a limitation period of

three years from the date on which an obligation is due. There are no dividend restrictions or specific procedures for non-Norwegian resident shareholders to claim dividends. For a description of withholding tax on dividends applicable to non-Norwegian residents, see Section 10.3 “Foreign shareholders - Norwegian taxation”.

8.4.6 Procedure for dividend payments

Any dividends on the Shares will be denominated in NOK. Any dividends or other payments on the Shares will be paid through the Company's registrar in the VPS, DNB Securities Services. Dividends and other payments on the Shares will be paid, on a payment date determined by the Company, to the bank account registered in connection with the VPS account of the registered shareholder as of the record date for the distribution.

Dividends and other payments on the Shares will not be paid to shareholders who have not registered a bank account with their VPS account. Shareholders who have not received dividends for this reason will receive payment if they register a bank account with their account operator in the VPS and inform the VPS registrar of the details of such bank account.

Shareholders with a registered address outside of Norway may register a bank account in another currency than NOK with their VPS account. Shareholders who have done so will receive payment in the currency of such bank account. The exchange rate(s) applied will be the VPS registrar's rate on the date of payment.

The Norwegian Public Limited Companies Act does not provide for any time limit after which entitlement to dividends lapses. Subject to various exceptions, Norwegian law provides a limitation period of three years from the date on which an obligation is due. Accordingly, a shareholder's right to receive dividends or other distributions will lapse three years after the payment date if bank account details have not been provided to the VPS registrar within such date. Following the expiry of the limitation period, any remaining dividend amounts will be returned from the VPS registrar to the Company.

There are no dividend restrictions or specific procedures for non-Norwegian resident shareholders to claim dividends. For a description of withholding tax on dividends applicable to non-Norwegian residents, see Section 10 “Norwegian taxation”.

The Company is subject to dividend restrictions in its loan agreement(s). See Section 8.6 “Dividend policy and restrictions”.

8.4.7 Related party transactions

Please refer to Section 12.5 “Related party transactions” for a description of the Group's agreement with related parties.

8.4.8 Minority rights

Norwegian law contains a number of protections for minority shareholders against oppression by the majority, including but not limited to those described in this and preceding paragraphs. Any Shareholder may petition the courts to have a decision of its General Meeting declared invalid inter alia on the grounds that it unreasonably favors certain shareholders or third parties to the detriment of other shareholders or the Company itself. In certain circumstances, shareholders may require the courts to dissolve the company as a result of such decisions.

Shareholders holding 5 percent or more of the Company's share capital (individually or as a group) have the right to demand in writing that the Company holds an Extraordinary General Meeting to discuss or resolve specific matters. In addition, any Shareholder may in writing demand that the Company places an item on the agenda for any General Meeting if it is notified to the Board of Directors at least seven days before the deadline to call for that General Meeting together with a proposal for resolution or an explanation as to why the item is to be placed on the agenda. If the notice has been issued when such a written demand is presented, a renewed notice must be issued if at least 21 days remain before the General Meeting is to be held.

8.4.9 Liability of Directors

Directors owe a fiduciary duty to the Company and the shareholders. Such fiduciary duty requires that each Director acts in the best interests of the Company when exercising his or her functions and exercise a general duty of loyalty and care toward the Company. The Directors' principal task is to safeguard the interests of the Company.

Directors may each be held liable for any damage they negligently or wilfully cause the Company. Norwegian law permits the General Meeting to exempt any such person from liability, but the exemption is not binding if substantially correct and complete information was not provided at the General Meeting when the decision was taken. If a resolution to grant such exemption from liability or not to pursue claims against such a person has been passed by a General Meeting with a smaller majority than that required to amend the Articles of Association, shareholders representing more than 10 percent of the share capital or, if there are more than 100 shareholders, more than 10 percent of the shareholders may pursue the claim on the Company's behalf and in its name. The cost of any such action is not the Company's responsibility but can be recovered from any proceeds it receives as a result of the action. If the decision to grant an exemption from liability or not to pursue claims is made by such a majority as is necessary to amend the Articles of Association, the minority shareholders cannot pursue the claim in the Company's name.

8.4.10 Indemnification of Directors and officers

Neither Norwegian law nor the Articles of Association contain any provision concerning indemnification by the Company or the Board of Directors. However, as of the date of this Registration Document, the Company has a board of directors' and officers' liability insurance program.

8.4.11 Liquidation and dissolution, as well as public administration and winding up

According to the Norwegian Public Limited Liability Companies Act, the Company may be liquidated by a resolution in a General Meeting passed by a two-thirds majority of the aggregate votes cast as well as two thirds of the aggregate share capital represented at that General Meeting.

The Shares rank *pari passu* in the event of a return on capital by the Company upon a liquidation or otherwise.

In the event a resolution to liquidate the Company has been made, the Company's assets shall be transformed to cash in order to cover the Company's contractual obligations and for distribution to the shareholders as long as the shareholders have not accepted to receive the dividends in kind.

8.5 Foreign exchange controls

There are currently no foreign exchange control restrictions in Norway that would potentially restrict the payment of dividends to a shareholder outside Norway, and there are currently no restrictions that would affect the right of shareholders of a company that has its shares registered with the VPS who are not residents in Norway to dispose of their shares and receive the proceeds from a disposal outside Norway. There is no maximum transferable amount either to or from Norway, although transferring banks are required to submit reports on foreign currency exchange transactions into and out of Norway into a central data register maintained by the Norwegian customs and excise authorities. The Norwegian police, tax authorities, customs and excise authorities, the National Insurance Administration and the Norwegian FSA have electronic access to the data in this register.

8.6 Dividend policy and restrictions

The Company aims to generate competitive returns to its shareholders. The Board has recommended not to distribute dividends but to retain any earnings. The Company has not paid dividends during the years that ended on 31 December 2020, 2019, 2018, 2017 and 2016, and has not paid dividends during 2021 until the date of this Registration Document.

The Group's financing arrangements include restrictions on the Group's ability to pay dividends. Restrictions on the Group's ability to pay dividend also applies to the New Capital Perpetual Bonds, the Retained Claims Bonds and NAS13 (to be issued following (and conditional upon) the implementation of the Restructuring

Proposal), which includes restrictions on paying dividend in respect of any class of shares of the Company while the bonds remain outstanding.

8.7 Shareholder agreements

To the extent known by the Company, there are no shareholders agreements in force between the shareholders of the Company.

8.8 Corporate governance

The principle behind good corporate governance is to establish and maintain a strong, sustainable and competitive company in the best interest of the shareholders, employees, business associates, third parties and society at large.

The Board of Directors acknowledges and has implemented the Corporate Governance Code and will use its guidelines as the basis for the Board's governance duties in all areas. The Board of Directors publishes an annual statement on how the Group complies with the Corporate Governance Code in the Group's annual report. The Group complies with the Corporate Governance Code.

9. REGULATORY OVERVIEW

9.1 Introduction

The Group is subject to extensive and complex rules and regulations, both on a domestic and international level, including numerous EU regulations applicable throughout the EEA. The influence of national governments over civil aviation in the EEA is decreasing as a result of new EU regulations. The implementation of EU regulations has also further harmonized the national regulations of the Scandinavian countries. A summary of certain significant regulatory matters affecting the Group's activities is set out below. The summary - which is divided into descriptions of the international regulatory framework, the European regulatory framework, the Norwegian regulatory framework, the regulation of non-EEA services and other legal and regulatory developments - is not intended to provide a comprehensive description of all such regulatory matters and should not be considered exhaustive.

Through the International Air Transport Association ("IATA"), the airline industry actively works toward influencing civil aviation regulation to benefit airlines' customers and the industry as a whole. IATA is the trade association for the world's airlines, representing some 280 airlines or 83 percent of the total air traffic. It has a pivotal role through its contact with governmental agencies.

9.2 International regulatory framework

The Chicago Convention and the ICAO

The regulatory system for international air transport is based upon principles set out in the Convention on International Civil Aviation of 1944 (the "**Chicago Convention**"). The Chicago Convention has since been revised eight times (in 1959, 1963, 1969, 1975, 1980, 1997, 2000 and 2006). The Chicago Convention, with 192 contracting states (including all member states of the United Nations, except for Dominica and Liechtenstein; however, the convention was extended to cover Liechtenstein by ratification of Switzerland), establishes the general principle that each state has sovereignty over its air space (Article 1) and has the right to control the operation of scheduled air services over its territory (Article 6). International air transport rights are based primarily on traffic rights granted by individual states to other states through bilateral air transport agreements which are founded on the Chicago Convention. Each state grants the rights it receives to its designated home air carriers.

As envisioned by the Chicago Convention, ICAO was established in 1947. The aims and objectives of ICAO, an agency of the United Nations, are to develop the principles and techniques of international air navigation and to foster the planning and development of international air transport. ICAO establishes standards and recommended practices covering, for example, aircraft operations, staff licensing, aviation safety, accident investigation, airport operations and environmental protection, all with a view to ensuring conformity among the rules and regulations of the 192 member states.

The Rome Convention

The primary aim of the Convention on Damage Caused by Foreign Aircraft to Third Parties on the Surface of 1952 (the "**Rome Convention**"), is to impose strict liability on the part of the airline operator in respect of damage to third parties on the ground caused by any of such airline's aircraft, regardless of any fault on its part. The Rome Convention has 49 signatory states, including Denmark, Norway and Sweden.

The Rome Convention incorporates certain limits on liability and only applies to damage caused on the ground of a signatory state by an aircraft in flight, registered in another signatory state. ICAO has set out to modernize the Rome Convention, principally prompted by the events of 11 September 2001 and the perceived inadequacy of the compensation mechanism and liability limits contained in the convention. This process resulted in two draft ICAO conventions (concerning damage arising out of general aviation risks and acts of unlawful interference, respectively). The objective of these two new conventions is to ensure equitable benefits for victims, while not unduly increasing the economic and regulatory burden on carriers. The conventions aim to modernize the existing system by addressing the perceived inadequacies of liability limits and provision of financial security for carriers and victims, as well as provide a more predictable compensation system.

A diplomatic conference to consider the two drafts was held from 20 April to 2 May 2009. The conference adopted the two new airline conventions. The first convention is the Convention on Compensation for Damage caused by Aircraft to Third Parties Resulting From Acts of Unlawful Interference Involving Aircraft (the "**First Convention**"), including acts of sabotage and terrorism. The First Convention aims to provide compensation for damage to third parties caused by acts of unlawful interference with aircraft. Central to the First Convention is the creation of an International Civil Aviation Compensation Fund that will potentially provide compensation to persons, who suffer physical injury or property damage, as a result of unlawful interference with an aircraft in flight. The second convention is the Convention on Compensation for Damage Caused by Aircraft to Third Parties (the "**Second Convention**"). The Second Convention covers damages caused as a result of matters, other than those involving unlawful interference and provides for victims to be compensated. It may still take years before the new conventions are ratified and come into effect.

The Montreal Convention

The Convention for the Unification of Certain Rules for International Carriage by Air of 1999 (the "**Montreal Convention**") establishes airline liability in the case of death or injury to passengers, damage or loss of baggage and cargo. It unifies all of the different international treaty regimes covering airline liability that had developed since 1929, and the Montreal Convention is designed to be a single, universal treaty to govern airline liability around the world. As of the end of 2017, there were 127 parties to the Montreal Convention, including all EU member states, Norway, the United States, China and Japan. Under Regulation (EC) No. 889/2002, amending Regulation (EC) No. 2027/97 on air carrier liability in the event of accidents, the rules of the Montreal Convention have been extended to apply to all flights, whether domestic or international, operated by airlines with operating licenses granted by EU member states. A number of fast-growing aviation markets in Asia, such as Thailand, and Vietnam, have yet to sign up. This means that a patchwork of liability regimes continues to exist around the world.

The EU-US Open Skies Agreement

The so-called "EU-US Open Skies Agreement" was signed on 30 April 2007 and became effective on 30 March 2008, replacing existing bilateral agreements between EU member states and the United States, creating an "open-skies" framework. Under the agreement, every EU and US airline is authorized to fly between any airport within the EU and the United States. US airlines are also allowed to fly between points in the EU. However, EU airlines are not allowed to operate domestic flights within the United States. On 16 June 2011, the Agreement was extended to include EEA members Norway and Iceland.

9.3 The European regulatory framework

Air Services Regulation

Pursuant to Regulation (EC) No. 1008/2008 (the "**Air Services Regulation**"), air carriers that are subject to the air traffic regulation rules of the EU must have an operating license for the transportation of passengers, mail and/or freight in commercial air traffic. An operating license is granted only if the air carrier holds an AOC. Such an AOC specifies the types of aircraft that can be operated by the air carrier as well as compliance with other safety, operational and technical specifications.

The Air Services Regulation consolidates and updates the Third Aviation Liberalization Package, which established a single EU air transport market, effective from 1 January 1993. The Air Services Regulation is part of Annex XIII of the European economic area agreement establishing the EEA (the "**EEA Agreement**") and is therefore binding on nationals of Iceland, Liechtenstein and Norway.

The Air Services Regulation sets out the financial conditions that all EU airlines (which the Air Services Regulation refers to as "Community carriers") must fulfill, in order to obtain and maintain an operating license; clarifies the criteria for the granting and validity of operating licenses in the EU; introduces uniform standards for the review and monitoring of operating licenses in the EU Member States; simplifies the procedure for fulfilling public service obligations; clarifies the framework for relations with third countries and requires that traffic rights for non-EU airlines to operate between European cities be negotiated on an European level. The Air Services Regulation also lays down the conditions for the leasing of aircraft.

The principal features of the regulatory regime established in the Air Services Regulation are as follows:

Operating licenses

The Air Services Regulation provides that an operating license may be granted to an undertaking by the EU Member State in which it has its principal place of business, subject to such undertaking having a valid AOC; demonstrating to the relevant licensing authority that it can meet its actual and potential obligations for a period of 24 months from the start of operations; and demonstrating that it can meet its fixed and operational costs for a period of three months from the start of operations, without taking account of revenue from its operations, and subject to the conditions mentioned in the next paragraph below.

Under the Air Services Regulation, an EU airline must (a) have its principal place of business in the EU Member State from which it obtained its license, (b) have air services as its main occupation and (c) be more than 50 percent owned and be effectively controlled by Qualifying Nationals and continue to be so owned and controlled. A "**Qualifying National**" includes (i) EEA nationals, (ii) Nationals of Switzerland and (iii) in respect of any undertaking, an undertaking which satisfies the conditions as to nationality of ownership and control of undertakings granted an operating license contained in Article 4(f) of the Air Services Regulation. An EU airline must also comply with insurance requirements, provide proof of good repute of its management, if required by its licensing authority and have at least one aircraft available to it through ownership or lease.

An EU airline must notify the licensing authority in advance of changes in its activities, such as the operation of certain new services, or a substantial change of scale in its activities, of a merger or acquisition, and within 14 days of a change of ownership of any single shareholding, which represents ten percent or more of its total share capital or that of its parent or ultimate holding company. The licensing authority may request a revised business plan or resubmission of approval for the license.

The license is suspended if the carrier cannot meet its obligations during a twelve-month period, although a temporary license may be issued, pending financial reorganization. The license is also suspended if the carrier furnishes false information on an important point, if the AOC is suspended or revoked, or if the carrier no longer complies with any good repute requirements.

Access to routes

The Air Services Regulation enables all EU/EEA airlines to operate any routes within the EEA and Switzerland, including routes within those states, with no restrictions on capacity and frequency.

Subject to the approval of the European Commission and certain conditions, an EU Member State may make rules distributing traffic between airports serving the same city or conurbation. Such rules cannot be discriminatory.

EU Member States may also enter into agreements with airlines for the operation of services on "public service obligation" routes to ensure standards of continuity, regularity, capacity and pricing of a scheduled service to peripheral or development regions in their territories, following consultations with other EU Member States concerned and after having informed the European Commission and air carriers operating on the relevant routes.

Pricing

The Air Services Regulation allows EU airlines to fix their own fares on services provided within the EU, subject to EU competition law and to fares agreed for public services obligations. The Air Services Regulation also specifies that the published price for a service shall include the fare and all applicable taxes, charges, surcharges and fees that are unavoidable and foreseeable at the time of publication. In addition, details must be given of the different components of the price (fares, taxes, airport charges and other costs).

Airport slot allocation

The rules for the allocation of slots at coordinated airports in the EEA and Switzerland are contained in Council Regulation (EEC) No. 95/93 (as amended by Regulation (EC) No. 793/2004) (the "**Slot Regulation**"). The principal objective of the Slot Regulation is to facilitate competition between airlines and to encourage and support new entrants in the EU air transport market. The Slot Regulation is part of the EEA Agreement (Annex XIII) as well as of the EU-Switzerland Air Transport Agreement and is therefore binding on Iceland, Liechtenstein, Norway and Switzerland.

The Slot Regulation provides for the designation by EU Member States of congested airports for coordination by independent coordinators, whose appointment must be ensured by the EU Member States concerned. The Slot Regulation draws a distinction between "coordinated" airports and "schedules-facilitated" airports.

A schedules-facilitated airport is an airport where there is potential for congestion during some periods of the day, week or year, which is amenable to resolution by voluntary co-operation between air carriers and where a schedules facilitator has been appointed to facilitate the operations of air carriers, operating services or intending to operate services at that airport.

A coordinated airport means an airport where, in order to land or take off, it is necessary for an air carrier or any other aircraft operator to have been allocated a slot by a coordinator. EU Member States are obliged to carry out a thorough capacity analysis of an airport (a) when they consider it necessary, (b) when requested to do so either by air carriers representing more than half of the operations at the airport in question, or the airport's managing body or (c) upon request of the European Commission. The EU Member State will make its decision whether to designate an airport as coordinated, on the basis of this capacity report and consultation with the managing body of the airport, the air carriers, their representatives and representatives of general aviation and air traffic control.

The main principles of the Slot Regulation affecting slot allocation are the following:

- (a) Provision for the long established principle of historical precedence, under which an airline, holding and using a series of slots for a particular industry scheduling period (winter or summer) shall be entitled to that series of slots in the next equivalent period, subject primarily to the "use-it-or-lose-it" rule. The "use-it-or-lose-it" rule means that in order to claim such historical precedence the airline must have operated the series of slots for at least 80 percent of the time during the scheduling period, for which they were allocated. Otherwise, all the slots constituting the series are placed in the slot pool.²⁸
- (b) The creation of a slot pool into which newly-created slots (created through increases in hourly scheduling limits or new runway capacity) are placed, together with slots returned, either voluntarily or under the "use-it-or-lose-it" rule and slots otherwise unclaimed under historical precedence. 50 percent of the pool slots must be allocated to new entrants, unless they request a lesser number. A new entrant is defined as (i) an airline requesting, as part of a series of slots, a slot at an airport on any day on which that airline holds or has been allocated fewer than five slots or (ii) an airline which requested a series of slots for a non-stop service between two airports in the EU, where at most two other carriers operate a direct service between those airports or airport systems on that day and where the applicant airline holds or has been allocated fewer than five slots on that day for that service or (iii) any air carrier requesting a series of slots at an airport for a non-stop service between that airport and a regional airport, where no other air carrier operates an air service between those airports on that day, where the applicant holds or would hold fewer than five slots at that airport on that day for that service. Any airline with more than five percent of all slots at an airport or more than four

²⁸ Due to the COVID-19 outbreak, the use-it-or-lose-it" rule has been temporarily suspended though Regulation (EU) 2020/459 amending Council Regulation (EEC) No 95/93 on common rules for the allocation of slots at Community airports, involving that slots allocated in certain periods shall be considered as having been operated by the air carriers to which they were allocated.

percent of slots at an airport system (being two or more airports grouped together and serving the same city or conurbation, as listed in Annex II to Council Regulation (EEC) 2408/92) cannot qualify as a new entrant.

- (c) Recognition of additional rules. Airport coordinators are required to take into account additional rules and guidelines established by the air transport industry worldwide (such as the IATA Worldwide Slot Guide) or in the EU, as well as any local guidelines approved by the relevant EU Member State for the airport in question, provided that such rules and guidelines do not affect the independent status of the coordinator.

Slots are not route-specific or aircraft-specific and may be used by an airline for any aircraft, type of service or destination. Slots may be exchanged one for one with other airlines. This has given rise to a mechanism for the secondary trading of slots. A practice developed, mainly at London Heathrow airport, whereby airlines exchange a valuable slot for a less valuable one (which may have been obtained from the coordinator for this purpose and is returned to the slot pool after the exchange). Payment is made by the airline receiving the more valuable slot. This has allowed airlines to receive payments of millions of pounds for trading series of valuable slots. The English High Court ruled that this practice is compatible with the Slot Regulation in *R v Airport Coordination Limited ex parte States of Guernsey Transport Board* 1999 EULR 745. Subsequently, in a communication on the application of the Slot Regulation dated 30 April 2008 (COM(2008)227 final), the European Commission stated: "The text of the Slot Regulation is silent on the question of exchanges with monetary and other consideration to reflect differences in value between slots at different times of day and other factors. Given that there is no clear and explicit prohibition of such exchanges, the Commission does not intend to pursue infringement proceedings against EU Member States, where such exchanges take place in a transparent manner, respecting all the other administrative requirements for the allocation of slots set out in the applicable legislation". Slot trading has continued at London Heathrow airport and has been practiced at London Gatwick airport and possibly, to a limited extent, at some other coordinated airports.

In December 2011, the European Commission adopted a package of measures containing a proposed revised regulation on common rules for the allocation of slots to address capacity shortages at European airports and improve the quality of services offered to passengers (the "**Better Airports Package**").

The proposed regulation has the aim of maximizing use by airlines of available capacity. In particular, under the proposed regulation:

- (d) airlines will be able to trade slots with each other at airports anywhere in the EU in a transparent way and under clear conditions. Slot trading will be supervised by national authorities;
- (e) the rules requiring airlines to demonstrate that they have used their slots sufficiently during the season will be tightened, by increasing the slot utilization threshold from 80 percent to 85 percent and the length of the slot series from the current five to ten for the winter season and 15 for the summer season. The tightening of the so-called "use-it-or-lose-it" rule should ensure that airlines who wish to keep slots for the coming season fully utilize the capacity; and
- (f) there will be additional safeguards for the independence of the slot coordinator and increased level of transparency on slots transactions.

The Better Airports Package falls under the ordinary legislative procedure of the EU; both the European Parliament and the Council are co-legislators and need to approve the same final text of the regulation. On 12 December 2012, the plenary session of the European Parliament adopted legislative resolutions at first reading, introducing amendments to the proposed regulation on slots allocation. The amendments maintain the current slot utilization thresholds at 80 percent and strengthen the penalty system to discourage airlines from holding slots without using them. The proposed revised regulation still awaits final approval by the Council of the EU.

Air carrier liability

Regulation (EC) No. 2027/97 (as amended by Regulation (EC) No. 889/2002) imposes provisions equivalent to the Montreal Convention with respect to the carriage of passengers and their baggage by air. The regulation is part of the EEA Agreement and is therefore binding on nationals of Iceland, Liechtenstein and Norway. The Montreal Convention imposes strict liability on airlines in the event of death or injury to passengers up to a maximum of the equivalent of 113,100 Special Drawing Rights (approximately USD 158,340 per passenger). Thereafter, liability is unlimited, but an airline can escape liability if it proves either that it was not negligent or guilty of a wrongful act or omission, or that the accident was caused by the fault of a third-party. The airline is also required to compensate passengers, or their survivors, for their expenses in the immediate aftermath of an accident within 15 days. Liability for loss, damage or delay to baggage is limited to 1,131 Special Drawing Rights (approximately USD 1,583).

Regulation (EC) No. 785/2004 on insurance requirements for air carriers and aircraft operators (as amended by Regulation (EC) No. 1137/2008 and Commission Regulation (EU) No. 287/2010) sets out the minimum insurance requirements for liability linked to passengers, baggage, cargo and third parties for air carriers and air traffic operators flying within, into, out of or over the territory of an EU Member State. The regulation is part of the EEA Agreement as well as the EU-Switzerland Air Transport Agreement and is therefore binding on Iceland, Liechtenstein, Norway and Switzerland and their nationals.

Passenger rights and compensation (the Flight Compensation Regulation)

Regulation (EC) No. 261/2004 (the "**Flight Compensation Regulation**") establishes common rules on compensation and assistance to passengers in the event of denied boarding, cancellation or a long delay of flights.

The rights apply to any flights, including charters, from an EU airport or to an EU airport from an airport outside the EU when operated by an EU airline. The regulation is part of the EEA Agreement as well as the EU-Switzerland Air Transport Agreement and is therefore also applicable to flights to or from an airport in Iceland, Liechtenstein, Norway and Switzerland. Where a passenger is denied boarding against his will, the airline must offer compensation and assistance, together with a choice of reimbursement of the full cost of the ticket and a return flight to the point of first departure or re-routing to the passenger's final destination, except where there are reasonable grounds to deny the passenger boarding, such as reasons of health, safety, security or inadequate travel documentation.

The compensation amount payable depends upon the length of the flight: EUR 250 for all flights of 1,500 km or less (type 1 flight); EUR 400 for all intra-EU flights of more than 1,500 km and non-intra-EU flights between 1,500 and 3,500 km (type 2 flight); and EUR 600 for all other flights (type 3 flight).

The regulation also imposes obligations with regard to care and assistance of passengers in the case of delays that exceed certain defined durations, ranging from two to four hours depending on the length of the delayed flight. A right of reimbursement also arises if a flight is delayed by more than five hours.

Where a flight is cancelled, the airline must offer passengers care and assistance together with the choice of a refund of the passenger's ticket and a return flight to the first point of departure or re-routing to the passenger's final destination. In the case of cancellation, compensation may also be payable at the same amounts as are applicable to denied boarding, unless the airline can prove that the cancellation was caused by extraordinary circumstances, which could not have been avoided, even if all reasonable measures had been taken.

A revision of Regulation (EC) No. 261/2004 is currently being considered and the European Commission has put forward a proposal creating new passenger rights and facilitating and strengthening enforcement. On 5 February 2014, the European Parliament adopted a legislative resolution on the European Commission proposal. The proposed regulation falls under ordinary legislative procedure, meaning the European Parliament and Council, as co-legislators, need to adopt the same final text. The Council may now accept the European Parliament's position or adopt its own position for further discussions with the European Parliament. On 22 May 2014, a

Presidency progress report was published in the Council Register outlining major outstanding issues with the revised regulation, which it is hoped the Council will take note of in future discussions.

Ground handling

Access to the market for ground handling at EU airports has been liberalized under Directive 96/67/EC (as updated and amended by Regulation (EC) No. 1882/2003). The aim of this directive is to provide open access to the ground handling market at European airports. EU Member States are obliged to ensure that access to the ground handling market is granted by the airport authorities, under a transparent and impartial procedure that prevents airport authorities or airlines from maintaining certain barriers to market entry. This directive is part of the EEA Agreement as well as the EU-Switzerland Air Transport Agreement and is therefore binding on airport authorities in Iceland, Liechtenstein, Norway and Switzerland.

The Better Airports Package adopted by the Commission in December 2011 includes a proposal for a new regulation on ground handling services that would repeal Directive 96/67/EU. The proposed regulation intends to improve the quality and efficiency of ground handling services at airports by:

- increasing the minimum choice of ground handlers for restricted services (baggage handling, ramp handling, refueling and oil, freight and mail services) at large airports from two to three;
- creating a new role for the airport managing body as the "ground coordinator" with overall responsibility for the coordination of ground handling services (including minimum quality standards);
- allowing EU Member States to impose a requirement on companies that win ground handling contracts in restricted markets to transfer the staff from the previous contract holder with their full existing conditions; and
- allowing mutual recognition of national approvals for ground handlers issued by EU Member States, so that a handler approved by one EU Member State would be able to provide the same services in another EU Member State.

The Better Airports Package falls under the ordinary legislative procedure of the EU; both the European Parliament and the Council are co-legislators and need to approve the same final text of the regulation. On 16 April 2013, the plenary session of the European Parliament adopted a legislative resolution at first reading, introducing amendments to the proposed regulation on ground handling services. The European Commission supports the amendments. The proposed regulation still awaits final approval by the Council of the EU.

Rights for disabled passengers

Regulation (EC) No. 1107/2006 strengthening the rights of disabled air passengers and passengers with reduced mobility ("disabled passengers") was formally adopted on 5 July 2006 and entered into force on 15 August 2006. This regulation is binding on all EU airlines. The regulation is part of the EEA Agreement as well as the EU-Switzerland Air Transport Agreement, and is therefore also binding on airlines from Iceland, Liechtenstein, Norway and Switzerland.

The regulation bans air carriers from refusing reservations or boarding to disabled passengers on the grounds of their disability. All assistance to disabled passengers must be provided free of charge. Wheelchairs and recognized assistance dogs must be accommodated on aircraft.

Reservations and boarding by disabled passengers may be refused on safety grounds or where the size of the aircraft makes embarkation or carriage physically impossible. If a disabled passenger is refused boarding, he must either be re-routed on another flight or be reimbursed. The passenger must be informed in writing of the reasons why his reservation or boarding was refused.

Airlines are responsible for all assistance on-board aircraft. Airport managing bodies are responsible for all assistance in airports but may recover the ensuing costs from airlines, which may be asked to pay a charge proportional to the total number of passengers the airport managing body embarks and disembarks at the airport, irrespective of the number of passengers with reduced mobility, which the airline carries.

Noise restrictions at EU airports

On 16 April 2014, the European Parliament adopted at second reading, under the co-decision procedure, Regulation (EU) No. 598/2014 of the European Parliament and of the Council on the establishment of rules and procedures with regard to the introduction of noise-related operating restrictions at Union airports within a Balanced Approach. The Regulation repeals Directive 2002/30/EC and leaves the responsibility for concrete decisions about noise-related operating restrictions with national and local authorities that have to follow an EU-harmonized process. The Commission will review the quality of the process and, if necessary, take action before restricting measures are implemented. The new Regulation entered into force on 13 June 2016. The Regulation does not set out noise quality goals, which will continue to derive from Directive 2002/49/EC of the European Parliament and of the Council of 25 June 2002, relating to the assessment and management of environmental noise, and other relevant Union rules or legislation within each Member State. This regulation is part of the EEA Agreement and is therefore binding on airport authorities in Iceland, Liechtenstein and Norway.

Security

According to Regulation (EC) No. 300/2008, an air carrier is required to demonstrate specific security measures as set out in, and in compliance with, a security program appropriate to meet the requirements of the national civil aviation security program, approved by the national civil aviation authority.

Within the EU, there is an ongoing effort to develop a detailed implementation plan, including the possible simplification and streamlining of the current regulations for aviation security, introduced as a direct consequence of the events of 11 September 2001. Work is also ongoing to harmonize EU regulations with corresponding rules in non-EU countries, such as those with respect to the carriage of liquids and tax-free items in cabin baggage.

Air safety

The Group's operations are subject to a wide range of safety standards. Annex III to Regulation (EEC) No. 3922/91, as amended, ("**EU OPS**") details common technical requirements, as well as safety and related procedures, applicable to commercial transportation by aircraft. The EU OPS requirements and procedures relate to, among other things, certification and supervision, flight operations, weather conditions, aircraft performance and equipment, maintenance, flight crew, cabin crew and transportation of dangerous goods.

EASA is an EU agency created under Regulation (EC) No. 1592/2002 (subsequently repealed by (EC) No. 216/2008). Under (EC) No. 216/2008 EASA's responsibilities include provision of expert advice to the EU for the purpose of new legislation, implementation and surveillance of safety rules, type-certification of aircraft and components, authorization of non-EU aircraft operators and safety analysis and research. EASA works with the national civil aviation authorities of EEA member states and has assumed certain of their functions, in the interest of aviation safety standardization across the EEA.

Implementing regulations extending EASA powers to safety certification of airports in the EU are currently under discussion and are likely to come into force in the near future.

Insurance

Regulation (EC) No. 785/2004 prescribes insurance requirements for air carriers and aircraft operators regarding their liability in respect of passengers, luggage, cargo and third parties. Each of the air carrier and aircraft operator is responsible for obtaining sufficient cover, as prescribed by this regulation. For further information about the Company's insurance coverage, see Section 5.9 "Insurance"

Competition

Airlines operating in the EU must observe EU competition rules, in particular Articles 101 and 102 of the FEU Treaty, which seek to address anti-competitive behavior. Article 101(1) prohibits agreements, decisions by

associations of undertakings and concerted practices that restrict competition, whereas Article 102 is directed toward the unilateral conduct of firms with a dominant market position, that act in an abusive manner.

An agreement that falls within Article 101(1) is not necessarily unlawful. Agreements, decisions or concerted practices, that satisfy certain conditions, may qualify for an individual exemption under Article 101(3) or fall under a so-called bloc exemption. In principle, individual entities must assess for themselves whether their agreements, concerted practices and decisions are compatible with Article 101 of the FEU Treaty.

Regulation (EC) No. 487/2009, which codifies Regulation (EC) No. 3976/87, authorizes the European Commission to apply the exemptions of Article 101(3) to certain categories of agreements and concerted practices in the air transport sector, in respect of traffic within the EU, as well as in respect of traffic between the EU and non-member states. While this authority has been used in the past, there are currently no bloc exemptions in force under Regulation (EC) No. 487/2009 or the previous Regulation (EC) No. 3976/87. It should nevertheless be noted that the European Commission has adopted general bloc exemptions for certain types of horizontal and vertical agreements that apply also to the air transport sector.

9.4 Norwegian regulatory framework

Aviation laws and regulations of Norway have been harmonized as a result of, and are to a large extent based on, international standards and EU regulations.

The principal national civil aviation law in Norway is the Norwegian Aviation Act of 1993 ("luftfartsloven") with detailed regulations issued by the national aviation regulator, the Norwegian Civil Aviation Authority ("Luftfartstilsynet").

9.5 Regulation of non-EEA services

The Group's services that involve airports located in non-EEA countries are subject to regulation under international air services agreements. These are agreements between states or between a state and a group of states (such as the EU) that establish how airlines are authorized to serve routes between the territories of the parties to the agreement, what routes can be served, regulation of pricing (if any) and conditions for operations and sales in the territory of one party for airlines authorized by the other party. Historically, many bilateral air services agreements contained provisions regarding the designation of airlines by the bilateral partners to operate air services that permitted only the designation of airlines which were owned and controlled by nationals of the relevant country. For EU airlines, the ownership and control requirements in international air services agreements have changed substantially as a result of the *Open Skies* judgment of the European Court of Justice of 5 November 2002 which ruled that the maintenance of restrictive ownership and control provisions in air services agreements with non-EU countries breached EU law.

9.6 Other legal and regulatory developments

9.6.1 Flight time limitations

Council Regulation (EEC) 3922/91 on EU civil aviation rules (as last amended by Regulation (EC) No. 859/2008 of 20 August 2008) imposes restrictions on maximum total duty time, duty block time and daily flight duty periods for crew members and stipulates rest periods. The regulation is part of the EEA Agreement, and is therefore binding on nationals of Iceland, Liechtenstein and Norway.

On 29 January 2014, the European Commission Regulation 83/2014 amending Regulation 965/2012 was published in the Official Journal. It has more than 30 provisions aimed at improving safety rules on pilot and crew fatigue, such as a reduction of flight duty time at night by 45 minutes. It became effective as of 18 February 2016. The regulation is part of the EEA Agreement, and is therefore binding on nationals of Iceland, Liechtenstein and Norway.

9.6.2 Environmental regulations

Commercial aviation uses aircraft that are internationally approved according to ICAO certification standards. Environmental approval is an integral part of national registrations of aircraft. Environmentally-based national

and/or local permits, rules and regulations provide a framework for aircraft use. The current trend is toward stricter environmental framework conditions for the airline industry.

Airlines need no separate environmental licenses or permits for their operations, but rely on permits that airport operators have, such as for handling of fuel and glycol for aircraft de-icing, runway de-icing, and threshold levels for noise and emissions. There is an exemption for the use of the hazardous gaseous fire suppression agent halon in fire extinguishers on board aircraft. Halon use is heavily restricted under the Montreal Protocol on Substances that Deplete the Ozone Layer of 1987, as amended, and airline operators must submit annual reports to the authorities on the use and storage thereof.

Emissions trading

In February 2009, Directive 2008/101/EC came into force, amending Directive 2003/87/EC and bringing the aviation industry within EU ETS. EU ETS is a cap and trade scheme established in 2003 by Directive 2003/87/EC, as a means of securing compliance with its obligations to reduce greenhouse gas emissions under the Kyoto Protocol to the United Nations Framework Convention on Climate Change.

All flights departing from, and arriving at, EU airports were to have been included within EU ETS from 2012. The legislation applies to EU and non-EU airlines alike. Emissions from flights to and from Iceland, Liechtenstein and Norway are also covered under the EEA Agreement. Incoming flights may be exempted from the EU ETS if the EU recognizes that the country of origin is taking measures to limit aviation emissions from departing flights.

EU ETS delivers a market price for carbon, capping total emissions to a fixed limit with operators required to surrender allowances for each reporting year to cover their total emissions. Under the legislation, airlines are granted a certain number of allowances free of charge based on historical emissions in designated benchmark years and their share of the total aviation market; further allowances are auctioned by EU Member States.

The inclusion of the aviation sector in EU ETS is likely to have a substantial negative effect on the European aviation industry, including the Group, despite the young age of its aircraft fleet. In addition to the financial impact, inclusion in EU ETS imposes administrative burdens (in particular, monitoring and reporting obligations) on participants.

While a challenge to the inclusion of the aviation industry in EU ETS on the grounds of international law was rejected by the European Court of Justice in 2011 (Case C-366/10), a number of non-EU countries, including China, India, Russia and the United States, remain strongly opposed to the inclusion of international aviation in EU ETS.

In April 2013, the Council of the EU adopted a decision temporarily deferring enforcement of the obligations of aircraft operations in respect of incoming and outgoing international flights under EU adoption ETS for 2012 ("stop the clock"). This derogation temporarily exempted airlines from the EU ETS requirement to report carbon emissions for flights between EU airports and third countries and sanctions will not be imposed for failure to report. It applied from 24 April 2013. EU ETS continues to apply in full for intra-EU flights. In October 2013, the European Commission published guidance (2013/C 289/01) clarifying how authorities in Member States should implement this decision, including its geographical extent and how aviation allowances should be allocated and returned for 2012.

The EU ETS Aviation Amending Regulation came into force on 30 April 2014 (Regulation (EC) No. 421/2014 amending Directive 2003/87/EC). It established a scheme for greenhouse gas emission allowance trading within the Community, in view of the implementation by 2020 of an international agreement applying a single global market-based measure to international aviation emissions. The Regulation amends the EU ETS by extending the effect of the Stop the Clock Decision of 2013 until 31 December 2016, exempting small non-commercial aircraft operators from 2013 to 2020 (and postponing obligations to report emissions for flights within the EEA?).

Following adoption by ICAO of a global Market-Based Mechanism (CORSIA), the EU in 2017 again renewed the reduction in geographical scope, which will be reviewed at the end of 2023.

In December 2018, the EU Commission adopted implementing regulation 2018/2066 pursuant to Directive 2003/87/EC and amending Commission Regulation 601/2012. The regulation shall apply to emissions and activity data occurring from 1 January 2021.

9.6.3 Taxes and charges on air travel

Air travel is subject to numerous taxes and charges, which are typically levied on the basis of national legislation and thus vary among countries. Examples of traffic charges paid by carriers and included in air fares are take-off and landing charges, emission charges, noise charges, terminal navigation charges and en route charges. Additional passenger charges are paid by every customer on top of the fare to cover, for example, the cost of airport terminals, facilities and air travel-related security. In addition, certain countries impose a special air passenger tax to travelers who depart from airports within such countries. Tickets may also be subject to a separate ticket tax as well as value added tax. Charges and taxes that are not included in an air carrier's fare must be included in the total amount shown, when the carrier advertises to the public.

In accordance with a policy issued by ICAO in the 1950s, jet fuel for international commercial aviation is untaxed. The European Commission has been advocating within ICAO to introduce a global carbon tax on jet fuel. However, there has been considerable opposition to such a tax among ICAO members and, as of the date of this Offering Memorandum, no such measures have been introduced or are planned to be introduced.

Norway levies both a carbon tax and a tax on nitrogen oxide (NOx) on aviation.

In addition, Norway levies a passenger tax on all commercial flights departing from Norwegian airports with passengers. The passenger tax is progressive depending on the length of the flight: NOK 75 per passenger on flights with final destination within Europe and NOK 200 per passenger on flights with final destination outside Europe.

9.6.4 Other legislation

The airline industry is highly regulated and airlines cannot always pass on to their customers the costs associated with regulation. Regulatory changes can have an adverse impact on airlines' costs, flexibility, marketing strategy, business model and ability to expand.

9.6.5 Material changes in the regulatory environment

There have been no material changes in the Company's regulatory environment since 31 December 2020. However, temporary amendments to aviation regulations and relief measures have been implemented to support airlines in light of the sharp drop in air traffic due to the COVID-19 pandemic. These changes are not considered material to the Company.

10. NORWEGIAN TAXATION

10.1 Introduction

Set out below is a summary of certain Norwegian tax matters related to an investment in the Company. The summary regarding Norwegian taxation is based on Norwegian laws, rules, and regulations in force in Norway as at the date of this Registration Document, which may be subject to any changes in law occurring after such date. Such changes could possibly be made on a retrospective basis. The summary does not address foreign tax laws.

The following summary is of a general nature and does not purport to be a comprehensive description of all Norwegian tax considerations that may be relevant for a decision to acquire, own or dispose of Shares. Shareholders who wish to clarify their own tax situation should consult with and rely upon their own tax advisers, as the tax legislation in Norway and, if different, in the jurisdiction in which the Shareholder is resident for tax purposes may have an impact on the income received from the Shares. Shareholders resident in jurisdictions other than Norway and shareholders who cease to be resident in Norway for tax purposes (due to domestic tax law or tax treaty) should specifically consult with and rely upon their own tax advisers with respect to the tax position in their country of residence and the tax consequences related to ceasing to be resident in Norway for tax purposes.

Please note that for the purpose of the summary below, a reference to a Norwegian or Non-Norwegian shareholder refers to the tax residency rather than the nationality of the shareholder.

10.2 Norwegian shareholders

10.2.1 Taxation of dividends

Norwegian Individual Shareholders

Dividends received by shareholders who are individuals resident in Norway for tax purposes ("**Norwegian Individual Shareholders**") are taxable as ordinary income for such shareholders at a flat rate of currently 31.68 percent (the nominal rate is 22 percent but the taxable income is multiplied with a factor of 1.44) to the extent the dividend exceeds a tax-free allowance.

The allowance is calculated on a share-by-share basis. The allowance for each share is equal to the cost price of the share multiplied by a determined risk-free interest rate based on the effective rate after tax of interest on treasury bills ("**statskasseveksler**") with three months' maturity. The allowance is calculated for each calendar year, and it is allocated solely to Norwegian Individual Shareholders holding shares at the expiration of the relevant income year.

Norwegian Individual Shareholders who transfer shares will thus not be entitled to deduct any calculated allowance related to the year of transfer. Any part of the calculated allowance one year exceeding the dividend distributed on the share ("**Excess Allowance**") may be carried forward and set off against future dividends received on, or gains upon realization of, the same share. Any excess allowance will also be included in the basis for calculating the allowance on the same share in the following years.

Norwegian Individual Shareholders may hold their shares through a share savings account (Norwegian: *Aksjesparekonto*). Dividends and capital gains related to shares held through a share savings account are not taxed until withdrawn from the account. Withdrawals from the account are only subject to tax to the extent that the withdrawal amount exceeds the amount deposited into the account by the Shareholder. The exceeding amount is taxed as ordinary income at a flat rate of currently 31.68 percent. The rules regarding tax-free allowance also apply to shares held through a share savings account.

Norwegian Corporate Shareholders

Dividends received by shareholders that are limited liability companies (and certain similar entities) resident in Norway for tax purposes ("**Norwegian Corporate Shareholders**") are effectively taxed at a rate of 0.66 percent (3 percent of dividend income from such shares is included in the calculation of ordinary income for

Norwegian Corporate Shareholders and subject to tax at a flat rate of currently 22 percent). For Norwegian Corporate Shareholders that are considered to be financial institutions (e.g. banks etc.) the applicable effective tax rate is 0.75 percent (3 percent of dividend income is subject to tax at the flat tax rate for financial institutions of currently 25 percent).

10.2.2 Taxation of capital gains on realization of shares

Norwegian Individual Shareholders

Sale, non-proportionate redemption, or other disposals of shares is considered as realization for Norwegian tax purposes. A capital gain or loss derived by a Norwegian Individual Shareholder through realization of shares is taxable or tax deductible in Norway. Such capital gain or loss is included in or deducted from the shareholder's ordinary income in the year of disposal and taxable at an effective rate of 31.68 percent (the nominal rate is 22 percent but the taxable income or deductible loss is multiplied with a factor of 1.44).

The gain is subject to tax and the loss is tax deductible irrespective of the duration of the ownership and the number of shares disposed of.

The taxable gain/deductible loss is calculated per share, as the difference between the consideration for the share and the Norwegian Individual Shareholder's cost price of the share, including any costs incurred in relation to the acquisition or realization of the share. From this capital gain, Norwegian Individual Shareholders are entitled to deduct any Excess Allowance, cf. Section 10.2.1 above. Any Excess Allowance may only be deducted in order to reduce a taxable gain, and cannot increase or produce a deductible loss, i.e., any Excess Allowance exceeding the capital gain upon the realization of a share will be annulled.

If the Norwegian Individual Shareholder owns shares acquired at different points in time, the shares that were acquired first will be regarded as the first to be disposed of, on a first-in first-out basis.

Norwegian Individual Shareholders may hold their shares through a share savings account (Norwegian: *Aksjesparekonto*). Dividends and capital gains related to shares held through a share savings account are not taxed until withdrawn from the account. Withdrawals from the account are only subject to tax to the extent that the withdrawal amount exceeds the amount deposited into the account by the Shareholder. The exceeding amount is taxed as ordinary income at a flat rate of currently 31.68 percent. The rules regarding tax-free allowance also apply to shares held through a share savings account. A loss upon realization of shares held through the account is not in itself tax deductible, but the loss will affect the amount, if any, subject to tax upon closing of the account (i.e. any withdrawal amount exceeding the amount deposited into the account).

Norwegian Corporate Shareholders

Norwegian Corporate Shareholders are exempt from tax on capital gains derived from the realization of shares qualifying for participation exemption, including shares in the Company. Losses upon the realization and costs incurred in connection with the purchase and realization of such shares are not deductible for tax purpose.

10.2.3 Taxation of Subscription Rights

Norwegian Individual Shareholders

A Norwegian Individual Shareholder's subscription for shares pursuant to a subscription right is not subject to taxation in Norway. Costs related to the subscription for the shares will be added to the cost price of the shares.

Sale and other transfer of subscription rights are considered as realization for Norwegian tax purposes. A capital gain or loss generated by a Norwegian Individual Shareholders through a realization of subscription rights is taxable or tax deductible in Norway. Such capital gain or loss is included in or deducted from the basis for the computation of ordinary income in the year of disposal. The ordinary income is taxable at an effective rate of 31.68 percent (the nominal rate is 22 percent but the taxable income or deductible loss is multiplied with a factor of 1.44).

Capital gains related to subscription rights granted to employees as a consequence of their employment will be regarded as employment income and thus taxable at a marginal (maximum) rate of 46.4 percent. The employer will be required to calculate and pay employer's social security contributions at a (maximum) rate of 14.1 percent.

Norwegian Corporate Shareholders

A Norwegian Corporate Shareholder's subscription for shares pursuant to a subscription right is not subject to taxation in Norway. Costs related to the subscription for the shares will be added to the cost price of the shares.

Sale and other transfer of subscription rights are considered a realization for Norwegian tax purposes. Norwegian Corporate Shareholders are exempt from tax on capital gains derived from the realization of subscription rights qualifying for the Norwegian participation exemption. Losses upon the realization and costs incurred in connection with the purchase and realization of such subscription rights are not deductible for tax purposes.

10.2.4 Net wealth tax

The value of shares and subscription rights held by Norwegian Individual Shareholders as at 1 January in the year of assessment (i.e. the year following the relevant fiscal year) is included in the basis for the computation of net wealth tax imposed on such shareholders. Currently, the marginal wealth tax rate is 0.85 percent of the value assessed. The value for assessment purposes for listed shares is equal to 55 percent of the listed value as of 1 January in the year of assessment (i.e. the year following the relevant fiscal year).

Norwegian Corporate Shareholders are not subject to net wealth tax.

10.3 Foreign shareholders - Norwegian taxation

10.3.1 Taxation of dividends

Non-Norwegian Individual Shareholders

Dividends distributed to shareholders who are individuals not resident in Norway for tax purposes ("**Non-Norwegian Individual Shareholders**") are, as a general rule, subject to withholding tax at a rate of 25 percent. The withholding tax rate of 25 percent is normally reduced through tax treaties between Norway and the country in which the shareholder is resident. The withholding obligation lies with the company distributing the dividends and the Company assumes this obligation. Documentation requirements apply to Non-Norwegian Shareholders who claim entitlement to a reduced withholding tax rate. Non-Norwegian Individual Shareholders may be required to provide a Certificate of tax residence, which cannot be older than three years at the time of the dividend resolution, in order to benefit from a reduced withholding tax rate.

Non-Norwegian Individual Shareholders resident within the EEA for tax purposes may apply individually to Norwegian tax authorities for a refund of an amount corresponding to the calculated tax-free allowance in respect of each individual share (please see Section 10.2 "Norwegian Shareholders" above). However, the deduction for the tax-free allowance does not apply in the event that the withholding tax rate, pursuant to an applicable tax treaty, leads to a lower taxation on the dividends than the withholding tax rate of 25 percent calculated on the gross dividend less the tax-free allowance.

If a Non-Norwegian Individual Shareholder is carrying on business activities in Norway and the shares are effectively connected with such activities, the shareholder will be subject to the same taxation of dividends as a Norwegian Individual Shareholder, as described above.

Non-Norwegian Individual Shareholders who have suffered a higher withholding tax than set out in an applicable tax treaty may apply individually to the Norwegian tax authorities for a refund of the excess withholding tax deducted.

Non-Norwegian Corporate Shareholders

Dividends distributed to shareholders that are limited liability companies not resident in Norway for tax purposes ("**Non-Norwegian Corporate Shareholders**") are, as a general rule, subject to withholding tax at a rate of 25 percent. The withholding tax rate of 25 percent is normally reduced through tax treaties between Norway and the country in which the shareholder is resident.

Dividends distributed to Non-Norwegian Corporate Shareholders resident within the EEA for tax purposes are exempt from Norwegian tax provided that the shareholder is the beneficial owner of the shares and that the shareholder is genuinely established and performs genuine economic business activities within the relevant EEA jurisdiction.

If the Non-Norwegian Corporate Shareholder holds the shares in connection with business activities in Norway, the shareholder will be subject to the same taxation as a Norwegian Corporate Shareholders, as described above.

Documentation requirements apply to Non-Norwegian Shareholders who claim entitlement to a reduced withholding tax rate or a withholding tax exemption. These documentation requirements vary depending on whether the Shareholders claims a reduced withholding tax rate in accordance with an applicable tax treaty or whether the Shareholder claims a tax exemption based on being a tax resident in another EEA country and depending on whether the Non-Norwegian Corporate Shareholder has previously qualified for a reduced rate for, or an exemption from, the withholding tax. Thus, Non-Norwegian Corporate Shareholders should consult with their own tax advisers in order to determine the documentation required. The documentation requirements apply equally to nominee registered shares.

Non-Norwegian Corporate Shareholders who have suffered to a higher withholding tax than set out in an applicable tax treaty may apply to the Norwegian tax authorities for a refund of the excess withholding tax withheld. The same applies to Non-Norwegian Corporate Shareholders within the EEA that are exempt from Norwegian tax on dividends, pursuant to participation exemption.

The withholding obligation in respect of dividends distributed to Non-Norwegian Corporate Shareholders and on nominee registered shares lies with the company distributing the dividends and the Company assumes this obligation.

10.3.2 Taxation of capital gains on realization of shares

Non-Norwegian Individual Shareholders

Gains from the sale or other disposals of shares in the Company by a Non-Norwegian Individual Shareholder will not be subject to taxation in Norway unless the Non-Norwegian Individual Shareholder holds the shares in connection with business activities carried out in or managed from Norway. In such cases the shareholder will be subject to the same taxation as Norwegian Individual shareholders.

Non-Norwegian Corporate Shareholders

Capital gains derived from the sale or other type of realization of shares in the Company by Non-Norwegian Corporate Shareholders are not subject to taxation in Norway

10.3.3 Taxation of Subscription Rights

A Non-Norwegian Shareholder's subscription for shares pursuant to a subscription right is not subject to taxation in Norway.

Capital gains derived by the sale or other transfer of subscription rights by Non-Norwegian Shareholders are not subject to taxation in Norway unless the Non-Norwegian Shareholder holds the subscription rights in connection with business activities carried out or managed from Norway. In such cases the shareholder will be

subject to the same taxation as Norwegian shareholders. Such taxation may be limited according to an applicable tax treaty or other specific regulations.

10.4 Net wealth tax

Shareholders not resident in Norway for tax purposes are not subject to Norwegian net wealth tax.

Non-Norwegian Individual Shareholders may, however, be taxable if the shareholding is effectively connected to the conduct of trade or business in Norway.

10.5 Vat and transfer taxes

No VAT, stamp or similar duties are currently imposed in Norway on the transfer or issuance of shares.

10.6 Inheritance tax

A transfer of shares through inheritance or as a gift does not give rise to inheritance or gift tax in Norway.

11. LEGAL MATTERS

11.1 Legal and arbitration proceedings

There are no governmental, legal or arbitration proceedings (including any such proceedings which are pending or threatened of which the Company is aware), during a period covering at least the previous 12 months which may have, or have had in the recent past significant effects on the Company and/or group's financial position or profitability, except from those described below in this Section 11.1.

11.1.1 Examinership, Reconstruction and chapter 15-process

On 9 November 2020, the Norwegian government announced that it would not provide additional financial support to the Company for the time being. As a consequence, the Board of Directors of the Company resolved on 17 November 2020 to seek to downsize its aircraft platform through a court-supervised process in Ireland (the Examinership). An interim examiner was appointed on 18 November 2020, and on 7 December 2020, the Irish High Court formally accepted the entry of the Company and certain of its Irish subsidiaries into the Examinership. On 8 December 2020, following formal acceptance of the Company and certain of its Irish subsidiaries into the Examinership, the Company filed for and was accepted into a supplementary Norwegian court-supervised reconstruction negotiation (the Reconstruction).

The Examinership and the Reconstruction impose a global “automatic stay” on creditors. This means that, for the duration of the processes, creditors of the companies subject to Examinership and Reconstruction (including the Company) are generally unable to take action to secure payment, and the relevant companies cannot pay or otherwise discharge liabilities incurred prior to the commencement of the processes. The Examinership and Reconstruction processes are as of the date of this Registration Document expected to be completed during Q2 2021, though may be extended.

Both Examinership and Reconstruction are corporate rescue processes whereby the directors and management continue to run the subject company, whilst independent experts (the examiner and the reconstructor, respectively) are appointed by the court to oversee the restructuring process. During the processes, restructuring proposals are presented that are voted on by creditors and, if approved by the requisite majority, become binding on the creditors. Such proposals were presented on 11 March 2021 (being the Restructuring Proposal). The Restructuring Proposal was approved by the requisite majority of creditors and sanctioned by the Irish High Court on 26 March 2021 in respect of the Examinership. In respect of the Reconstruction, the Restructuring Proposal was approved by the requisite majority of creditors on 9 April 2021, and by Oslo City Court on 12 April 2021.

On 26 April 2021, the period to appeal the Irish High Court’s order sanctioning the Restructuring Proposal expired. No appeals were served before the deadline. The period to appeal Oslo City Court’s order sanctioning the Restructuring Proposal will expire on 12 May 2021.

To ensure recognition of the Examinership and Reconstruction under US law, the Company applied for recognition under chapter 15 of the US Bankruptcy Code on 12 March 2021. The application was granted by the United States Bankruptcy Court Southern District of New York on 28 April 2021.

Please see section 4.7 for more details on the Restructuring Proposal and the Company’s Proposal to exit the Examinership and Reconstruction process.

11.1.2 Boeing

In June 2020, Norwegian issued a notice to Boeing of termination of the company’s purchase agreements of the remaining five Boeing 787 aircraft, 92 Boeing 737 MAX aircraft and the Boeing GoldCare service agreements (BSG) related to the 787 and MAX aircraft. Norwegian has in addition filed a legal claim seeking the return of predelivery payments (PDP) related to the aircraft and compensation for the company’s losses related to the grounding of the 737-Max and engine issues on the 787. Boeing has contested the Company’s position and asserted claims against the Group. It is challenging to predict the outcome, also as the Company is subject to the Examiner and Reconstruction processes.

11.1.3 Reassessment from the Norwegian tax authorities

In March 2017 and June 2018, the Norwegian Tax Authorities made a reassessment pertaining to an EEC cross-border restructuring that took place in 2013 and 2014. The restructuring was carried out under the rules of

contingent tax-free group reorganizations. The assessment was appealed, and in January 2020 the Tax Appeals Board ruled in line with the tax authorities' assessment. The ruling indicates increased tax payable for the years in question with up to NOK 300 million, a reduction in prepaid taxes of NOK 356 million and interests estimated to a maximum of NOK 1430 million up to 7 December 2020. The maximum total potential cost increase would be NOK 650 million, with a corresponding reduction in equity. Further, a negative outcome of the case could lead to a reduction in not recognized deferred tax assets of NOK 166 million with no immediate change to tax cost or equity. The disputed question is if the rules on contingent tax-free group reorganization, as they applied in 2013 and 2014, are contrary to EU law.

Norwegian and its tax advisor are of the opinion that the ruling is without merit and that it is probable that the ruling will be reversed in court. The case was heard by the Oslo Municipality court 12-20 April 2021 and a ruling is expected by 20 May 2021. The Group has not made any provision for any potential tax claim in the Annual Financial Statements. Pending the final outcome of the reconstruction, based upon the scheme of arrangement NAS total liability in accordance with the Scheme of Arrangement will be 5% of reassessed amount, i.e. NOK 26.6 mNOK.

11.1.4 Reassessment from the Norwegian Tax Authorities - intangible income Norwegian brand

The Norwegian Tax Authorities have given notice to the Company that it may be subject to an additional tax claim for reporting too low income on the tax return for 2014-2018. The claim is based on the view that parts of the intangible return allocated to Norwegian Brand Ltd. should have been allocated to the Company. The Company, supported by its legal advisors, are of the view that the claim is unfounded, and have disputed the grounds of the claim and its size. The Norwegian Tax Authorities is yet to make final decision on the matter.

In the event the claim exists, the Company is of the view that the claim will be subject to cram-down in the same way as other unsecured debt incurring prior to 18 November 2020 under the Restructuring Proposals.

11.1.5 Reassessment from Irish Revenue

In December 2019, April 2020 and January 2021 Irish Revenue made an assessment for the period 2014 - 2018, 2019 and January and February 2020 respectively of a total of EUR 24 million pertaining to withholding income tax (PAYE) on non-resident crew exercising their employment on an aircraft in international traffic where the enterprise has its place of effective management in Ireland. The crew in scope are non-Irish residents and their employment are not exercised in Ireland. The Company, supported by its tax advisors, are of the opinion that Irish Revenue's application of the provision is overly broad and is contrary to the EU law and have concluded that it is more likely than not that the assessment will be reversed.

The assessment is appealed. Pending the final outcome of the reconstruction, based upon the Scheme of Arrangement NAS' total liability in accordance of the Scheme of Arrangement is 5% of the reassessed amount, i.e. EUR 881.000. Accordingly, the appeal is withdrawn.

11.1.6 Customer claims and claims based on Regulation (EC) 261/2004

The Group is, from time to time, subject to litigation, arbitration and administrative proceedings in the jurisdictions in which it operates. Many of these proceedings relate to claims arising in the ordinary course of business including, but not limited to, litigation relating to service interruption, flight delays, cancellations and lost or damaged luggage.

Claims for care and compensation as per Regulation (EC) 261/2004 (the EU regulation establishing common rules on compensation and assistance to passengers in the event of denied boarding and of cancellation or long delay of flights) account for a significant proportion of the Group's exposure to litigation and administrative proceedings and are also a significant cost component. The Group is subject to Regulation (EC) 261/2004 where it applies.

The Group's potential liability is not only determined in litigation to which itself is a party, but also in litigation involving other carriers, as decisions issued by higher courts of EU member states and the European Court of Justice may create precedence to which the Group seeks to comply. Such precedents can potentially both

widen or narrow the scope of liability for carriers under Regulation (EC) 261/2004, and may also affect claims retrospectively.

The Group aims to resolve all claims from passengers for Regulation (EC) 261/2004 compensation in an expedited manner without resorting to dispute resolution procedures, however, because of e.g. processing delays or disagreement concerning the eligibility, claims are sometimes also escalated to national enforcement bodies within the EU/EEA (NEBs), alternative dispute resolution bodies (ADRs) or to the courts of the relevant EU/EEA member state. Such proceedings will be ongoing in the ordinary course of business. Claims related thereto may be significant, and the handling and processing of these may also be affected to the current Examinership/Reconstruction processes.

All claims under (EC) 261/2004 will be dealt with under the Examinership and Reconstruction process described in Section 4.7.

11.1.7 Claim to surrender emission allowances

In April 2021, the Norwegian Environment Agency (Nw.: *Miljødirektoratet*) notified the Company of the view that the cram down of claims in the Examinership and Reconstruction does not apply to the Company's obligation to surrender emission allowances under EU ETS (see Section 9.6.2 "Environmental regulations") for emissions pre-dating 18 November 2020. The contemplated market value of such allowances is approximately NOK 180 million. The reconstructor has however determined that the Restructuring Proposal applies to the Company's obligation to surrender emission allowances as a different view would have given preference to the EU ETS regime which the current insolvency legislation does not facilitate. Therefore, the Company is unable to comply with the Norwegian Environment Agency's demand of the Company surrendering emissions allowances. The Company has been notified that the lack of compliance will result in a negative allowance account in the EU ETS register. The factual lack of surrendering emission allowances within the deadline 30 April 2021 will automatically trigger a significant fine for the Company, currently assessed to be in the range of NOK 400 million. The Company, supported by its advisors and the reconstructor, are of the view that such fine either is invalid as the Company is incapable of complying with the EU ETS regime or -if at all valid - will be subject to the cram-down introduced in the Restructuring Proposal. There can however be no assurance that the Norwegian Environment Agency share the Company's view and/or that the claims relating to the fine and/or allowances are not put under effort to be made subject to an appeal, or is actually admitted as an appeal under the Reconstruction. Furthermore, no assurance can be given that the Norwegian Environment Agency will not succeed with their claims if pursued.

As further described in the Restructuring Proposal, it is, among other things, a condition for effectiveness of the Restructuring Proposals that the Restructuring has been sanctioned by *Oso Byfogdembete*. Accordingly, any appeal submitted under the Reconstruction may result in a delay of the effectiveness of the Restructuring Proposal or that the Restructuring Proposal is not completed at all and thus also a delay or cancellation of the Offering. Even if the Norwegian Environment Agency does not appeal the approval of the Restructuring Proposal, it may still seek the matter to be determined by the ordinary courts and claim that the surrendering of emission allowances is not subject to the cram down pursuant to the Restructuring Proposal and that the fine described above is payable by the Company.

11.1.8 Claims from employees of Norwegian Air Resources Limited

On 22 April 2021, the Company received notice about a writ of summons submitted to the Judicial Court of Paris towards the Company by 227 employees of Norwegian Air Resources Limited (which is currently under liquidation proceedings). The employees are claiming damages from the Company in an amount of 2 years of annual wages. The reason for the claims is that the Company allegedly brutally terminated its commercial relations with Norwegian Air Resources Limited and that such termination under French law entitles the employees of Norwegian Air Resources Limited to seek damages from the Company.

11.1.9 Claims from unions representing employees of Spanish subsidiaries

Most of the employees of the Spanish subsidiaries of the Company are unionized. Two unions have filed a claim against Norwegian Air Resources Spain S.L. and the Company alleging the existence of illegal transfer of

employees between the two companies. The hearing is scheduled to next June 8th, 2021 at the Spanish National Courts. If the claim is accepted by the National Court, NAS will assume economic and employment liabilities towards the Employees of the Norwegian Air Resources Spain S.L. The financial impact of assuming such liabilities is considered limited. In any event, the unions have solely requested a declaratory judgment on illegal transfer of employees, and no material claims are set out against Norwegian Air Resources Spain S.L. or NAS for the time being.

11.1.10 Other claims

Certain claims have been filed by aircraft lessors and other creditors which are as of the date of this Registration Document subject to the aforementioned moratorium arising under the Examinership and the Reconstruction.

11.2 Material contracts which Norwegian is dependent on in its ordinary course of business

Aircraft purchase commitments

The Group has several aircraft purchase commitments from agreements entered into with Boeing and Airbus. An overview of these agreements is presented in Section 4.14 "Investments". Reference is however made to description of the termination of purchase orders from, and claim for compensation against, Boeing and Boeing's contesting and claims asserted thereto. The result of the claims is highly uncertain.

Operating leases

As outlined above, Norwegian has adopted the new accounting standard IFRS 16 Leases from 1 January 2019. IFRS 16 eliminates the classification of leases as either operating leases or finance leases from a lessee point of view. Instead, all leases are treated in a similar way to finance leases under IAS 17. From 1 January 2019, all external aircraft lease contracts in the Group are presented as ROU assets.

Norwegian has chosen to apply the recognition exemptions under IFRS 16 for all property and car lease agreements meeting the requirements for such exemptions. Those leases as well as variable payments for the lease of technical equipment are accounted for in the same way as operating leases under IAS 17.

Obligations from such lease contracts are presented in the table below and include 21 (2018: 14) cars and 116 (2018: 126) properties in Oslo, Dublin and London, in addition to properties in all the operating bases worldwide. Leasing costs related to cars, properties and technical equipment expensed in other operating expenses in 2019 was NOK 172.8 million (2018: NOK 228.9 million).

Leasing costs expensed on aircraft leases within operational expenses were NOK 4,351.4 million in 2018. Included in leasing costs were wet lease and operating lease costs on aircraft from sale-and-leaseback transactions.

Annual minimum rent on non-cancellable operating lease agreements per 31 December 2020, 31 December 2019 and 31 December 2018 were as follows:

| <i>In NOK millions, nominal values</i> | 31 Dec 2020 | 31 Dec 2019 | 31 Dec 2018 |
|----------------------------------------|--------------------|--------------------|--------------------|
| Within one year | 12.4 | 12.6 | 5,244.1 |
| Between 1 and 5 years | 4.5 | 21.5 | 18,358.4 |
| After 5 years | - | 5.5 | 17,687.2 |
| Total lease commitments | 16.9 | 36.9 | 41,289.7 |

Current estimates of maintenance accruals over the lease agreements at 31 December 2020: NOK 2,502 million (31 December 2019: NOK 3,924 million).

Other contracts

On 24 October 2019, the Company announced the formation of a JV with CCB Leasing (International) Corporation DAC (CCBLI), which is a wholly owned subsidiary of China Construction Bank Corporation (CCB), an industry leader in banking, financial services and leasing, and the world's second largest bank by asset value. CCBLI is the majority owner of the joint venture with a 70 percent share, while the Company, through its wholly owned subsidiary AAA, holds the remaining 30 percent. The purpose of the joint venture is to finance, own and lease aircraft which are part of the Company's Airbus A320 family aircraft order book. Under the terms of the agreement, the joint venture will purchase from AAA a total of 27 Airbus A320 NEO aircraft to be delivered from 2020 to 2023, of which three aircraft are currently delivered and on lease with a third party operator. Aircraft deliveries into the joint venture will start from Q1 2020. CCBLI has committed to provide senior debt financing to the joint venture for all of the 27 aircraft. In addition to a positive equity effect, the joint venture reduces the Company's committed capital expenditure by approximately USD 1.5 billion based on the initial 27 aircraft.

The Company has selected the Rolls-Royce Trent 1000 engine to power all new 787 Dreamliner aircraft. The contract, signed with Rolls-Royce, includes "Total Care" long-term support agreements which include all maintenance, spare parts and other support services. The contract value quoted at list price is USD 450 million when comprising 18 engines.

The Company has entered into a maintenance agreement with Boeing comprising all long-haul aircraft on order. The agreement secures cost efficient maintenance and has a duration of twelve years.

On 18 December 2015, the Group signed an agreement to lease out twelve Airbus A320neo aircraft to airline HK Express. The first seven aircraft were delivered from December 2016 to May 2018, and then sold to another lessor at a profit. The Group expects to deliver the remaining five aircraft into its joint venture with CCBLI in 2020.

Bond agreements and other loan agreements

For further information on the bond agreements and other loan agreements, please refer to Section 4.15 "Key Financial Agreements".

12. ADDITIONAL INFORMATION

12.1 Documents on display

For twelve months from the date of this Registration Document, copies of the following documents will be available for inspection at the Company's website www.norwegian.no:

- The Articles of Association of the Company.
- All reports, letters, and other documents, historical financial information, valuations and statements prepared by any expert at the Company's request any part of which is included or referred to in this Registration Document.

12.2 Advisers

Advokatfirmaet BAHR AS (Tjuvholmen Allé 16, 0252 Oslo, Norway) is acting as legal counsel to the Company.

12.3 Independent auditor

The Company's independent auditor is PricewaterhouseCoopers AS ("PwC") which has their registered business address is at Dronning Eufemias gate 71, 0194 Oslo, Norway. PwC was engaged as the Company's independent auditors on 30 June 2020, with effect for the financial year ending 31 December 2020. The partners in PwC are members of the Norwegian Institute of Public Accountants ("Den norske Revisorforening").

PwC has not audited, reviewed or produced any report on any other information provided in this Registration Document.

12.4 Documents incorporated by reference

For the life of this Registration Document the following documents (or copies thereof), where applicable, is incorporated by reference, and may be found at the website of the Company:
